ENVIRONMENTAL HAZARDS
Do not contaminate water sources by cleaning of equipment or disposal of wash water.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

_Storage:_ Keep container tightly closed. Store in a well-ventilated place. Keep cool. Store locked up. Store away from excessive heat (e.g. steam pipes, radiators), from sources of ignition and reactive materials. Keep from freezing.

_Disposal:_ Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler, visit the ACRC web page at www.acrecycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.

**DIRECTIONS FOR USE**

_Not for aquatic use in Washington. Product can be used for aquatic applications in other states. Consult the relevant aquatic herbicides for recommendations on use rates._

PHT Latron B-1956 is a water-dispersible, resin-based non-ionic surfactant (not a water-soluble detergent-type wetting agent) that resists rewetting and removal by rain. PHT Latron B-1956 is effective as a spreading, depositing and sticking agent to improve the performance of insecticides, miticides, fungicides, defoliants and herbicides.

PHT Latron B-1956 is beneficial when used on smooth and waxy or fuzzy (hairy) foliage and fruit. PHT Latron B-1956 will also improve spray coverage on fruit or foliage that is covered by dust or honey dew, webbed by spider mites or infected with powdery mildew, and on hard-to-wet insects such as mealy bugs and scales. On weeds and brush PHT Latron B-1956 will assist in the spray deposit / penetration.

Growers are urged to closely observe the pattern of spray deposition during spraying and after sprays have dried. If the pattern is blotchy and uneven, more PHT Latron B-1956 is needed. If the spray is running to lower leaf margins, “eye-browning,” or collecting in drop spots on fruit, the amount of PHT Latron B-1956 should be reduced.

**DOSAGE:** Recommendations for use of PHT Latron B-1956 depend on the crop, the pest, the kind of spray equipment, volume, pressure and droplet size of the spray and the pesticide of mixture being used. As a general guide, 1 to 2 ounces are used on moderately easy-to-wet plants, 2 to 4 ounces on hard-to-wet plants, and 4 to 8 ounces on very hard-to-wet plants per 100 gallons of dilute full-volume spray. As sprays are concentrated to 2X, 10X, or 20X, the amount of PHT Latron B-1956 should be increased in about the same proportion as the pesticide. The chart below will serve as a general guide for some of the more common types of spray application.

**NET CONTENTS:** 5 Gallons (18.9 Liters)

**TERMS AND CONDITIONS OF USE**

**DISCLAIMER OF WARRANTIES:** J.R. Simplot Company warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label only when used in accordance with label directions under normal conditions of use. To the extent consistent with applicable law J.R. SIMPLOT COMPANY MAKES NO OTHER EXPRESS OR IMPLIED WARRANTIES EITHER OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE. Handling, storage and use of the product by Buyer or User are beyond the control of J.R. Simplot Company and Seller. To the extent consistent with applicable law risks such as crop injury, ineffectiveness or other unintended consequences resulting from, but not limited to, weather or soil conditions, presence of other materials, disease, pest, drift to other crops or property or failure to follow label directions will be assumed by the Buyer or User. To the extent consistent with applicable law, in no case will J.R. Simplot Company or Seller be held liable for consequential, special or indirect damages resulting from the handling, storage or use of this product.

**MISCELLANEOUS USES:** To improve the wetting properties of insecticidal sprays on livestock, especially in hard water areas, use 1 to 2 ounces of PHT Latron B-1956 per 100 gallons of spray.

**COMPATIBILITY:** PHT Latron B-1956 can be used with wettable powder, emulsifiable concentrate or solution formulations of most pesticides now on the market.
