Note: Better results have been seen with the use of a non-ionic surfactant at 0.05% v/v.

Note: RyzUp SmartGrass may be mixed with Domark® 230 ME Fungicide and other corn fungicides. Better results have been seen with the use of a non-ionic surfactant at 0.05% v/v. However several corn fungicide labels (including Domark® 230 ME Fungicide) do not allow adjuvants in sprays made between V-8 (8 leaf collar) and VT (lowest branch of the tassel visible but silks have not emerged). Read and follow all use directions and restrictions of tank-mixed fungicides.
