GENERAL INFORMATION

AQUIAGENE CWN is a general purpose, low foam non-ionic spreader/activator for use on plants to maximize the effectiveness of insecticides, herbicides, fungicides, defoliants and desiccants. It is designed for quick wetting, uniform droplet distribution and increased spray retention on leaf and stem surfaces. AQUIAGENE CWN incorporates the properties of a spreader and an activator to improve wetting, spreading, contact activity and penetration. Not for aquatic use.

DIRECTIONS FOR USE

With herbicides, insecticides, fungicides, defoliants and desiccants: Add 1% to 4 pints per 100 gallons of water during mixing. For specific rates of surfactant, always refer to the pesticide manufacturer’s label. NOTE: Needed rates of AQUIAGENE CWN may vary with conditions of application. Sufficient AQUIAGENE CWN should be added to form a smooth, uniform spray deposit.

Prior to use, read and follow all directions on this label and on the label of the pesticide being used. The pesticide manufacturer’s label for specific usages and restrictions have precedence over DIRECTIONS FOR USE referred to on this label.

STORAGE AND DISPOSAL
