PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS:

DANGER. THIS FUMIGANT IS A HIGHLY HAZARDOUS MATERIAL AND MUST BE HANDLED WITH CARE ONLY BY CERTIFIED APPLICATORS OR PERSONS UNDER THEIR DIRECT SUPERVISION.

Do not apply this product in a way that will contact workers or other persons, including pets, or otherwise than in accordance with the label directions. Operators or handlers of this product must not be present at the time of application. Operators or handlers shall be adequately protected from the effects of this product.

It is a violation of Federal Law to use this product in any manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, including pets, as defined in the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. § 136). The label directions shall be followed. Do not use this product in agricultural uses not listed on the label.

PRECAUTIONARY STATEMENTS

Environmental Hazards:

This product is toxic to mammals and birds. Do not apply directly to water or to areas where surface water is present or where runoff may be a concern. Do not enter fumigated areas until vapors are down to safe levels. Excess application may cause injury to workers. It is a violation of Federal Law to use this product in any manner inconsistent with its labeling.

Toxicological Hazards:

Chloropicrin is a volatile liquid that is the active ingredient in tear gas. As a gas it is a powerful lachrymator. Early symptoms of overexposure are tearing, respiratory distress, and vomiting. Pulmonary edema may develop later. Treatment is symptomatic.

Ensure proper ventilation of fumigated areas. Do not enter fumigated areas until vapors are down to safe levels.

Personal Protective Equipment (PPE):

No single material that is chemical-resistant to this product is listed. For more options, follow the instructions for use under the heading "Manufacturer’s Precautionary Statements" in the Directions for Use section for information about this standard.

RESPECTED USE PESTICIDE

For retail sale to and use by certified applicators or persons under their direct supervision and only for those uses covered by the certifying applicator’s certification.

Restrict use to certified applicators or persons under their direct supervision who are familiar with the product and its label. Do not mix or dilute.

Pic Plus Fumigant

ACTIVE INGREDIENT:.................................................................................................................................

*Contains petroleum distillates.

OTHER INGREDIENTS:.................................................................................................................................

TOTAL:...........................................................................................................................................................

NOTE: See label booklet for complete Directions for Use.

USER SAFETY REQUIREMENTS

To clean the container before final disposal, remove any remaining liquid from the container, using dry air if necessary. Allow the container to dry completely and have it properly rinsed, disassembled, and punctured in accordance with the instructions for use. Dispose of the punctured container in accordance with local or national regulations.

NOTE TO PHYSICIAN

This product is toxic to mammals and birds. Do not apply directly to water or to areas where surface water is present or where runoff may be a concern. Do not enter fumigated areas until vapors are down to safe levels. Excess application may cause injury to workers. It is a violation of Federal Law to use this product in any manner inconsistent with its labeling.
