4 STEPS FOR COMPLETE FLEA CONTROL

Step 1 - Shampoo or dip your dog.

Step 2 - Treat indoor and outdoor premises with indoor and outdoor sprays, foggers, and powders.

DIRECTIONS FOR USE

READ ENTIRE LABEL BEFORE EACH USE

DO NOT USE ON CATS or other animals other than dogs. May be toxic and potentially fatal if applied to or ingested by cats. Do not apply this product to your dog’s ears or mouth and do not allow the dog to ingest this product. Repeat applications may be made if necessary, but do not apply more than once every 3 weeks, except to span after a shampooing the dog.

HOW TO APPLY

Remove product tube from package. Holding tube upright, twist off cap, insert tube over dog and use open end to part dog’s hair. Square tube firmly to apply all of the solution to the dog’s skin. Do not scrub and put in touch.

VetGuard Plus for Dogs is an effective and easy to use product. This product has demonstrated greater than 97% control of fleas with one day of application. This product prevents signs of fleas on infested dogs from developing into biting adults for up to 4 months. As with all flea and tick control products, this product should be used as part of a program aimed at reducing flea populations in the dog’s environment (bedding, carpets, kennel, etc.). Consult your veterinarian, entomologist, or entomologist for program recommendations.

DO NOT USE ON CATS - MAY BE FATAL
