Plant Growth Regulator for Turf Growth Management

A microemulsion concentrate for managing growth, improving quality, and stress tolerance and edging of warm- and cool-season turfgrasses

ACTIVE INGREDIENT:
Trinexapac-ethyl
(CAS No.: 95266-40-3) ....11.3%
OTHER INGREDIENTS: ...88.7%
TOTAL: .................100.0%

1 fl. oz. contains or equals 0.0079 lb. trinexapac-ethyl or 1.0137 lbs./gal.

EPA Reg. No.: 86064-3
EPA Est. No. 34704-MS-002

KEEP OUT OF REACH OF CHILDREN

CAUTION

Manufactured for:
United Turf Alliance, LLC
8014 Cumming Highway,
Suite 403-282
Canton, GA 30115

First Aid

If on skin or clothing:
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

If in eyes:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

If swallowed:
• Call a poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by a poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

If inhaled:
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth if possible.
• Call a poison control center or doctor for further treatment advice.

HOT LINE NUMBER

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For emergency information call Poison Control at 1-800-222-1222 or the National Pesticide Information Center (NPIC) at 1-800-858-7378.

NOTE TO PHYSICIAN

If a large amount has been ingested, lavage stomach. An aqueous suspension of activated charcoal can be given to absorb remaining toxicant. Treat symptomatically.

See inside label booklet for additional PRECAUTIONARY STATEMENTS

Net Contents: 2.5 gallons (9.46 liters)

United Turf Alliance
PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION
Harmful if absorbed through skin, swallowed or inhaled. Causes moderate eye irritation. Avoid breathing vapor or spray mist. Avoid contact with skin, eyes or clothing.

ENVIRONMENTAL HAZARDS
Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater. Do not apply when weather conditions favor drift from treated areas.

PERSONAL PROTECTIVE EQUIPMENT (PPE)
Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for Category C on an EPA chemical resistance category selection chart.

Applicators and other handlers must wear:
• Long-sleeved shirt and long pants
• Chemical-resistant gloves (such as nitrile, butyl, neoprene, or barrier laminate)
• Shoes plus socks

Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them. Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

Engineering Control Statements
When handlers use closed systems or enclosed cabs in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240 (d)(4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

USER SAFETY RECOMMENDATIONS
Users should:
• Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
• Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

Observe all precautions and limitations on this label and on the labels of each product used in tank mixture with this product.

FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THIS LABEL MAY RESULT IN UNEVEN GROWTH REDUCTION OR SEVERELY STUNTED TURF.
GENERAL INFORMATION

ArmorTech PGR 113 MC is a microemulsion concentrate (MEC) for management of the growth of warm- and cold-season turfgrasses, reducing the frequency of mowing and the amount of grass clippings generated. Applications of ArmorTech PGR 113 MC also frequently result in increased turf density, increased color, and increased turf quality.

Apply ArmorTech PGR 113 MC to turfgrass areas such as residential and commercial lawns, golf courses, sod farms, sports fields, cemeteries and other similar areas that are well-maintained. ArmorTech PGR 113 MC is useful in the management of difficult-to-mow areas and can be used to minimize the need for edging turfgrass along sidewalks, curbs, parking lots, driveways, flower beds, fences and around posts, storage sheds, and trees.

ArmorTech PGR 113 MC is absorbed by foliar uptake and is rainfast after one hour. Watering-in is not necessary for activation. Environmental conditions, management and cultural practices that affect turf growth and vigor will influence the response of the turf to ArmorTech PGR 113 MC applications. Fertility level, moisture availability, plant vigor, height and frequency of mowing, etc. have all been shown to influence the activity of ArmorTech PGR 113 MC. Full growth regulation by ArmorTech PGR 113 MC begins at about 3 to 5 days after application.

Notice to User: Plant tolerances to ArmorTech PGR 113 MC have been found to be acceptable for the grasses listed on this label; however, due to the large number of species and cultivars of grasses it is impossible to test every one for tolerance to ArmorTech PGR 113 MC. Neither the manufacturer nor the seller has determined whether or not ArmorTech PGR 113 MC can be used safely on grasses not specified on this label and professional users should first determine if ArmorTech PGR 113 MC can be safely applied prior to commercial use by testing on a small scale by applying the lower recommended rate for the turf setting (lawn, fairway, etc.) and evaluating for phytotoxicity and growth inhibition prior to widespread use.

NOTE: ArmorTech PGR 113 MC is not registered for use in the commercial production of plants in the state of Arizona, such as sod farms.
USE PRECAUTIONS

• Do NOT apply ArmorTech PGR 113 MC through any type of irrigation system.
• Do NOT graze treated areas or feed treated clippings to livestock.
• Areas treated with ArmorTech PGR 113 MC should continue to receive regular maintenance practices, including irrigation; fertilization; and weed, disease, and insect control when necessary and as recommended for quality turf.
• Because some herbicides can injure turf, tank mixes with ArmorTech PGR 113 MC should be tested on a small scale before widespread use.
• ArmorTech PGR 113 MC may cause temporary yellowing that usually disappears approximately one week after application. To minimize yellowing and to enhance the green color of turf, apply readily available nitrogen at a rate of 0.2 to 0.5 lb. of actual nitrogen per 1,000 sq. ft. If desired, recommended rates of iron per 1,000 sq. ft. can also be used.

APPLICATION INSTRUCTIONS

Excessive turf growth during spring flushes or as a result of fertilization may require higher rates of ArmorTech PGR 113 MC (up to 50% greater) to provide an adequate length of control.

For extended growth suppression (up to 8 weeks) when temporary discoloration can be tolerated, a maximum of twice the recommended rate of ArmorTech PGR 113 MC from the Application Rate Table may be applied.

ArmorTech PGR 113 MC use rates may need to be reduced up to 50% for turfgrass grown under conditions of low fertility, compaction, or other factors, which stress the turf.

Multiple applications of ArmorTech PGR 113 MC can be made each growing season, but do not exceed a total of 7.0 fl. oz./1,000 sq. ft. (305 fl. oz./A; 19.0 pts./A) per year.

Mowing

ArmorTech PGR 113 MC generally provides greater suppression when turfgrasses are maintained at lower mowing heights and the application rates in this label have been selected for typical mowing heights; be sure to adjust the application rate based on the actual mowing conditions under which ArmorTech PGR 113 MC will be applied. To minimize possible turf injury, apply ArmorTech PGR 113 MC at least 4 hours before mowing or 1 hour after mowing.

Application Timing

Apply ArmorTech PGR 113 MC to actively-growing turf. A lower rate of ArmorTech PGR 113 MC should be used if turf is going into dormancy because of high or low temperatures or lack of moisture.

As soon as the turf resumes growth or if more suppression is desired, repeat applications of ArmorTech PGR 113 MC may be made, but do NOT apply more than 7.0 fl. oz./1000 sq. ft. per year.

Equipment

ArmorTech PGR 113 MC may be applied using backpack sprayers, hand sprayers, boom sprayers, and with spray gun application devices. Be sure to clean the spray equipment thoroughly before use and make sure the sprayer is calibrated and capable of accurate and uniform application. Rinse sprayer with clean water after use and dispose of rinsate in an approved manner.

MIXING AND APPLICATION INSTRUCTIONS

ArmorTech PGR 113 MC mixes completely with water (does not contain any petroleum solvents) and may be tank mixed with many commonly – used pesticides and liquid fertilizers. Prepare no more mixture than is necessary for the immediate operation in sufficient carrier (for example 0.5 to 4.0 gals. of water per 1,000 sq. ft.) to provide uniform and thorough coverage.
Once ArmorTech PGR 113 MC is uniformly mixed, no further agitation is required when the product is used alone, but agitation may be required for tank mixes. If using ArmorTech PGR 113 MC in a tank mixture, be sure to observe all directions for use, sites, use rate dilution ratios, precautions, and limitations, which appear on the tank-mix product's label(s). **Do not** exceed any label use rate and follow the most restrictive label precautions and limitations and do **not** mix ArmorTech PGR 113 MC with any product which prohibits such mixing.

**Backpack and Hand Sprayers (0.5 to 4.0 gal. capacity)**
Add all of the required water to the mix tank followed by the appropriate amount of ArmorTech PGR 113 MC. Close the sprayer and vigorously shake. Begin application.

**Boom and Hand Gun Sprayers**

**ArmorTech PGR 113 MC Alone:** Add all the required amount of water to the spray tank. Then, while agitating, add ArmorTech PGR 113 MC.

**ArmorTech PGR 113 MC in Tank Mixtures:** When mixing ArmorTech PGR 113 MC with other carrier and/or tank mix pesticide products, add the products to the spray tank using the following procedure:

1. Always check the compatibility of the tank mix using a jar test with proportionate amounts of ArmorTech PGR 113 MC, other products to be used, and the water before mixing in the spray tank. Use a clear glass quart jar with lid and mix the tank mix ingredients in their relative proportions. Invert the jar containing the mixture several times and observe the mixture for approximately 1/2 hour. If the mixture balls-up or forms flakes, sludges, gels, oily films or layers; or precipitates, it is not compatible and **do not** use the combination in a tank mix.
2. Fill tank at least 1/2 full of water.
3. Maintain sufficient agitation during filling to keep the tank mix uniformly suspended.
4. Add all products packaged in water-soluble bags first. Allow the packages to dissolve and the contents to completely disperse into the mix water. Then add water-dispersible granules (WG formulations) while maintaining agitation in the mix tank. Next add wettable powders (WP formulations). Allow the products to disperse completely before the other products are added.
5. Add emulsifiable concentrates (EC).
6. Add flowable liquids (FL) or suspension concentrates (SC).
7. Add ArmorTech PGR 113 MC.
8. Add spray adjuvant and spray markers. Use surfactants approved for application to turf. Check surfactant label before use.
9. Add the remainder of the water.
10. **Do not** leave tank mix combinations in the spray tank for prolonged periods without agitation. Mix and apply all of the spray solution on the same day.

**Application Near and Around Monuments and Hardscape Materials**
At normal dilution rates, ArmorTech PGR 113 MC will not stain brass, bronze, concrete, marble, granite, or other types of stone. Prior to using ArmorTech PGR 113 MC around other materials, test on a small scale basis first.

**Turf Pre-Stress Conditioning**
Multiple ArmorTech PGR 113 MC applications, in conjunction with cultural practices such as fertilization, irrigation, drainage and mowing height will delay the onset of stress, improve stress survival, and enhance turf’s recovery from stress. Apply ArmorTech PGR 113 MC to healthy, actively growing turf before the onset of stress and continue to apply ArmorTech PGR 113 MC throughout the growing season as long as the turf remains healthy. **NOTE:** Do **NOT** apply more than 7.0 fl. oz/1,000 sq. ft. per year.
When turf top growth slows, energy is redirected to below-ground plant parts, and root and rhizome production increases resulting in root-mass that is often greater in ArmorTech PGR 113 MC treated turf than in similar, untreated turf.

Research indicates that ArmorTech PGR 113 MC may also enhance the performance of fungicides. Monthly applications of ArmorTech PGR 113 MC at the label rate or biweekly application at 1/2 the label rate may strengthen the turfgrass to help it resist disease. Additionally, if mowing is less frequent, and leaf material removal is reduced, contact and systemic products will remain at effective concentrations on or in the turf longer.

Multiple ArmorTech PGR 113 MC applications of will result in smaller, more compact turfgrass and reduced leaf area, resulting in reduced transpiration, water use and improved drought tolerance. Increased turf density will also reduce moisture loss from soil evaporation, and additional soil moisture will be available due to increased root depth and mass. ArmorTech PGR 113 MC may also enhance cold and heat tolerance by increasing carbohydrate levels.

**POA ANNUA CONVERSION/RENOVATION**

As part of an overseeding / renovation program allowing better germination and seedling growth of more desirable turf, ArmorTech PGR 113 MC may be applied to existing turf infested with stands of *Poa annua*. By combining ArmorTech PGR 113 MC with appropriate cultural practices that help to ensure the vigor and growth of new seedlings, fewer clippings and reduced maintenance traffic on new seedlings will result. Additionally, seed germination is not affected because ArmorTech PGR 113 MC is absorbed foliarly. **NOTE:** Aggressive application rates of ArmorTech PGR 113 MC may result in temporary initial discoloration.

Apply ArmorTech PGR 113 MC 1 to 5 days before seeding and before verticutting, scalping, spiking or other similar operations. The following spring, apply the recommended upper end rate of ArmorTech PGR 113 MC for the turf type and setting listed in the Application Rate Table. Actual conversion success will also depend on growing conditions, fertilization, rainfall, and other agronomic and environmental conditions.

**BERMUDAGRASS OVERSEEDING**

Establishment of cool-season turfgrasses can be enhanced by applying ArmorTech PGR 113 MC to bermudagrass. By combining ArmorTech PGR 113 MC with appropriate cultural practices that help to ensure the vigor and growth of new seedlings, fewer clippings and reduced maintenance traffic on new seedlings will result. Additionally, seed germination is not affected because ArmorTech PGR 113 MC is absorbed foliarly. **NOTE:** Aggressive application rates of ArmorTech PGR 113 MC may result in temporary initial discoloration.

Apply ArmorTech PGR 113 MC to the bermudagrass 1 to 5 days before seeding or before verticutting, scalping, spiking, or other similar operations. For maintenance applications, see the Application Rate Table. Use normal seeding rates for your area and turf setting (lawn, fairway, etc.). Actual overseeding results will also depend on growing conditions, fertilization, rainfall, and other agronomic and environmental conditions.

**APPLICATION WITH TURF MARKING PAINT**

When applied before or with marking agents, ArmorTech PGR 113 MC can extend the duration of marking visibility. When combining with latex-based marking agents, mix ArmorTech PGR 113 MC with water first and refer to the marking agent's products label for further instructions.

To treat approximately 1,000 sq. ft. of line surface area, apply ArmorTech PGR 113 MC at 1 oz./gal of marking paint mix. Refer to the ArmorTech PGR 113 MC plus Tank Mixtures section of this label for additional instructions.
Table 1. Recommended ArmorTech PGR 113 MC Application Rates¹

NOTE: The rates recommended below should provide 50% suppression of turf growth with minimal yellowing for 4-weeks under good growing conditions.

</table>
1. Seedheads: At rates equal to or higher than the rates in Table 1, ArmorTech PGR 113 MC provides seedhead suppression of hybrid bermudagrass, and partial seedhead suppression of annual bluegrass, bahiagrass, buffalograss, carpetgrass, common bermudagrass, Kentucky bluegrass, and tall fescue. ArmorTech PGR 113 MC must be applied prior to seedhead formation. Do not apply more than 7.0 fl. oz./1000 sq. ft. per year.

2. Including, but not limited to: home lawns, parks, recreation areas, golf course roughs, cemeteries, business sites, sports fields, and sod farms.

3. ArmorTech PGR 113 MC can be applied along the perimeter of lawns, sidewalks, curbs, parking lots, driveways, posts, storage buildings, pet pens, fences, or other areas. ArmorTech PGR 113 MC can be used around trees, shrubs, flower beds, and other border plants or similar areas with no injury. Apply ArmorTech PGR 113 MC in an 8 to 12 inch band with a single nozzle sprayer. Use the higher concentration to reduce the growth of turfgrass into adjacent areas.

4. If yellowing of Poa annua is a concern, use half this rate and apply more frequently. For Poa annua conversion/renovation, where temporary discoloration can be tolerated, twice this rate may be applied.

5. Bermudagrass overseeding preparation: 0.5 oz./1000 sq. ft. for golf fairways and tees; 0.25 oz./1000 sq. ft. for golf greens.

CONDITION OF SALE AND LIMITATION OF WARRANTY AND LIABILITY

NOTICE: Read the entire Directions for Use and Conditions of Sale and Limitation of Warranty and Liability before buying or using this product. If the terms are not acceptable, return the product at once, unopened, and the purchase price will be refunded.

The Directions for Use of this product must be followed carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Ineffectiveness or other unintended consequences may result because of such factors as manner of use or application, weather, presence of other materials or other influencing factors in the use of the product, which are beyond the control of United Turf Alliance, LLC or Seller. All such risks shall be assumed by Buyer and User, and Buyer and User agree to hold United Turf Alliance, LLC and Seller harmless for any claims relating to such factors.

United Turf Alliance, LLC warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use, subject to the inherent risks referred to above, when used in accordance with the Directions for Use. To the extent consistent with applicable law, this warranty does not extend to the use of this product contrary to label instructions, or under conditions not reasonably foreseeable to or beyond the control of Seller or United Turf Alliance, LLC, and Buyer and User assume the risk of any such use. UNITED TURF ALLIANCE, LLC MAKES NO WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE NOR ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS STATED ABOVE.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store in a cool, dry place and avoid excess heat. Do not store below 0°F. If crystals form, store above 70°F, shaking periodically until crystals are dissolved.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.
To the extent consistent with applicable law, neither United Turf Alliance, LLC nor Seller shall be liable for any incidental, consequential or special damages resulting from the use or handling of this product. **THE EXCLUSIVE REMEDY OF THE USER OR BUYER, AND THE EXCLUSIVE LIABILITY OF UNITED TURF ALLIANCE, LLC AND SELLER FOR ANY AND ALL CLAIMS, LOSSES, INJURIES OR DAMAGES (INCLUDING CLAIMS BASED ON BREACH OF WARRANTY, CONTRACT, NEGLIGENCE, TORT, STRICT LIABILITY OR OTHERWISE) RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, SHALL BE THE RETURN OF THE PURCHASE PRICE OF THE PRODUCT OR, AT THE ELECTION OF UNITED TURF ALLIANCE, LLC OR SELLER, THE REPLACEMENT OF THE PRODUCT.**

United Turf Alliance, LLC and Seller offer this product, and Buyer and User accept it, subject to the foregoing Conditions of Sale and Limitation of Warranty and Liability, which may not be modified except by written agreement signed by a duly authorized representative of United Turf Alliance, LLC.

FIRST AID

If on skin or clothing:
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

If in eyes:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

If swallowed:
• Call a poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by a poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

If inhaled:
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth if possible.
• Call a poison control center or doctor for further treatment advice.

HOT LINE NUMBER
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For emergency information call Poison Control at 1-800-222-1222 or the National Pesticide Information Center (NPIC) at 1-800-858-7378.

NOTE TO PHYSICIAN
If a large amount has been ingested, lavage stomach. An aqueous suspension of activated charcoal can be given to absorb remaining toxicant. Treat symptomatically.

See label booklet for additional Precautionary Statements, Directions for Use and Storage and Disposal instructions.

Net Contents: 2.5 gallons (9.46 liters)
