CONCENTRATE FOR ALL TYPES OF SWIMMING POOLS

THE EASIEST YEAR-ROUND POOL TREATMENT
Unique Synergy Keeps Water Algae-Free And Crystal-Clear

+ SUMMER...Easier 2-Step Treatment With Less Chlorine
+ WINTER...Easier 1-Step Treatment Without Chlorine

Protects Uncovered, Mesh And Covered Pools

KEEPS OUT OF REACH OF CHILDREN

CAUTION: See Side Panel For Additional Precautionary Statements

ACTIVE INGREDIENTS: Poly-jacetylthielen-dimethylamino-ethylen (dimethylamino-ethylen dichloride)...30%
INERT INGREDIENTS:...........70%
This product contains 2.67 lb. of active ingredients and weighs 8.9 lb. per gallon.

64 FL. OZ. (2 QTS.) 1.89 LITERS Made in California

SUMMER 2-STEP CARE:

POOL SIZE IN U.S. GALS.
10,000
20,000
25,000

SUMMER TREATMENT
INITIAL DOSE
CLEAN VISIBLE ALGAE
Solution
10 oz.
20 oz.
30 oz.

NOTE: Use Higher Weekly Doseage for Heavy Algae Used Pools

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with this labeling.

Pooltech provides an easier, more effective year-round treatment. Pooltech keeps water continuously clear and helps remove and prevent green, blue-green, yellow and black types algae in swimming pools. Pooltech not only improves water quality but relieves swimming action with all types of chlorine and bromine products provides superior treatment results. The "summer 2-Step" maintenance program and the "Winter 1-Step" results treatment finally makes year-round pool care simple and most effective.

BEFORE YOU START: The most effective use of Pooltech to keep water clear and to remove and control all types of algae growth's in the best, advanced when pool equipment has been cleaned and is working properly. If needed, backwash or clean filter according to proper procedures. Adjust water pH balance to maintain a pH level of 7.2 to 7.8 in conventional water using a sanitizer. Maintain chlorine (or other sanitizer) treatment residual as recommended by product label instructions.

USING POOLTECH IN SUMMER:

MAINTENANCE: To maintain water clear and algae-free, add the proper Pooltech initial dosage under: "Clean" for your pool size. Thereafter, the addition of Pooltech "Weekly Doseage" not only makes easier pool maintenance by keeping water clear and algae-free, but usually reduces chlorine consumption and shock frequency in residual swimming pools.

CLEANUP: For maximum effectiveness pools containing heavy algae growth should be cleaned of excess debris. Add and disperse proper Pooltech dosage under: "Visible Algae" directly to pool water. Use maximum "Visible Algae" dosage for yellow or black types algae. Supershock or shock treatments further enhance Pooltech's removal of algae. Operate circulation pumps during the algae clean-up period to ensure thorough distribution and maximum cleanup effect. Brush dead algae especially yellow from pool surfaces for more effective algae removal by filtration. Use a special wire brush and frequently scrub black algae.

PRECAUTIONARY STATEMENTS:
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: May be harmful if swallowed. Avoid prolonged direct contact with skin, eyes and clothing.

FIRST AID: IF SWALLOWED: Call a Poison Control Center or doctor immediately. Have person sip a glass of water if able to swallow. Do not induce vomiting unless advised by poison control center or physician. Do not give anything by mouth to an unconscious person. IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin with water. IF INHALED: Have person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible. IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call the poison control center or doctor for further treatment advice. Have the product container or label with you when calling or going for treatment.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams, and ponds. Permits may be required for discharge containing this pesticide into lakes, ponds and public waters. For guidance, contact the regional office of the Environmental Protection Agency.

STORAGE & HANDLING: Keep container closed when not in use. Splits may be slippery. Mix up product with clean water. Do not blend directly with other pool chemicals.

DISPOSAL: Do not reuse empty container. Triple rinse container and dispose of trash.

*60-Day Dosage applies only to uncovered pools

This fall, “Take A Vacation From Chlorination” and keep your pool water treated with just Pooltec Winter LayUp. Using Pooltec throughout the non-swimming season not only controls algae and keeps pool water clear, but also allows a quicker start-up in the spring. Winter LayUp with Pooltec is easy, requires minimal effort, reduces pool filter time and provides very effective protection for both covered and uncovered pools from fall to spring.

**BEFORE YOU START:** For best results, adjust pool water pH to between 7.4 and 7.8 with an alkalinity level in the range of 80 to 150 ppm. Further pH adjustment is seldom needed (for most pools) as long as water pH remains between 7.0 and 7.3. Remove excess leaves and debris in pool basin to prevent surface stains. For added protection, super chlorinate or shock pool as you begin to Winter LayUp with Pooltec. Further pool chlorination is unnecessary.

**USING POOLTEC FOR WINTER:**

At the end of the swimming season when water temperature is dropped below 70°, add the correct Pooltec “Initial Dosage” under either “Clean” or “Visible Algae.” Swimming pools with visible algae should follow summer cleanup instructions before Winter LayUp. As needed, operate pool filtering system to keep surfaces clean from dirt and debris. Pooltec requires only minimal pump circulation time as it is unaffected by evaporation, sunlight, and temperature. Winter treatment of clean pools with Pooltec usually eliminates sanitizer usage and reduces pool testing during the non-use period. It is normal for chlorine or other sanitizer levels to completely evaporate (dissipate) within several weeks after beginning Pooltec Winter LayUp treatment.

For Covered Pools: Only the “Initial Dosage” is required for your pool size.
For Uncovered Pools: The “Maintenance Dosage” is required every 60 days until spring startup.

In general, Pooltec is compatible with those chemicals normally used to treat pool and is effective at both acidic and alkaline pH. Do not mix Pooltec directly with concentrated dry or liquid chlorine products. Pooltec does not change water pH and is non-foaming and non-staining. Swimmers can use swimming pool immediately after treatment.
