DIRECTIONS FOR USE:
KAPOW! may be sprayed on foliage to combat mites, thrips, aphids, whiteflies, eggs including mites along with molds, mildew and most leaf dwelling insects. It is safe to use up until the day of harvest. Do not use on food crops. For best results rinse with water in between uses. Allow KAPOW! 24 hours on the plant prior to rinse. Saturate the stem and the tops and bottoms of leaves starting at the bottom of the plant and working your way to the top. KAPOW! must be used between 38°F and 88°F. Use only as directed. Happy growing.

PH 6.4. We advise testing the PH of all ready-to-use products prior to use.

Shake vigorously prior to application. Do not dilute. Ready to use.

Store in original container in a dry place inaccessible to children and pets. Do not reuse empty containers. Recycle or discard in trash.
