**FIRST AID**

**HAVE LABEL WITH YOU WHEN OBTAINING TREATMENT ADVICE**

- If Swallowed: Call a poison center control, doctor, or 1-877-856-2494, or 1-888-698-7377 immediately for treatment advice.
- If Inhaled or Dust: Remove to fresh air. If not breathing, give artificial respiration. If breathing, keep calm, quiet, and warm. If skin or eye contact: Wash with plenty of water for 15 minutes. If necessary, obtain medical advice.

**NOTE TO PHYSICIAN**

If swallowed, this material may irritate the mucous membranes and cause irritation. If ingested, administer vitamin K$_1$ intravenously or orally as indicated in hemolytic anemia treatment. If needed, check prothrombin times every 3 days until values return to normal (up to 30 days). In severe cases, blood transfusions may be needed.

**TREATMENT FOR PET POISONING**

If animal eats bait, call veterinarian or 1-877-856-2494 at once.

**NOTE TO VETERINARIAN**

Anticoagulant Broad-spectrum: For animals ingesting bait and/or showing poisoning signs (bleeding or elevated prothrombin times), give vitamin K$_1$ at doses of 2-5 mg/kg. If needed, check prothrombin times every 3 days until values return to normal (up to 30 days). In severe cases, blood transfusions may be needed.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read the entire label and all use instructions and precautions. Use only for the sites, pests, and applications methods described on this label.

**IMPORTANT:** Do not expose children, pets, or non-target animals to rodenticides. To help prevent exposure:

1. Store unused product out of reach of children and pets. (Keep out of reach of children and pets)
2. Apply bait in locations out of reach of children, pets, domestic animals, and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from bait stations when they are in use, units must be secured or otherwise immobilized. Stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container and unused, spoiled, or uncontroled bait as specified on this label.

Note: Bait stations are mandatory for outdoor, above-ground use. Tamper-resistant bait stations must be used if children, pets, non-target mammals, or birds may access the bait.

**USE RESTRICTIONS:**

This product may only be used to control Norway rats, roof rats, and house mice in and within 100 feet of agricultural buildings and non-agricultural structures. Structures must be open to the elements. The product must not be applied directly to food or feed crops.

**NET WEIGHT:**

16 lbs (7.2 kg)

**EPA REG. NO. 12455-138-3240**

**EPA EST. NO. 12455-W6-1**

**3699 Kinser St. Blvd. Middletown, Wi 53704 USA**

**MADE IN USA**

**FARM & HOME JAGUAR SOFT BAIT**

**KILLS RATS & MICE**

Norway rats, roof rats and house mice may consume a lethal dose in one night’s feeding with first dead rodents appearing five or six days after feeding begins.

**ACTIVE INGREDIENT:**

- Brodifacoum (CAS #50073-10-0) 0.0025%

**OTHER INGREDIENTS:**

- Contains Denaturant Benzoate TOTAL 100.0000%

**KEEP OUT OF REACH OF CHILDREN**

CAUTION:

See side panels for First Aid and additional precautionary statements.

**STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage or disposal. Pesticide Storage: Store only in original container in a cool, dry place inaccessible to children and pets. Container Handling: Do not reuse or refill this container. [Plastic] Offer for recycling or reconditioning, or puncture and dissolve in a sanitary landfill, or by incineration. In most states, burning is not allowed. [Paper] Dispose of empty container by placing in trash, at an approved waste disposal facility or by incineration. In most states, burning is not allowed.

**ENVIRONMENTAL HAZARDS**

This product is extremely toxic to mammals and birds. Dogs, cats and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. This pesticide is toxic to fish. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Runoff also be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or fertilize.

**DIRECT CONTACT WITH FOOD: Do not contaminate food, water, feed, feedstuffs, food or feed handling equipment, or milk or milk handling equipment or surfaces that come into contact with food. When used in USA's inspected facilities, this product must be applied in tamper-resistant bait stations. Do not broadcast bait. Do not sell this product in individual containers holding less than 8 pounds of bait. Bait placed with Jaguar Soft Bait is prohibited.**

**SELECTION OF TREATMENT AREAS:**

Determine areas where rats or mice will most likely feed and consume the bait. Generally, these areas are along walls, by gnat openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rats or mice or their signs have been seen. Protect bait from rain and snow. Remove any other alternative food as possible.

**APPLICATION DIRECTIONS:**

Bait: Place 8 to 28 pouches at intervals of 15 to 30 feet per placement in infested areas. Maintain an uninterrupted supply of fresh bait for at least 10 days or until signs of rat activity cease.

House mice: Place 1 pouch per placement. Space placements at 8 to 12 feet intervals in infested areas. Three pouches may be needed at points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until signs of mouse activity cease.

**FOLLOW-UP:**

Replace contaminated or spoiled bait immediately. Weigh gloves, collect and dispose of all dead, exposed animals and leftover bait. To prevent reinfection, limit sources of food, water, and harborage as much as possible. If reinfection does not occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

**PRECAUTIONARY STATEMENTS**

HAZARDS TO HUMANS AND DOMESTIC ANIMALS:

CAUTION: Harmful if swallowed. Keep away from children, domestic animals and pets.

All handlers (including applicators) must wear shoes plus socks, and gloves. Any person who removes carcasses or unused bait following application of this product must wear gloves.

**USER SAFETY REQUIREMENTS**

Follow manufacturer’s instructions for cleaning and maintaining PPE. If no such instructions for washable, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.
