**LONZA INC. 99 BORDEN ROAD ALLENDALE, NEW JERSEY 07401 USA EMERGENCY TEL NO. 309-697-7200**

**PROXEL™ CMC-E MICROBICIDE**

**IN-COPPER AND INDUSTRIAL PRESERVATIVE**

**HEALTH FLAMMABILITY REACTIVITY**

**3 1 0**

**UN3265 CORROSIVE LIQUID, ACIDIC, ORGANIC, N.O.S.**

**3-(CHLORO-2-METHYL-4-ISOXAZOLIN-3-ONE)**

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**DANGER**

CORROSIVE: Causes eye, nose and throat irritation. Prolonged or frequent repeated oral contact may cause dermatitis (rashes) in some individuals. May be harmful or fatal if inhaled, swallowed or absorbed through the skin. Do not get in eyes, on skin or on clothing. When working, wear protective glasses, rubber gloves, and protective clothing. Avoid breathing dust or fume, and remove clothing containing dust or fume. Wash contaminated clothing and wash before reuse.

**ENVIRONMENTAL HAZARDS**

This product is toxic to fish and wildlife. Do not discharge or use containing this product on watersheds, lakes, streams, ponds, wetlands, or other waters in accordance with the regulations of a relevant applicable Natural Resources Protection Agency. Do not discharge or use containing this product into or on designated areas prior to discharge. Do not discharge containing this product to any systems without previously notifying the local sewage treatment plant's authority. For guidance, contact your State Water Board or Regional Office in the EPA. Do not contaminate water by rainwater or disposal of waste.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage or disposal.

**FREIGHT STORAGE:** Keep in dry, open, well-ventilated area.

**PRECAUTIONS FOR SAFE HANDLING:** Avoid contact with eyes, skin, or clothing. Wash hands after handling. Wear impermeable gloves, respirator, and protective clothing when handling. Avoid breathing dust or fume. Store in a cool, dry location.

**KEEP OUT OF REACH OF CHILDREN**

**DANGER**

FIRST AID

IF IN EYES: Hold open eyes and rinse slowly and gently with water for at least 15 minutes. Remove contact lenses if present. After the first 15 minutes, consult a health professional.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for at least 15 minutes.

IF INHALATION: Call poison control or a health professional. Do not give anything by mouth to an unconscious person.

IF INGESTED: Do not induce vomiting. If the person is breathing, call a health professional or hospital for treatment. Have the product container or label with you when calling a Poison Control Center or doctor or hospital for treatment

**NOTE TO PHYSICIAN:** Prompt medical treatment may contribute to the outcome of this product directly. Measures employed shall be taken, including respiratory treatment and consultation, as necessary.

**DIRECTIONS FOR USE**

It is a violation of federal law to use this product in manner inconsistent with its labeling.

**METALWORKING FLUID PRESERVATION**

**PROXEL CMC-E is used in the manufacture and use of all types of metalworking fluids.**

Metalworking fluid manufacturers and formulators use PROXEL® CMC-E to prevent microbial growth in the carrier fluid, the nature and severity of contamination, and the efficiency of the cooling or lubricating systems. The presence of PROXEL CMC-E results in an effective, long-lasting, and environmentally friendly system.

**WATER-BASED HYDRAULIC FLUID PRESERVATION**

**PROXEL CMC-E is used as a preservative in the manufacture and use of high pressure systems.**

**INDUSTRIAL PUMPS AND HEAT EXCHANGERS**

**PROXEL CMC-E is used to prevent microbial growth in the carrier fluid, the nature and severity of contamination, and the efficiency of the cooling or lubricating system.**

Manufactured for Lonza Inc.

PROXEL™ CMC-E
MICROBICIDE
IN-CONTAINER AND INDUSTRIAL PRESERVATIVE

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
AND DOMESTIC ANIMALS

DANGER

CORROSIVE. Causes eye damage and skin burns. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. May be harmful if inhaled. May be fatal if swallowed or absorbed through the skin. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Avoid breathing vapor or mist. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and wildlife. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA. Do not contaminate water by cleaning of equipment or disposal of waste.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store in original container in areas inaccessible to children.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray or mixture of rinse aid is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Clean container promptly after emptying. (Plastic containers): Triple rinse (or equivalent). Then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities by burning. If burned, stay out of way of smoke. (Metal Containers): Triple rinse (or equivalent), then offer for recycling or reconditioning, or dispose of in a sanitary landfill, or by other procedures approved by state and local authorities. DO NOT cut or weld metal containers.

Active Ingredients
- 5-Chloro-2-methyl-4-isothiazolin-3-one: 1.11%
- 2-Methyl-4-isothiazolin-3-one: 0.39%
- Other Ingredients: 99.50%
Total: 100.00%

EPA Reg. No. 6836-259  EPA Est. No. 10508-PA-001

KEEP OUT OF REACH OF CHILDREN

DANGER

FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth if possible.

Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a Poison Control Center or doctor or going for treatment.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in manner inconsistent with its labeling.

Proxel CMC-E is an in-container preservative for the control of bacteria and fungi in industrial and household consumer products including all purpose liquid cleaners; polishes and anti-tarnish products; air fresheners and carpet shampoos; prespotters; liquid dishwashing detergents; automotive appearance products such as cleaners; wax and polishes; liquid laundry products; package utility products such as premoistened sponges and mops; paint and coatings. Proxel CMC-E preserves and controls the growth of bacteria and fungi in adhesives; polymer emulsions and natural latex; surfactant solutions; mineral and pigment slurries and dispersions; water-based building compounds, caulks and sealants; pesticides for non-food applications, including fungicides, herbicides, insecticides, repellants and biocides.

Add 0.5 to 4.0 lbs Proxel CMC-E (227 - 1814 g) to each 1000 lbs (453.6 kg) of product to be treated to provide 8 - 63 ppm active isothiazolones. To ensure uniform distribution, slowly dispense Proxel CMC-E into product with agitation. Mix thoroughly until evenly dispersed throughout product.

FOR HELP IN A CHEMICAL EMERGENCY CALL CHEMTREC 800-424-9300. BEFORE USING
METALWORKING FLUID PRESERVATION

Proxel CM-E is used for the control of bacteria and fungi in soluble and emulsifiable-type aqueous metalworking fluids.

For the maintenance of a non-fouled system, use Proxel CM-E at 33 fl. ounces (2.2 lbs.) per 1000 gallons of emulsion every 4 weeks or 33 - 141 fl. ounces (2.2 - 9.5 lbs.) per 1000 gallons of emulsion every 6 - 12 weeks.

For a noticeably fouled system, use an initial dose of 66 - 141 fl. ounces (4.5 - 9.5 lbs.) per 1000 gallons of emulsion to be followed by subsequent maintenance dosages depending upon the treatment interval noted above. A higher dosage and/or increased frequency of treatment may be required depending upon the rate of dilution of the preservative with make-up fluid, the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc.

Proxel CM-E must be dispersed into the use-solution of the metalworking fluid using a metering pump and uniformly dispersed throughout the system.

METAL CLEANING FLUID PRESERVATION

Proxel CM-E is used as a preservative for use in the manufacture and use of alkaline, acid and emulsion-based metal cleaning fluids typically prepared by electroplating, phosphating, galvanizing and general metal cleaning operations.

For addition to a metal cleaning concentrate, add Proxel CM-E at a level to ensure that the final use-dilution fluid will contain 420 - 1670 ppm product (8.25 - 25 ppm active isothiazolones).

For direct addition to a fouled system, add 52.5 - 210 fl. ounces (3.6 - 14.4 lbs.) of Proxel CM-E to each 1000 gallons of use-dilution metal cleaning fluid every 3 to 4 weeks to provide 420 - 1670 ppm product (8.25 - 25 ppm active isothiazolones). A higher dosage range and/or increased frequency of treatment may be required depending upon the rate of dilution of the preservative with make-up fluid, the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc.

Proxel CM-E must be dispersed into the use-dilution of the metal cleaning fluid using a metering pump and uniformly dispersed throughout the system.

WATER-BASED HYDRAULIC FLUID PRESERVATION

Proxel CM-E is used as a preservative for use in the manufacture and use of high water-based hydraulic fluids and invert emulsion hydraulic fluids typically prepared by emulsifying 40% by volume water in 60% by volume of mineral oil using an oil soluble emulsifying agent.

For maintenance of a non-fouled system, use Proxel CM-E at 108 - 133 fl. ounces (7.3 - 9.0 lbs.) per 1000 gallons fluid every 8 weeks.

For a noticeably fouled system use an initial dose of 133 - 224 fl. ounces (9.0 - 15.1 lbs.) per 1000 gallons fluid followed by subsequent maintenance dosage. A higher dosage range and/or increased frequency of treatment may be required depending upon the rate of dilution of the preservative with make-up fluid, the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc.

Proxel CM-E must be dispersed into the use-dilution of the hydraulic fluid using a metering pump and uniformly dispersed throughout the system.

INDUSTRIAL PROCESS WATER SYSTEMS:

Proxel CM-E is used as a preservative for the control of bacteria and fungi in pretreatment systems and process waters used for washing metal or plastic parts and/or paint reduction. Add Proxel CM-E to some other point in the system to insure uniform mixing. Badly fouled systems must be pre-cleaned before treatment is begun.

INITIAL DOSE: When the system is noticeably fouled, add 2.45 to 7.45 lbs. (37 to 113 fl. ounces) of Proxel CM-E to each 1000 gallons of water in the system. Repeat until control is achieved.

SUBSEQUENT DOSE: When microbial control is evident, add 1.25 to 1.86 lbs. (19 to 28 fl. ounces) of Proxel CM-E to each 1000 gallons of water in the system weekly or as needed to maintain control.

NOTE: Regardless of the manner of incorporation the total active ingredient level in the system must not exceed 35 ppm (equivalent to 233 ppm Proxel CM-E or 23 gallons per 10,000 gallons system fluid).
