ALSO REPELS
Yoles, Armadillas and Other Burrowing Pests

KEEP OUT OF REACH OF CHILDREN
CAUTION
See inside panels for additional precautionary statements.

ACTIVE INGREDIENT: Castor Oil
OTHER INGREDIENTS: Lecithin

NET CONTENTS: 32 fl oz

Ground Penetrating Technology™
Tomcat Mole & Gopher Repellent utilizes a proprietary formulation that emulsifies the active ingredient, castor oil, so that it can be easily mixed with water. This specialized process is called “Ground Penetrating Technology™” (GPT™). GPT™ significantly improves the ability of the castor oil to mix with water and penetrate deep into the soil.

HOW TO USE
Attach a garden hose tightly to self-dispersing container. Turn water supply on to full pressure. Adjust the spray nozzle to the “DN” position. Spray this product over mole-infested area at a rate of one quart of product per 10,000 sq. ft. (e.g., a 100 ft. by 100 ft. rectangle). Adjust the spray nozzle to “Water.” Continue to spray with water for 5 minutes to soak Tomcat Mole & Gopher Repellent into the soil.

FOR BEST RESULTS
Apply Tomcat Mole & Gopher Repellent immediately after the presence of moles are detected. As a preventative treatment, apply in early Spring, Mid-Summer and early Fall if there are moles nearby but not on your property.
