Enforcer.

Weed Defeat® Concentrate

Contains 41% Glyphosate with surfactant

- Nonselective weed control
- Controls over 200 weeds, grass, and brush species
- Kills the roots
- Aquatic sites included

ACTIVE INGREDIENT:
*Glyphosate (N-(phosphonomethyl)glycine) in the form of its isopropylamine salt: 41.0%
INERT INGREDIENTS: 59.0%
TOTAL: 100.0%

THIS PRODUCT CONTAINS: 3.8 lbs. per U.S. gallon of the active ingredient glyphosate in the form of its isopropylamine salt. Equivalent to 2.8 lbs. per U.S. gallon of the acid, glyphosate.

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. Refer to supplemental labeling entitled AGRICULTURAL USE REQUIREMENTS in the DIRECTIONS FOR USE section of the labeling for information about this standard.

KEEP OUT OF REACH OF CHILDREN

NET CONTENTS: 1 GALLON (128 fl. oz./3.78 L)

See Back Panel For Additional Precautionary Statements.

**Enforcer. Weed Defeat Concentrate**

**Non-vegetation weed control**
- Controls over 200 weed species, and brush species
- Controls up to 20% of vegetation with Surfactant
- Kills the roots
- Residue control

**ACTIVE INGREDIENTS:**
- Glycine max (soybean), 3.8 lbs. per U.S. gallon of the active ingredient glyphosate in the form of its isopropylamine salt.
- Equivalent to 2.8 lbs. per U.S. gallon of the acid, glyphosate.

**INERT INGREDIENTS:**
- Formulated water

**FORM:**
- 25 gallons

**PRODUCT CONTENTS:**
- 100% active ingredient

**USE INFORMATION:**
- The product is ready to use and not intended to be used as a foliar spray for the control or destruction of many herbaceous or woody plants. It may be applied through standard individual or broadcast sprayers or as a tank mix with other compatible herbicides. It may also be applied to an entire treatment area if the total application rate is no more than 10 gallons/acre.

**USE INSTRUCTIONS:**
- Use coarse sprays only.
- Ensure adequate plant coverage by using an appropriate rate of this herbicide in 3 to 40 gallons of water per acre unless otherwise specified on this label. Use a nozzle type that is designed for the intended application. With most nozzle types, narrower spray angles produce larger droplets. Consider using low-drift nozzles.

**APPLICATION EQUIPMENT AND TECHNIQUES:**

**Sprayer Cleanup:**
- Use coarse sprays only.
- The product is ready to use and can be applied through standard individual or broadcast sprayers or as a tank mix with other compatible herbicides. It may also be applied to an entire treatment area if the total application rate is no more than 10 gallons/acre.

**Spray Preparation Chart for Spray-to-Wet Basis:**

**Table 1. Ingredients and Oils to Control Herbicides in an 11- to 18-gallon mixture per acre unless otherwise specified on this label.**

**Spray Management:**
- Use coarse sprays only.
- The product is ready to use and can be applied through standard individual or broadcast sprayers or as a tank mix with other compatible herbicides. It may also be applied to an entire treatment area if the total application rate is no more than 10 gallons/acre.

**Table 2. Amounts of This Product for Spray Concentrations, % vol**

**Spray Drift Management:**
- Use coarse sprays only.
- The product is ready to use and can be applied through standard individual or broadcast sprayers or as a tank mix with other compatible herbicides. It may also be applied to an entire treatment area if the total application rate is no more than 10 gallons/acre.

**Table 3. Amounts of This Product for Spray Concentrations, % vol**

**Important of Droplet Size:**
- Use coarse sprays only.
- The product is ready to use and can be applied through standard individual or broadcast sprayers or as a tank mix with other compatible herbicides. It may also be applied to an entire treatment area if the total application rate is no more than 10 gallons/acre.

**Table 4. Amounts of This Product for Spray Concentrations, % vol**

**Recommendations:**
- Use coarse sprays only.
- The product is ready to use and can be applied through standard individual or broadcast sprayers or as a tank mix with other compatible herbicides. It may also be applied to an entire treatment area if the total application rate is no more than 10 gallons/acre.

**ADDITIONAL USE INSTRUCTIONS:**
- Use coarse sprays only.
- The product is ready to use and can be applied through standard individual or broadcast sprayers or as a tank mix with other compatible herbicides. It may also be applied to an entire treatment area if the total application rate is no more than 10 gallons/acre.

**FIRST AID STATEMENTS:**
- Use coarse sprays only.
- The product is ready to use and can be applied through standard individual or broadcast sprayers or as a tank mix with other compatible herbicides. It may also be applied to an entire treatment area if the total application rate is no more than 10 gallons/acre.

**NOTES:**
- Use coarse sprays only.
- The product is ready to use and can be applied through standard individual or broadcast sprayers or as a tank mix with other compatible herbicides. It may also be applied to an entire treatment area if the total application rate is no more than 10 gallons/acre.

**REFERENCE:**
- Use coarse sprays only.
- The product is ready to use and can be applied through standard individual or broadcast sprayers or as a tank mix with other compatible herbicides. It may also be applied to an entire treatment area if the total application rate is no more than 10 gallons/acre.

**IMPORTANCE OF DROPLET SIZE:**
- Use coarse sprays only.
- The product is ready to use and can be applied through standard individual or broadcast sprayers or as a tank mix with other compatible herbicides. It may also be applied to an entire treatment area if the total application rate is no more than 10 gallons/acre.

**COMING SOON: Enforcer. Weed Defeat Concentrate**

**USE INFORMATION:**
- Use coarse sprays only.
- The product is ready to use and can be applied through standard individual or broadcast sprayers or as a tank mix with other compatible herbicides. It may also be applied to an entire treatment area if the total application rate is no more than 10 gallons/acre.

**APPLICATION EQUIPMENT AND TECHNIQUES:**

**Sprayer Cleanup:**
- Use coarse sprays only.
- The product is ready to use and can be applied through standard individual or broadcast sprayers or as a tank mix with other compatible herbicides. It may also be applied to an entire treatment area if the total application rate is no more than 10 gallons/acre.

- The product is ready to use and can be applied through standard individual or broadcast sprayers or as a tank mix with other compatible herbicides. It may also be applied to an entire treatment area if the total application rate is no more than 10 gallons/acre.

**Table 4. Amounts of This Product for Spray Concentrations, % vol**

**Recommendations:**
- Use coarse sprays only.
- The product is ready to use and can be applied through standard individual or broadcast sprayers or as a tank mix with other compatible herbicides. It may also be applied to an entire treatment area if the total application rate is no more than 10 gallons/acre.

**ADDITIONAL USE INSTRUCTIONS:**
- Use coarse sprays only.
- The product is ready to use and can be applied through standard individual or broadcast sprayers or as a tank mix with other compatible herbicides. It may also be applied to an entire treatment area if the total application rate is no more than 10 gallons/acre.

**IMPORTANCE OF DROPLET SIZE:**
- Use coarse sprays only.
- The product is ready to use and can be applied through standard individual or broadcast sprayers or as a tank mix with other compatible herbicides. It may also be applied to an entire treatment area if the total application rate is no more than 10 gallons/acre.
Generally, the lower application rates within the specified range will provide satisfactory control of sensitive weeds within the specified range. For control, apply a 1.75 - 2.5% solution with hand-held equipment when at least 50% of the new leaves are fully developed.

### WEEDS CONTROLLED:

For control, apply 8.5 pints of this product per acre as a broadcast spray or as a 2.0 - 2.5% solution

#### Major Weed Species:
- Hordeum pusillum
- Stellaria media
- Chairophyllum tainturieri
- Veronica arvensis
- Sycamore

### Release ofactively growing bermudagrass:
When applied as directed in the noncrop section in this label, this product will provide significant inhibition of seedhead emergence and will suppress vegetative growth for 1 - 2 months after application. This product is also recommended as a preplant, preemergence application of 3.0 - 4.0 ounces of product per acre made approximately 45 days after the last application.

### Orchard floors:
Speciﬁc use instructions for orchard ﬂoors, including dosage rates, spray volumes, and restrictions, are presented in the section named WEEDS CONTROLLED. See Tables 1 and 2.

</table>

### Use instructions:

This product is intended for use in noncrop areas and on nonfood outdoor surfaces. This product is not recommended for use on agricultural crops, forests, rangelands, ranges, or plantations.

### Precautions, Restrictions & Comments:

- Do not contaminate water, foodstuffs, feed or seed by storage and disposal.
- Store properly labeled container.
- Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after use and allow to dry. If container is to be used for another pesticide, rinse thoroughly before use. Do not contaminate water, foodstuffs, feed or seed by storage and disposal.

### Storage and disposal:

Do not contaminate water, foodstuffs, feed or seed by storage and disposal. Store properly labeled container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after use and allow to dry. If container is to be used for another pesticide, rinse thoroughly before use. Do not contaminate water, foodstuffs, feed or seed by storage and disposal.
