METERED INSECTICIDE Fly Spray

PRECAUTIONARY STATEMENTS:
Hazard To Humans and Domestic Animals:

CAUTION: Contains Petroleum Distillate. Harmful if swallowed or absorbed through the skin. Avoid breathing vapor or spray mist. Avoid contact with the skin, eyes, or clothing. Prolonged or frequent repeated skin contact may cause allergic reactions in some individuals. Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

FIRST AID:
If SWALLOWED: immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person. If INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth. If poisoning control center or doctor for further treatment advice. IF ON SKIN OR CLOTHING: Take off contaminated clothing. Wash body immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. IF IN EYES: Instill open eye and area slowly and gently with water for 15-30 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

HOT LINE NUMBER: Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For additional information on this pesticide product (including health concerns, medical emergencies, or pesticide incidents), you may call 1-800-222-1222, 24 hours per day, 7 days per week. NOTE TO PHYSICIAN: Contains petroleum distillate - victims may have aspiration pneumonia.

ENVIRONMENTAL HAZARDS:
This product is toxic to aquatic organisms, including fish and invertebrates. Drift and run-off may be hazardous to aquatic organisms in water adjacent to treated areas. This product may contaminate water through runoff. This water has a potential for run-off for several weeks after application. Poorly drained soils and soils with shallow water tables are more prone to produce run-off. This contaminates this product. This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds when bees are actively visiting the treatment area. Do not apply to water, to areas where surface water is present or to marshland areas below the mean high water mark. Do not contaminate water when disposing of equipment wash-waters or meat. See Directions for Use for additional precautions and restrictions.

PHYSICAL OR CHEMICAL HAZARDS:
Contains under pressure. Do not use or store near heat or open flame. Do not incinerate or mix with other materials. Exposure to temperatures above 120°F may cause bursting. Do not allow spray to contact plastic, painted or varnished surfaces.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. FOR USE IN FOOD HANDLING AND FOOD PREPARATION AREAS AND FOOD PROCESSING PLANTS: Store, stow, clean, wash, rinse, and means, offices, ships, planes (cargo area only), supermarkets food conformed. Exposure to temperatures above 120°F may cause bursting. Do not allow spray to contact plastic, painted or varnished surfaces.

NET WT. 16.0 OZ (397 g)

WAREHOUSES, packing plants, milk and egg handling areas of dairies and chicken houses.

This product contains a highly efficacious insecticide designed especially FOR USE in automatic dispensers. The dispenser activates the metered valve every 15 minutes. Usually the effectiveness of this product will be noticeable within one hour after the dispenser is activated. If less than 24 hours are required, the dispenser should be set to start one hour before it is desired. If the one hour after the hour is no longer needed. Keep in mind that factors such as air temperature, wind speed, humidity and room temperature affect insect activity and will. Therefore, only one per 8,000 cubic feet of unventilated space should be considered as an average with adjustments made depending on specific conditions at usage site. All with any metered net kit, best results are achieved when sanitation and other positive insect prevention practices are followed.

Do not use in aircraft cabins. It is suggested that the container be changed once a month.

OPERATION: Remove protective cap from top of can; insert can in dispenser. Secure dispenser at least 7 feet from floor or ground at a point where wind or floor will carry the product through the area to be protected.

USE RESTRICTIONS: This product may be applied as specified on this label. Do not contaminate food or feedstuffs. THIS PRODUCT IS FOR INDOOR USE ONLY. This product is not for use in residential areas or on industrial surfaces. This product is not for use in outdoor residential living systems (indoors or outdoors). Do not enter or allow others to enter until vapor, mists and aerosols have dispersed. If the area has been thoroughly ventilated.

Do not apply this product in a way that will contaminate workers or other persons, either directly or through drift. Do not remain in treated areas. Area must be immediately and remain outside the treated area until aerosols and mists have dispersed. Remove or cover exposed food and drinking water before application. If exposure occurs to domestic animals: Do not remain in treated areas. Area must be immediately and remain outside the treated area until aerosols and mists have dispersed. Remove or cover exposed food and drinking water before application. If exposure occurs to domestic animals: Do not remain in treated areas. Area must be immediately and remain outside the treated area until aerosols and mists have dispersed. Remove or cover exposed food and drinking water before application. If exposure occurs to domestic animals: Do not remain in treated areas. Area must be immediately and remain outside the treated area until aerosols and mists have dispersed. Remove or cover exposed food and drinking water before application. If exposure occurs to domestic animals:

STORAGE & DISPOSAL: Do not contaminate water, food, feed or food by storage or disposal. PESTICIDE STORAGE: Store in a cool, dry, preferably dark area that is inaccessible to children and pets and away from heat, spores, or open flames.
