PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER: EXTREMELY HAZARDOUS LIQUID AND VAPOR UNDER PRESSURE. FATAL IF INHALED OR INGESTED. COUSIOUS. CAUSES SKIN BURNS AND IRREVERSIBLE EYE DAMAGE. WHICH MAY HAVE A DELAYED ONSET. DO NOT BREATHE VAPOR OR GAS. INHALEATION MAY CAUSE SERIOUS ACUTE ILLNESS OF DELAYED LUNG, NERVE, OR BRAIN INJURY. DO NOT GET IN EYES, ON SKIN OR IN CLOTHING.

NOTE: CHLOROPPENN MAY BE IRRITATING TO THE UPPER RESPIRATORY TRACT AND EVEN AT LOW LEVELS CAN CAUSE PAINFUL IRRITATION TO THE EYES, PRODUCING TEARING. IF THESE SYMPTOMS OCCUR, LEAVE THE FUMIGATION AREA IMMEDIATELY.

PERSONAL PROTECTIVE EQUIPMENT (PPE)
Some materials that are chemical-resistant to this product are listed below. For more information, follow the instructions for Category II on the chemical-resistance category selection chart. PPE constructed of barrier, neoprene, and chlorinated polyethylene provide short-term splash protection against liquid in this product. Long-term protection is provided by PPE constructed of Viton, Teflon, and EN standard level (for example, Residenter or B-Ball) gloves manufactured by North. Where chemical-resistant materials are required, leather, canvas, or cotton materials offer no protection from this product and must not be worn as the sole article of protection when contact with this product is possible.

When performing tasks with 3D potential for contact with liquid fumigant, all handlers (including applicators) must:
- Wear long-sleeved shirt, long pants, shoes and socks.
- Not wear jewelry, goggles, tight clothing, chemical-resistant gloves, rubber protective clothing, or rubber boots when handling. Metal bracelets can trap inside clothing and cause severe injury.
- Holders with no potential for contact with liquid fumigant (e.g., observers) may wear cotton, leather, or other non-chemical-resistant gloves. If such gloves are exposed to liquid fumigant, they must immediately be removed and discarded.

When performing tasks with potential for contact with liquid fumigant, all handlers (including applicators) must wear:
- Long-sleeved shirt and long pants.
- Chemical-resistant gloves.
- Chemical-resistant boots.
- Protective eyewear (Do not wear goggles), and
- Chemical-resistant coveralls.

In addition, when an air-supplying respirator is required under this label's Directions for Use, Protection for Handlers, Respiratory Protection and OSHA Respirator selection, handlers (including applicators) must wear:
- A NIOSH-certified 100% face-piece air-suppuling respirator with cartridge certified by the manufacturer for protection from exposure to methyl bromide at concentrations up to 5 ppm. (e.g., 3M 6000 Series Organic Vapor/Particle Cartridges).

IMPORTANT: A self-contained breathing apparatus (SCBA) is not permitted for routine handler tasks. Performing an emergency when corrolative action is needed to restore air concentrations to acceptable levels, wear an SCBA. Escape-only SCBA respirators must not be used by handlers for responding to emergencies. In addition wear PPE required for potential contact with liquid fumigant.

See label behind for additional Precautionary Statements.

NOTICE: Contains methyl bromide, a substance which harms public health and the environment by destroying ozone in the upper atmosphere.

REstricted USE PESTicide
Due to Acute Toxicity

MBC-33
Pre-Plan Soil Fumigant

KEEP OUT OF REACH OF CHILDREN
DANGER PELIGRO

POISON

If used as an analogous to aldrine, benalin a analogous person use or to allow a person in detail.

IF IN EYES:
- Hold eyes open and immediately gently with water for 15-20 minutes.
- Remove contact lenses. If present, after the first 5 minutes, then continue rinsing eyes.
- Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING:
- Wash skin immediately with plenty of water for 15-20 minutes.
- Shave skin immediately with plenty of water for 15-20 minutes.
- Remove any clothing and wash immediately with soap and water.
- Call a poison control center or doctor for treatment advice.

IF INHALED:
- Call a poison control center or doctor for further treatment advice.
- Have person sit in a chair and sit or lie down.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

FIRST AID

DIRECTIONS FOR USE
Restricted Use Pesticide

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply the product in a way that will contact workers or other persons, either directly or through drift. Only hand spray may be in the application vehicle from the start of the application until the entry restricted period ends, and in the buffer zone during the buffer zone period. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

Agricultural Use Requirements
Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR 190. Refer to label instructions under "Agricultural Use Requirements" in the Directions for Use section for information about this standard.

Storage and Disposal
DO NOT CONTAMINATE WATEBEFOOD OR FEED BY STORAGE OR DISPOSAL

Pesticide Storage: Store in dry, cool, well-ventilated area under lock and key. Place in a pesticide storage area.

Pesticide Disposal: Pesticide waste are toxic. Improper disposal of excess pesti-
nite dents, sprays, or sprays, or as a violation of Federal Law. If these wastes cannot be dispoisal of excess according to state/local regulations, contact your State Pesticide or Environmental Control Agency, or the U.S. Environmental Protection Agency's Office for Science and Technology. If a cylinder is partially full, there is no further requirement for the product, return the cylinder to the retailer or distributor. Replace safety cap and valve protection before shipping container.

Container Handling: Store cylinders upright, secured in a rack or cart to prevent tipping. Do not subject cylinders to rough handling or mechanical shock such as dropping, bumping, dragging, or lifting. Do not use loose hose, rings, loops, or similar couriers or unlabeled cylinders. Transport cylinders using long truck, fork truck, or other device to which the cylinder can be firmly secured. Do not remove valve protection function and safety cap until immediately before use. Replace safety cap and valve protection before cylinder is not in use.

Return of Containers: Cylinders are the property of the registered or distributor and must be returned promptly and delivered. Do not strip cylinders without safety caps or valve protection function.

Replaceable Container: Only the registered or distributor is allowed to refill this contain-
er. This container can be refilled with pesticide only. Do not reuse this container for any other purpose. Cleaning the container before disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the retailer.

Container Disposal: To clean the container before final disposal, remove any remaining liquid from the container, using dry air pressure if necessary. Allow container to eject for at least 5 days. After evaporation, wash container using hot water, then offer container to qualified reconditioner or disposal as directed by State or Federal regulations.

See label behind for complete Directions for Use.

Note to Physician:

Early symptoms of overexposure to methyl bromide are asthenia, headache, nausea, vomiting, weakness, and collapse. Long-term effects may develop over 2 to 4 days after exposure, accompanied by cardiac irregularities; these effects are the usual cause of death. Reported overexposure can result in blunted vision, staggering gait, and mental instability, with probable recovery after a period of no exposure. Blood bromide levels suggest the occurrence, but not the degree, of exposure. Treatment is symptomatic.
