ENVIRONMENTAL HAZARDS

This product has low solubility in water. At the limits of solubility, this product is not toxic to fish. However, at concentrations above the level of water solubility, it may be toxic to fish. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Drain and runoff from treated areas may be hazardous to aquatic organisms in adjacent sites. Do not contaminate water when disposing of equipment washwaters. If material is spilled: Contain and sweep up material of spill for disposal or use per label instructions. Wash cleanup equipment to prevent contamination elsewhere. Excess quantities above normal application rates could result in damage to plants subject to spill. Water-in-ground, disc under, cover with layer of soil, or leave exposed to sunlight, as deemed appropriate to the situation.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. STORAGE: Store in original container away from other fertilizer, feed, or food stuffs and separated from other pesticides.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Completely empty bag into application equipment by shaking and tapping sides and bottom to loosen clinging particles. Offer for recycling if available or dispose of empty bag in a sanitary landfill or by incineration. Do not burn, unless allowed by state and local ordinances.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This product is a selective preemergence herbicide that provides residual control of many grass and broadleaf weeds in: • established turf grasses (excluding golf course putting greens) and lawns • landscape ornamentals (including established perennials & woodland plantings) • Covers up to 16,390 square feet

KEEP OUT OF REACH OF CHILDREN

CAUTION

See the following section, Precautionary Statements, Hazards To Humans and Domestic Animals, for additional information.

ACKNOWLEDGMENT

Thank you for choosing Crabgrass Preventer with eVade® for your crabgrass control. We hope your lawn is healthier and more beautiful than ever!

EPA Reg. No. 34704-776

If Inhaled

Remove from exposure and bring the affected person to fresh air. In case of suspicion of NOX inhalation, call your physician immediately.

If swallowed

Immediately call a poison control center or doctor for treatment advice.

If on skin or clothing

Remove contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

If on eyes

Hold eye open and rinse slowly and gently with water for 15-20 minutes.

If on skin

Hold open bag and rinse skin immediately with plenty of water for 15-20 minutes.

If inhaled

In case of NOX inhalation, call your physician immediately.

If swallowed

Hold open bag and rinse skin immediately with plenty of water for 15-20 minutes.

If on skin

Remove contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

If swallowed

Rinse skin immediately with plenty of water for 15-20 minutes.

If inhaled

If on eyes

Hold eye open and rinse slowly and gently with water for 15-20 minutes.

If swallowed

Hold open bag and rinse skin immediately with plenty of water for 15-20 minutes.

If on skin

Hold open bag and rinse skin immediately with plenty of water for 15-20 minutes.

If inhaled

In case of NOX inhalation, call your physician immediately.

**Use Rates**

Apply this product at 175 to 400 lbs/A in fall and/or spring. Use higher rates of application for longer control periods. Sequential or single applications are allowed so long as the total amount of product applied does not exceed the maximum annual application rate of 400 lbs/A.

**Application Timing and Information**

This product is a preemergence herbicide and will not control emerged weeds. Most effective weed control in ornamentals will be obtained when this product is activated by at least 0.5 inches of rainfall or irrigation, or with shallow (1 to 2 inches) mechanical incorporation, prior to weed seed germination and within 24 days following application.

Best weed control is obtained when this product is applied to soil free of clods, weeds, and debris such as leaves. Prior to application of this product, control existing vegetation by hand weeding, cultivation, or the use of an appropriate postemergence herbicide.

**Established Landscape Ornamentals**

This product may be applied to established ornamentals as a broadcast, over the top or directed application. Irrigation or rainfall soon after application will wash residues of plant foliage and activate this product in the soil.

**Newly Transplanted Landscape Ornamentals**

This product may be applied to newly transplanted ornamentals as a broadcast, over the top or directed application. Delay application to allow soil to settle around new transplants and water thoroughly before applying this product. Apply this product after cuttings form roots and become established. Apply before budding/grafting or after cutting/staking to allow for root development.

**Conditions of Sale and Limitation of Warranty and Liability**

Do not use on food producing trees, vines, or plants. Do not use on container grown plants.

**SAFETY INFORMATION**

Read the entire Directions for Use and the following Conditions of Sale and Limitation of Warranty and Liability. By using or applying this product, the buyer or user accepts the following Conditions of Sale and Limitation of Warranty and Liability, which no employee or agent of LOVELAND PRODUCTS, INC. or the seller is authorized to vary in any way.

When using this product, follow all precautions and directions carefully in order to avoid injury, loss, or damage.

**Legal Disclaimers**

This product contains the active ingredient Dicamba. The use of this product may be restricted in certain states, and it is not registered for use on all crops. Check label for specific instructions and restrictions for your area.

**Contact Your Loveland Products Inc. Sales Representative or Local Agricultural Extension Agent for crabgrass germination dates information for your area.

**Use Precautions**

- This product may be applied after cuttings form roots and become established. Apply before budding/grafting or after cutting/staking to allow for root development.
- Newer Transplanted Landscape Ornamentals

**Maximum Annual Rates**

This product is recommended for use on the turf grass species listed in the following table. Do not exceed the maximum rate per calendar year by species limitations. 1) May be used on newly planted turf within 60 days after seeding by seed or after the second mowing, whichever is longer. Injury to desirable seedlings is likely if this product is applied before seedling secondary roots are in the second inch of soil, not thatch plus soil. Do not cut (harvest) treated sod before 120 days after application. Do not apply to overseeded turf within 60 days after seeding or until after the second mowing, whichever is longer. Injury to desirable seedlings is likely if this product is applied before seedling secondary roots are in the second inch of soil, not thatch plus soil. Do not apply this product to turf stressed by drought, low fertility, or pest damage may result in turf injury. Disturbing the herbicide barrier with cultural practices such as disking may result in reduced weed control. This product may not be applied to turfgrass areas or where dichondra, colonial bentgrass, velvet bentgrasses, crabgrass, bluegrass, and annual bluegrass (Poa annua) are desirable species.

**Rates of Application**

This product may be applied as a single application or in sequential applications to control weeds germinating throughout the year. All applications must be made prior to germination of the target weeds. This product will not control established weeds.

Maximum use rate selection should be based on turf species. The length of time that residual weed control is provided by this product is related to the rate applied.
