STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal. PESTICIDE STORAGE: Open dumping is prohibited. Store only in original container. Do not reuse empty container. If a leaky container must be contained within another, mark the outer container to identify the contents. Store pesticides away from food, pet food, feed, seed, fertilizers, and veterinary supplies. Keep this product under locked storage sufficient to make it inaccessible to children or persons unfamiliar with its proper use. PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinseate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: non-refillable sealed container: Nonrefillable container. Do not reuse or refill this container. Wrap empty container and put in trash.

Foam Drain Sanitizer For Food Processing Facilities, Restaurant, Food Handling and Process Areas

ACTIVE INGREDIENTS:

Octyl decyl dimethyl ammonium chloride .............................................. 3.0%
Dioctyl dimethyl ammonium chloride .................................................. 1.5%
Alkyl (C16, 50%; C18, 40%; C18, 10%) dimethyl benzyl ammonium chloride .......................................................... 4.0%
INERT INGREDIENTS ........................................................................ 90.0%
TOTAL ............................................................................................ 100.0%

KEEP OUT OF REACH OF CHILDREN

DANGER PELIGRO

See side panel for additional precautionary and first aid statements.

Superscript refers to first letter of the date code.
Foaming DrainSan for use in:
- Restaurants and bars, fast food operations and food storage areas
- Supermarkets, convenience stores, retail and wholesale establishments
- Food establishments
- Restrooms

This product contains no phosphorus.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

FOR CONTROL OF SMALL FLIES IN DRAINS: For control of small flies: Drosophila spp. and the Phoridae family. Spray or pour solution of 3 ounces per 5 gallons of water (or equivalent use dilution) (50ppm active quat) into drain during time of lowest level of drain use. Add 14 ounces of solution daily to each drain to maintain fly control. Apply around the edge of the drain and coat all sides of inside of drain.

FOAMING SANITIZER FOR FLOOR DRAINS
Foam carries active into the drain pipes.

Concentrated liquid foamer for effective sanitizing. This product utilizes a unique foaming surfactant system which is synergistically formulated to give you long lasting foam for contact on all surfaces.

May be used in all types of foaming equipment that can deliver a dilution of 1:256 product to water.

It is widely accepted that it is easier to maintain drains than to unstop clogged ones.

No additional foam booster required.

Apply foam to all surfaces of the drain.

For Floor Drains and Trough Drainage Systems.

The foam generated from this product is an effective non-food contact sanitizer as evaluated using the Method for Efficacy of Sanitizers recommended for Inanimate Non-Food Contact Surfaces, at 390 ppm, 2 ounces per 4 gallons of water; solution or (equivalent use solution) in the presence of 50% organic soil with a contact time of 5 minutes against the following: Enterobacter aerogenes, Listeria monocytogenes, Staphylococcus aureus

FLOOR DRAIN AND DRAINAGE SYSTEMS FOAMING SANITIZER: At 1 ounce per 2 gallons (or equivalent) (390 ppm) this product is an effective drain foaming sanitizer. Thoroughly preclean drain with brush applicator prior to sanitization. Sanitization will occur only on precleaned surfaces of the drain. Using a foam generator or similar device, shoot foam into drain or drainage opening/trough. Set equipment according to manufacturers' instructions to deliver proper dilution of 1:256. Hold foaming nozzle/wand to drain or drainage opening/trough. Foam for at least 10 seconds or longer depending upon length of drain pipe to sanitize. Check with foam equipment manufacturer for exact time to fill length of drain pipe requiring sanitizing. Foam will completely fill pipe and push water through the (J) trap or other such catch device. Allow the drain to sit for a minimum of 5 minutes before use. Drain can then be returned to service with or without rinsing. It is recommended that a small amount of water be flushed down the drain to refill the (J) trap. Repeat use at least weekly or as may be needed to control (listed) organism growth. Do not mix other foam additives to the sanitizing solution.
