plants, storage, barns, grain bins, barns, feedlots, factories, hotels, restaurants, offices, schools,
shores, parks, garages, and supermarket food warehous., hotel properties, homes, and
impingement areas of homes and chicken houses.

This product contains a highly effective insecticide designed especially FOR USE IN
automatic dispensers. The container activates the metered valve every 15 minutes. Usually
the effectiveness of this product will be reduced within one hour after the Dispenser is
activated. If less than 24 hours interval is required, the Dispenser should start one hour
before control is needed and run one hour after control is no longer needed. Keep in mind
that factors such as airflow rate, size of treated area, humidity, and temperature affect
insect control and effectiveness. Therefore, one unit per 600 cubic feet of unobstructed
space should be considered as an average with adjustments made depending on specific
conditions at storage site. As with any method of insect kill, best results are achieved when
sanitation and other positive insect control practices are followed.

STORAGE & DISPOSAL: Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in a cool, dry, area away from flame or fire. Store in cool dry
CONTAINER DISPOSAL: Do Not: Store near
heat or open flame. Store in cold dry area away from flame or fire. Do Not store near
Combustible or Inflammable (FFF) product. Do not mix with other pesticides, use or
CONTAINMENT: Place in plastic bag or metal drum. Call your local solid waste
agency for disposal instructions.

KEEP OUT OF REACH OF CHILDREN

CAUTION
