DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. This product is designed for use in hospitals, nursing homes, hotels, schools, homes, athletic/recreational facilities, food-processing plants, food-service establishments, restaurants, bars, animal quarters and kennels where disinfection, sanitation and deodorization is of prime importance. When used as directed, this product is formulated to disinfect hard, non-porous, inanimate environmental surfaces: floors, walls, metal surfaces, stainless steel surfaces, glass, porcelain, ceramic tile, plastic surfaces, bathrooms, shower stalls, bathtubs, toilets, sinks, urinals, and telephones.

This product deodorizes those areas, which generally are hard to keep fresh smelling, such as garbage storage areas, empty garbage bins and cans, pet areas and any other areas, which are prone to odors caused by organisms. This product is not to be used as a sanitizing agent on food-processing equipment or food-accessory items.

This product is to be used as a sanitizer on food-processing equipment at 200-400 ppm active chlorine without portable water systems. This product is not to be used as a terminal sanitizing agent that is directed against the human body, either alone or in conjunction with the bloodstream or normally sterile areas of the body.

DISINFECTION - To disinfect inanimate, hard non-porous surfaces apply use-solution with mop, cloth, sponge, low pressure sprayer or hand pump trigger sprayer as to wet all surfaces thoroughly. Allow to remain wet for 10 minutes, then remove excess liquid. For heavily soiled areas, a pre-cleaning step is required. Prepare a fresh solution for each use. For low pressure sprayer and hand pump trigger sprayer application, apply 4.4 fluid ounces per cubic foot of area. Do not have any sprayer, spray can or any other sprayer materials inside the lab or other areas. For heavily soiled areas, a pre-cleaning step is required. Apply solution with a cloth, sponge or hand pump trigger sprayer as to wet all surfaces thoroughly. Allow the solution to remain wet 5 minutes, then remove excess liquid and rinse with portable water. Do not use on mattresses, drapes, glass, or wood.

Deodorization of portable storage and equipment - Remove all deposits prior to distributing of portable storage and equipment. Pre-clean hard surfaces by removing heavy oils or grease. Do not use any degreaser products described above. All treated areas must be thoroughly rinsed with portable water after use.

Disinfection of equipment, animal quarters and kennels - For disinfection of pre-cleaned equipment (brooders, watering tanks, feeding equipment), animal quarters and kennels, apply a solution of 2.5 ounces of this product per gallon of water. Remove all pools, water, and food from premises, trucks, coops, and crates. Remove all litter and droppings from floors, walls and surfaces of facilities occupied or traversed by poultry or animals. Empty all feeders, waterers, and other feeding and watering equipment. Thoroughly clean all surfaces with soap or detergent and rinse with water. Sanitize the surfaces with the deodorizing solution for a period of 10 minutes. Remove all remaining litters, moss, and other deposits used in handling and housekeeping equipment. Remove all litter and droppings from floors, walls and surfaces of facilities occupied or traversed by poultry or animals. Remove all feeders, waterers, and other feeding and watering equipment. Thoroughly clean all surfaces with soap or detergent and rinse with water.

FIRST AID

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. If exposed, wash eyes and reshow for 15 minutes. Remove contact lenses, if present. After 15 minutes, rinse eyes with water. Call a poison control center or doctor. Do not apply anything by mouth to an unconscious person. If inhaled, remove source of exposure. Call a poison control center or doctor for further treatment advice.

NOTICE TO PHYSICIAN

Provide medical assistance or consult with a physician as needed. For additional precautionary statements, contact the U.S. Department of Transportation (USDOT) or the TSCA.gov website.
