RAMPAGE MEAL BAIT

FOR USE IN & AROUND AGRICULTURAL BUILDINGS & HOMES
KNOWLEDGE & PROVEN捕鼠饵

KILLS NORWAY RATS, ROOF RATS & HOUSE MICE

MUST CONTAIN THE AMOUNT OF BROMATELLIN SPECIFIED ON THIS LABEL

ACTIVE INGREDIENT: Bromethalin (CAS #53283-95-7) . . . . . . . . . 0.01%
OTHER INGREDIENTS* . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . 99.99%
*Contains Dimethomorph Benzilate TOTAL: 100.00%

KEEP OUT OF REACH OF CHILDREN CAUTION
See side panels for First Aid and additional precautionary statements.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.
PESTICIDE STORAGE: Store only in original container in a cool, dry place inaccessible to children and pets. Keep container closed and away from other chemicals.
PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility.
CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. Offer for recycling. Do not dispose of empty container by placing in trash, at an approved disposal facility or by incineration.
WARRANTY: To the extent consistent with applicable law, either makes no warranty, expressed or implied, concerning the use of this product other than that indicated or the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

Net Weight: 25 lbs (11.3 kg)

DIRECTIONS FOR USE (Continued from previous panel)

corners and concealed places, between floors and walls, or in locations where rodents or their signs have been seen. Protect bait from rain and snow. Remove as much alternative food as possible.

APPLICATION DIRECTIONS:
Rate: Apply 1 to 6 ounces of bait per placement (usually an interval of 15 to 30 feet). Adjust the amount of bait applied to the level of rat feeding expected at each bait placement.

For training purposes, use a long-handled spoon to place 1 to 3 ounces of bait deep into each active rat entrance. Place 4 or 5 baits per placement. Repeat bait placements at intervals by setting of bait. If the area where treated baits are located is accessible to children and nontarget animals, check baits every morning and evening to make sure that bait has not been pushed out of baits. Remove and properly dispose of any bait that has become accessible to children or nontarget animals.

Baiting Strategy: Highest bait consumption is expected to occur on the first day or two after treatment begins. After several days, inspect the placement and replenish bait at sites where there is evidence of heavy feeding or where there is continued evidence of rodent activity.

Normally, the volume of bait consumed will be significantly less than bromethalin bait with anticoagulant baits. Although one field feeding will usually provide a lethal dose, maintain bait for at least one week to provide all rodents a chance to feed on the bait. Continue baiting until all signs of feeding have ceased.

FOLLOWUP: Replace contaminated or spoiled bait immediately. Wearing gloves, collect and properly dispose of all dead, exposed animals and leftover bait. To prevent reappearance, limit sources of idochlorophenol, water and harborage as much as possible. If infestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

PREDATORY STATEMENTS
Hazards to Humans and Domestic Animals
CAUTION: Harmful if swallowed. Keep away from children, domestic animals and pets. All handlers (including applicators) must wash their hands, face, and gloves. Anyone who neglects clothes or unused bait following application of this product must wash their hands.

User Safety Requirements
Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions are available, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.

ENVIRONMENTAL HAZARDS
This product is extremely toxic to mammals and birds. Dogs and other predators and sundering mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water, or to areas where surface water is present or to terrestrial areas below the mean high water mark. This product also may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment, waste water or residue.
