**Active Ingredient:**
- Brodifacoum (CAS #56073-10-0): 0.0025%

**Other Ingredients:**
- 99.9975%

*Contains Denatonium Benzoate  TOTAL 100.0000%

**Net Weight:**
- 16 lbs (7.2kg)

**For Use In and Around Agricultural Buildings Only**

**Kills Warfarin Resistant Norway Rats & House Mice**

**Extremely High Melt Point**

**With Brodifacoum**

**KILLS RATS & MICE**

**Keep Out of Reach of Children**

**CAUTION**
- See back panels for First Aid and additional precautionary statements.
DIRECTIONS FOR USE

1. Store unused product out of reach of children and pets. Keep containers closed and away from other chemicals.

2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from bait stations when they are lifted, units must be secured or otherwise immobilized. Stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism. 3. Dispose of product container and unused, spoiled, or unconsumed bait as specified on this label.

User Safety Requirements

Follow manufacturer’s instruction for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking chewing gum, using tobacco or using the toilet and change into clean clothing.

ENVIRONMENTAL HAZARDS

This product is extremely toxic to mammals and birds. Dogs, cats and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. This pesticide is toxic to fish. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Runoff also may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rinsate.

NOTE TO VETERINARIAN

NOTE: Bait stations are mandatory for outdoor, above-ground use. Tamper-resistant bait stations must be used if children, pets, nontarget mammals, or birds may access the bait.

NOTE TO PHYSICIAN

Do not sell this product in individual containers holding less than 8 pounds of bait.

Barrow baiting with Jaguar® Soft Bait is prohibited.

Do not broadcast bait.

Selective treatment areas: Determine areas where rats or mice will most likely find and consume the bait. Generally, these areas are along walls, by grated openings, in corners and concealed places, between floors and walls, or in locations where rats or mice or their signs have been seen. Protect baits from rain and snow. Remove as much alternative food as possible.

APPLICATION DIRECTIONS:

RATS: Place 6 to 28 pouches at intervals of 15 to 30 feet per placement in infested areas. Maintain an uninterrupted supply of fresh bait for at least 10 days or until signs of rat activity cease.

HOUSE MICE: Place 1 pouch per placement. Space placements at 8 to 12 foot intervals in infested areas. Three pouches may be needed at points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until signs of mouse activity cease.

Bait may be removed from pouch and placed in a feeding device that secures the unwrapped bait in a bait station. Discard empty wrapper in the trash.

Follow-up: Replace contaminated or spoiled bait immediately. Wearing gloves, collect and dispose of all dead, exposed animals and leftover bait. To prevent reinfestation, limit sources of rodent food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Keep away from children, domestic animals and pets. All handlers (including applicators) must wear shoes plus socks, and gloves. Any person who retrieves carcasses or unused bait following application of this product must wear gloves.

1. Do not apply in tamper-resistant bait stations. Do not broadcast bait.

2. Do not broadcast bait. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

3. Dispose of empty container by incineration. In most states, burning is not allowed.

4. Contain Handling: Nonrefillable container. Do not reuse or refill this container. [Plastic] Offer for recycling or reconditioning; or puncture and dispose of in a sanitary landfill, or by incineration. In most states, burning is not allowed. (Paper) Dispose of empty container by placing in trash, at an approved waste disposal facility or by incineration. In most states, burning is not allowed.

5. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give a stimulant orergic, or other chemicals.

6. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Runoff also may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rinsate.
