PRECAUTIONARY STATEMENT

As with all spray applications, be certain that the spray tank is clean and free from previous spray before following these mixing instructions.

1. Fill tank 2/3 to 3/4 full of water and initiate tank agitation systems. If foaming is anticipated, add an antifoam agent, such as REVERSE™, at this time to prevent and manage foaming problems during the mixing process.

2. Add pesticide/nutritional actives as directed by those respective label(s). Continue agitation.

3. Add the required dosage of SCRIMMAGE™ (refer to the dose chart below). Mix for 1 to 2 minutes with minimal agitation.

4. Continuing lower than normal agitation, fill the tank with water. For best results, apply within 36 hours of mixing, continuing minimal agitation throughout the spray process.
