**FASTRAC® PELLETS**

**KILLS RATS, MICE, AND MEADOW VOLES**

Kills Anticoagulant Resistant Norway Rats, Roof Rats And House Mice. Norway rats, roof rats and house mice cease feeding after consuming a toxic dose.

**ACTIVE INGREDIENT:** Bromethalin (CAS # 63033-37-7) 0.01%

**OTHER INGREDIENTS:** . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 99.99%

**KEEP OUT OF REACH OF CHILDREN CAUTION.**

See side panels for First Aid and additional precautionary statements.

---

**STORAGE AND DISPOSAL:**

Do not contaminate water, food or feed by storage or disposal.

**PESTICIDE STORAGE:** Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

**PESTICIDE DISPOSAL:** Routes resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility.

**CONTAINER HANDLING:** Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Dispose of container in an approved waste disposal facility.

**WARRANTY:** By the manufacturer.

**NET WEIGHT:** 6 lbs (2.72 kg)

---

**APPLICATION DIRECTIONS:**

General Comments – These products are extremely toxic to mammals and birds. Dogs and other predatory and scavenging mammals and birds might be poisoned if they feed on rodents that have eaten this bait. Do not apply directly to water, nor to areas where surface water is present or to riparian areas below the mean high water mark. Runoff also may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rinsate.

**Recommended Application Rates:**

- **For Rodent Baits:**
  - **Burrows:** Use 0.5 to 1 ounce of bait per burrow (usually 1 to 2 ounces total). Adjust the amount of bait applied to the level of rodent feeding expected at each bait placement.
  - **For treating burrows, use a long-handled spoon to place ½ to 1 ounce of bait deep into each active burrow entrance.** Close burrows with soil 3 to 7 days after bait placement. Retraining burrow entrances that are reopened by rats. If the area where treated burrows are located is accessible to children and nontarget animals, check burrows every morning and evening to make sure that the bait has not been pushed out of burrows. Remove and properly dispose of any bait that has become accessible to children or nontarget animals.
  - **Mice and Meadow Voles:** Apply ½ to 1¼ ounce of bait per placement. Space placements at intervals of 8 to 12 feet in treated areas. Larger placements, up to 2 ounces, may be used at points of extreme high mouse or meadow vole activity.

**Baiting Strategy:**

Highest bait consumption is expected to occur on the first day or two after treatment begins. After several days, inspect the placement and replenish bait at sites where there is evidence of heavy feeding or where there is continued evidence of rodent activity.

**Follow-up:** Replace contaminated or spoiled bait immediately. Using waterproof gloves, collected and properly dispose of dead, exposed animals and leftover bait. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of habitation is present, establish permanent bait stations and replenish them as needed.

**PRECAUTIONARY STATEMENTS:**

**Hazards to Humans and Domestic Animals:**

**CAUTION:** Harmful if swallowed. Keep away from children, domestic animals and pets. Do not get in eyes, on skin or on clothing. All handlers (including applicators) must wear long-sleeve shirt, long pants, shoes plus socks, and gloves. Any person who retrieves carcasses or unused bait following application of this product must wear gloves.

**User Safety Requirements:**

Follow manufacturer’s instructions for cleaning/disinfecting PPE. If no such instructions for washables exist, use detergent and hot water and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing them. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.

**ENVIRONMENTAL HAZARDS:**

This product is extremely toxic to mammals and birds. Dogs and other predatory and scavenging mammals and birds might be poisoned if they feed on rodents that have eaten this bait. Do not apply directly to water, nor to areas where surface water is present or to riparian areas below the mean high water mark. Runoff also may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rinsates.

**Not permitted for use against the following species in California:** Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Ratanevrat, White-throated woodrat, Southern plains woodrat, and Mexican woodrat.

---

**SELECTION OF TREATMENT AREAS:**

- Do not place bait near or inside ventilation duct openings.
- Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations.
- Do not apply bait next to or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations.

**FIRST AID:**

- Do not induce vomiting unless told to do so by the poison control center or doctor.
- Call a poison control center, doctor, or 1-877-854-2494 immediately for treatment advice.

**IF SWALLOWED:**

- Normally, the volume of bait consumed will be significantly less with bromethalin baits than with anticoagulant baits. Although one feeding will usually provide a lethal dose, maintain bait for at least one week to provide all rodents a chance to feed on the bait. Continuing feeding until all signs of feeding have ceased.

**IF IN EYES:**

- Rinsing with water may be insufficient to completely remove the product. Keep the eyes open and turn the head to the side to allow tears to flow out of the eye. If soiling continues, consult a physician immediately. If soiling continues, consult a physician immediately.

**IF IN SKIN:**

- Wash the skin thoroughly with soap and water. Change contaminated clothing. If irritation persists, consult a physician immediately.

**IF ON CLOTHING:**

- Do not launder clothing on which the product has spilled. Place contaminated clothing in a sealed plastic bag, wash, dry and store separately from clean clothing.

**INHALE:**

- Get fresh air immediately. If not breathing, call an emergency number or apply artificial respiration immediately. Consult a physician immediately.

**SPACE OUTDOOR FEEDING AREAS:**

- Do not place baits near or inside ventilation duct openings.
- Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations.

**IF ON HAIR:**

- Wash the hair thoroughly with soap and water. Change contaminated clothing. If irritation persists, consult a physician immediately.

---

**NOTE TO PHYSICIAN OR VETERINARIAN:**

Contains the nerve poison Bromethalin. This product is not an insecticidal-type rodenticide. For humans or animals ingesting bait and/or showing poisoning symptoms (such as muscle tremors, loss of limb use, or seizures for animals), limit absorption by either external or gastric lavage. Sublethal symptoms, if present, would be the result of central edema and should be treated accordingly through administration of anemic chronic and corticosteroids.

**FOLLOW-UP:**

- If an animal eats this bait, call a veterinarian at once.
- Do not place bait near or inside ventilation duct openings.
- Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations.

**IF ON CLOTHING:**

- Do not launder clothing on which the product has spilled. Place contaminated clothing in a sealed plastic bag, wash, dry and store separately from clean clothing.

---

**NOTICE TO PROPERTY OWNERS:**

- Do not apply bait near or inside ventilation duct openings.
- Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations.
