FINAL®

SOFT BAIT
PATENT PENDING

KILLS RATS & MICE
Kills Warfarin Resistant Norway Rats And House Mice

ACTIVE INGREDIENT:
Brodifacoum (CAS #56073-10-0): ............... 0.0025%
OTHER INGREDIENTS*: .................... 99.9975%
*Contains Denatonium Benzoate
TOTAL .................................. 100.0000%

KEEP OUT OF REACH OF CHILDREN
CAUTION

See back panels for First Aid and additional precautionary statements.
DIRECTIONS FOR USE

This product may also be used in allures. Do not place near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment or surfaces that come in direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations. Do not broadcast bait.

Do not sell this product in individual containers holding less than 16 pounds of bait.

Burrow baiting with Final® Soft Bait is prohibited.

SELECTION OF TREATMENT AREAS: Determine areas where rats or mice will most likely find and consume the bait. Generally, these areas are along walls, by grated openings. In or beside burrows, in corners and crevices, and areas where rodents have been seen. Protect bait from rain and snow. Remove as much alternative food as possible.

APPLICATION DIRECTIONS:

RATS: Place 6 to 24 sachets at intervals of 15 to 30 feet per placement in infested areas. Maintain an uninterrupted supply of fresh bait; for at least 10 days or until signs of rat activity cease.

MICE: Place 1 sachet per placement. Space placements at 8 to 12 feet intervals in infested areas. Three pouches each may be needed at all points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until signs of mouse activity cease.

FOLLOW-UP: Replace contaminated or spoiled bait immediately. Wear gloves, clothes and dispose of all dead, exposed animals and left over bait. To prevent reinfection, limit sources of rodent food, water, and harborage as much as possible. If reinfection does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals:

CAUTION: Harmful if swallowed. Keep away from children, domestic animals and pets.

All handlers (including applicators) must wear shoes plus socks, and gloves. Any person who retrieves carcasses or unused bait following application of this product must wear gloves.

User Safety Requirements

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or on the toilet and change into clean clothing.

ENVIRONMENTAL HAZARDS

This product is extremely toxic to mammals and birds. Do not contaminate water, food, feedstuffs, food or feed handling equipment, milk or meat handling equipment or surfaces that come in direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations. Do not broadcast bait.

Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Runoff also may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rinsate.
