DO NOT enter water until free available chlorine reading is below 5 ppm (mg/L), combined chlorine is below 0.5 ppm (mg/L) and the water is restored to its normal clarity.

Water may become turbid immediately following shock treatment. If this occurs, use proper treatment procedures to obtain clear water.

When the total dissolved solids (TDS) reaches 2000 ppm (mg/L) or whatever water temperature becomes difficult to maintain, drain the water and add from 100 to 200 pounds of sodium thiosulfate (CaSO3•H2O) for each 1000 gallons (L) of water. Contact your local water authority for details.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.

STORAGE: Keep material dry and in a covered area. Store in original container containing intact label.

PESTICIDE DISPOSAL: Pesticides are toxic. Improper disposal of excess pesticide, solvents, surfactants, alkalis, or activators may be a violation of Federal Law. If you are disposing of excess material, contact your State or Federal Environmental Protection Agency for information on proper disposal methods. Do not apply to or allow to contact any crops which have been rained on within 5 days of application.

CONTAINER DISPOSAL: PLASTIC CONTAINER WITH LINER: Disposable Liner: On use waste or refill this container. Completely empty by pouring into a sep. drain and bottom into loose material. Empty container also includes a plastic bag to be disposed of in a sanitary landfill or by incineration. For other containers, consult the container manufacturer or the local authority (with or without exception). Before disassembling the container or before disposing of the container, consult your authorized dealer or the manufacturer of the container. Refer to the manufacturer's instructions for proper disposal.

PLASTIC CONTAINER WITHOUT LINER: Inertible Container: Do not reuse as refill container. Completely empty by pouring into a separate drain and bottom into loose material. Empty container also includes a plastic bag to be disposed of in a sanitary landfill or by incineration. For other containers, consult the container manufacturer or the local authority (with or without exception). Before disassembling the container or before disposing of the container, consult your authorized dealer or the manufacturer of the container. Refer to the manufacturer's instructions for proper disposal.
