**APPLICATION INSTRUCTIONS**

To Control and Kill Ants (except fire ants), Cockroaches, Crickets, Male Crickets, Snails and Bugs on Campgrounds, Cemeteries, Greens of Golf Courses, Home Lawns, Lawns, Ornamental Turf, Parks, Picnic Areas, Planting Beds and Recreational Turf: Apply bait evenly to infested areas at the rate of 143 ounces or 3 oz cup per 100 square feet. Where feeding for male crickets: Thoroughly irrigate treatment areas in the late afternoon prior to application. For maximum effectiveness, do not irrigate treated areas immediately after application.

Exterior Baiting to Control and Kill Ants (except fire ants), Including Carpenter Ants, Around Apartment Buildings, Commercial Ornamental Nurseries, Food Processing Plants, Garages, Houses, Hospitals, Hotels, Kennels, Motels, Pet Stores, Public & Private Institutions, Recreational Vehicles, Restaurants, Schools, Supermarkets, Warehouses and Other Structures: Treat exterior around areas of structure in a band 2 to 4 feet wide at a rate of 6 ounces per 100 square feet. Also apply in a 3 to 4 foot band around all trees, stumps, firewood piles and other locations where carpenter ants may nest. If the nest is located in a hollow tree or stump, apply 1 to 2 oz of this product directly into the cavity. Also apply along walls and in areas where ant activity has been noted.

To Control and Kill Ants (except fire ants), Cockroaches, Crickets, Earwigs and Silvershine and Warehouses: Apply at a rate of 8 ounces or 1 to 2 cups per 100 square feet of surface area. Spread evenly in crawl spaces, attics, door corners and out on dirt or gravel ground. Concentrate application in areas where insects are most prevalent. Do not allow to remain in areas and access doors. In warehouses, garages and basements, concentrate application along walls and baseboards. This product may also be applied in inaccessible areas such as cracks and crevices where insects may hide. Apply in areas of shrubbery, dandelions and trash cans and shovels. Apply under and behind porches and bases in storehouses. Bat may also be placed in bat boxes in areas accessible to insects but inaccessible to children and pets. Always record the location and number of bat stations. Regularly inspect bat boxes and replace bat as needed. In stores, apply along ledges and around machinery conveyors. Treat exterior perimeter building walls in a band approximately 2 to 3 feet wide and scatter bait in flower beds, leach, wood piles, trash cans and refuse areas. Resupply as necessary.

For treating new construction: Apply in wall voids and other areas where insects may hide.

For perimeter treatments: Spread bait at a rate of 6 ounces or 1 to 2 cups per 100 square feet in a band at least 2 feet wide around foundations, patios, driveways, sidewalks, entrances to homes and buildings, or other areas where insects are present. Apply around landscape lighting, light fixtures, street lamps or other exterior fixtures and scatter bait in flower beds, leach, wood piles, trash cans and refuse areas. Resupply as necessary.

For treating ants around bases: Apply 1 to 2 ounces of this product around all Antarctica. Supplement by broadcast application in immediate areas and along wall spaces and in areas where ant activity has been noted.

To Control and Kill Ants (except fire ants), Cockroaches, Crickets, Earwigs and Silvershine in Aircraft, Apartment Buildings, Apartments, Basements, Camps, Factories, Food Handling Establishments, Food Processing Plants, Garages, Grocery Stores, Houses, Hospitals, Hotels, Industrial Plants, Kennels, Libraries, Markets, Military Bases, Mobile Homes, Motels, New Construction, Warehouses, Officers, Pet Stores, Private & Public Institutions, Recreational Vehicles, Restaurants, Schools, Sewers, Sheds, Supermarkets, Theaters, Trains, Trucks, Utility Warehouses, Tracts and Zoos: Food area application limited to only crack and

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

**NON-AGRICULTURAL USE REQUIREMENTS**

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticide (40 CFR Part 170). The Worker Protection Standard applies when this product is used to produce agricultural plants on farms, forests, nurseries or in greenhouses.

**GENERAL INFORMATION**

This product is a ready-to-use, weather-resistant bait that controls and kills ants (except fire ants), cockroaches, crickets, earwigs, silvershine, moths and bees, specifically: Ants: Argentine, Carpenter, Field, Pharaoh, Little Black, Pavement, German House and Griss Ants. Cockroaches: American, Brown, Brown Bandan, Stricky Brown, Common and Oriental Cockroaches. Crickets: Darrell, House, Field and Male Crickets. Snails and Bugs: European Earwigs. Do not contaminate this product with other pesticides. If this product becomes contaminated with another pesticide it will lose its effectiveness. Do not apply directly to food and avoid contamination of food and food contact surfaces. In commercial food handling facilities, cover or remove any food during application. In food handling areas and other areas, bait may be placed in bait stations. Always record the number and location of bait stations. This product is designed to be used as a residual treatment in an Integrated Pest Management program incorporating good sanitation practices. Keep children and pets out of treated areas until application has been completed. Cover treats pets with this product. Avoid over-application around ornamental plants and fish ponds. Do not apply this product in combination with fertilizers, other pesticides or other biologically-active materials.
crevice treatment. Apply only in areas inaccessible to children and pets. Avoid contamination of food and foodstuffs. Apply directly, scattering under refrigerator, cooker, stove, sink, dishwasher, washing machine and dryer hubs, counters, soil openings around drains, water pipes and electrical conduits, and in cracks and crevices along basements and corners of cabinets, container tops, cupboards and closets. Remove all lower drawers in kitchen and bathroom cabinets, bedroom drawers, and cabinets. Scrape liberally in drawer walls. Bait shall also be applied into and around areas of food contamination of above-ground transformers, in-ground utility boxes, pedestal boxes and vending machines. Any bait visible after application must be removed into cracks and crevices or removed. Regularly inspect bait stations and replace as needed.

To Control and Kill Cockroaches, Crickets, Ants, Earwigs and Silverfish in Federally-inspected (USDA) meat and poultry plants: For application only in inaccessible product areas and non-processing areas in a crack and crevice treatment. Apply liberally to cracks and crevices in areas such as around hoodrooms and cabinets, beneath cabinets and appliances, in and around waste containers and in openings around doors, water pipes and electrical conduits. Avoid contamination of feed and food stuffs. Bait libraries may be used. Always record the number and location of bait stations. Regularly inspect bait stations and replace bait as needed. This product is best used as a supplemental residual treatment preceded by approved spray and good sanitation practices.

Exterior Baits to Control and Kill Snails and Slugs in Commercial Ornamental Nurseries, Flower Gardens and Around Ornamentals, Greenhouses and Sunrooms: At the beginning of the spring planting season (before damage occurs), broadcast 6 ounces per 100 square feet in areas likely to be infested with snails and slugs. It is best to apply the bait during early evening or evening when snails and slugs are present and eating. Reapply every four weeks for satisfactory control.

PRECAUTIONARY STATEMENTS
Hazards to Humans & Domestic Animals
CAUTION: Harmful if swallowed. Causes moderate irritation. Avoid contact with skin, eyes or clothing.

Personal Protective Equipment (PPE)
Applicators and handlers must wear: Long-sleeved shirt and long pants; waterproof shoes and sturdy play gloves. Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables are given, use detergent and hot water.

Engineering Control Statement
When handlers use closed systems or encased baits in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides (40 CFR 190.64(b)(4)-(6)), the handler PPE requirements may be reduced or eliminated as specified in the WPS.

User Safety Recommendations
Users should:
• Wash hands before eating, drinking, chewing gum, smoking tobacco or using the toilet.
• Remove clothing immediately if pesticide gets inside;
• Thoroughly wash and put on clean clothing.
• Immediately remove PPE after handling this product.
• Wash the outside of gloves before removing. As soon as possible, thoroughly wash and rinse into clean outdoors.

Environmental Hazards
Do not apply directly to water, to areas where surface water is present or to irrigated areas below the mean high-water mark. Do not contaminate water when disposing of equipment or waste materials.

WARRANTY
To the extent not prohibited by applicable law, Manufacturer warrants that the product conforms to its chemical description and shall be identical to the label and is reasonably fit for the purpose intended for the class of product in which the product has been used in accordance with the directions, subject to the inherent risks set forth below. To the extent not prohibited by applicable law, MANUFACTURER MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR ANY OTHER EXPRESS OR IMPLIED WARRANTY.
