DIRECTIONS FOR USE:
3-Way may be sprayed on foliage to combat mites, thrips, aphids, white flies, eggs including mites along with molds, mildews and most leaf dwelling insects. It is safe to use up until the day of harvest. For best results rinse with water in between uses. Allow 3-Way 24 hours on the plant prior to rinse. Saturate the stem and the tops and bottoms of leaves starting at the bottom of the plant and working your way to the top. For mite use only spray bottoms of leaves. 3-Way must be used between 30°F and 80°F. Use only as directed. Happy growing.
PH 6.4. We advise testing the PH of all ready-to-use products prior to use. Not for use on food crops. We suggest KAPOW in the late stages of flower and/or fruit.
Shake vigorously prior to application. Do not dilute. Ready to use.
Store in original container in a dry place inaccessible to children and pets. Do not reuse empty containers. Recycle or discard in trash.

25b Compliant

Active Ingredients:
- Lemon Grass Oil: 46.4%
- Castor Oil: 25.0%

Inactive Ingredients:
- Fish Oil: 11.8%
- Soap: 2.0%
- (Neutralization of Fatty Acid)
- Water: 97.167%
