Refer to each container label for complete instructions and Precautionary Statements.

Net WL 4.6 lb (2.1 kg)
FIRST AID
IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for treatment advice. IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.
Have the product container or label with you when calling a poison control center or doctor or going for treatment.
NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.
IN CASE OF EMERGENCY CALL: 1-800-654-6571.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. READ ALL PRECAUTIONARY STATEMENTS BEFORE USE.
WATER BALANCE: For best product performance, swimmer comfort, and crystal clear water: Maintain pH in the range of 7.2 to 7.6. Maintain total alkalinity in the range of 60 to 120 parts per million (ppm). Maintain calcium hardness above 200 ppm. Use a POOLIFE test kit that measures all these ranges. Use POOLIFE Pool Care Products to make adjustments. Follow label directions for each product. Take a pool water sample to your authorized POOLIFE dealer regularly for a detailed water analysis.
Re-entry into treated pools is prohibited above 4 ppm due to risk of bodily harm.
Poolife® Exclusive Pool Care Collection Back to Blue™ Shock System: If you are experiencing a severe algae bloom, which has turned your pool green, the Poolife® Exclusive Pool Care Collection Back to Blue™ Shock System can turn your pool sparkling blue again. This two-part system destroys the bacteria and algae that have taken over your pool and then makes it easy to vacuum out. At the start of the season, or if a severe algae bloom occurs during the season, the pool can be treated and returned to its clear blue appearance within 24 hours by using Poolife® Exclusive Pool Care Collection Back to Blue™ 2 (1 per 15,000 gallons of water) and the circulator system turned on. If any granules settle to the bottom of the pool, a brush to disperse to assist in helping it to dissolve.
1. Add 2.0 lbs of Poolife® Exclusive Pool Care Collection Back to Blue™ 1 per 15,000 gallons of water into the pool with the circulator system turned on. If any granules settle to the bottom of the pool, a brush to disperse to assist in helping it to dissolve.
2. Once this product has been coherently dispersed in the pool water, change valve to recirculate position and add 2.0 lbs of Poolife® Exclusive Pool Care Collection Back to Blue™ 2 per 15,000 gallons of water through the skimmer.
3. Leave the system circulating for 1 hour, then turn off the filter pump and allow water and sediment to settle overnight.
4. The following day, change valves to vacuum position and vacuum the sediment to waste.
5. If the pool has not settled out or is not blue in color, repeat steps 1, 3 and 4.
6. Return valve to filter position a few hours have been vacuumed.
See next panel for additional hazard information.
