AXXE
READY TO USE
HERBICIDE

WEED AND GRASS KILLER

VISIBLE RESULTS WITHIN 24 HOURS

NET CONTENTS: 32 fl. oz.
Active Ingredient:
Ammonium Nonanoate........... 5.00%
Other Ingredients............. 95.00%
Total.................................. 100.00%

AXXE Ready To Use Herbicide contains 0.425gs
of ammonium nonanoate per US gallon

KEEP OUT OF REACH OF CHILDREN
CAUTION
See back, inside label for first aid, additional
precautionary statements and directions for use.
PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
Caution. Harmful if inhaled. Causes moderate eye irritation. Avoid breathing spray mist. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling. Remove and wash contaminated clothing before reuse.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

Pesticide storage:
Store in original containers in a cool, well-vented area, away from direct sunlight. Do not allow product to become overheated in storage. This may cause increased degradation of the product, which will decrease product effectiveness. In case of spill, flood area with large quantities of water. Do not store in a manner where cross-contamination with other pesticides or fertilizers could occur.

Pesticide Disposal:
If empty: Do not reuse this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

Container Disposal:
Nonrefillable container. Do not reuse or refill this container. If empty: place in trash or offer for recycling if available.

AXXE READY TO USE HERBICIDE
FOR ORGANIC GARDENING Non-selective Herbicide
For contact spray control of broadleaf weeds, grasses and annuals in ornamentals, turf, landscapes, vegetables, grapevines, non-crop areas on residential sites
FOR RESIDENTIAL USE
NOT FOR FOOD USE

FIRST AID

IF IN EYES
- Hold eye open and flush slowly and gently with water for 15 - 20 minutes.
- Remove contact lenses. For rear, after the first washing, then continue flushing eyes.
- Call poison control center or doctor for treatment advice.

IF INHALED
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth resuscitation.
- Call a poison control center or doctor for further treatment advice.

IF ON SKIN OR CLOTHING
- Take off contaminated clothing.
- Wash skin immediately with plenty of water for 15 - 20 minutes.
- Call a poison control center or doctor for treatment advice.

HOTLINE NUMBER
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For emergency information on AXXE Ready to Use Herbicide, call the National Pesticide Information Center at 1-800-858-7378, 24-hours a day, 365 days a year (PST), seven days a week. During other times, call the Poison Control Center at 1-800-222-1222.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
Caution, Harmful if Inhaled. Causes moderate eye irritation. Avoid breathing spray mist. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling. Remove and wash contaminated clothing before rewear.

ENVIRONMENTAL HAZARDS
For terrestrial uses only. This pesticide is toxic to fish and aquatic invertebrates. Use care when applying in or near water. Do not pollute waterways with this product. Do not contaminate water when dispersing of equipment over water or residue. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. Avoid pouring liquid on and running it over crops or weeds. Do not apply this product if bees are visiting the treated area.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product to areas that will be reworked with seed or amendments within 30 days. Do not apply this product to areas that will be worked with seed or amendments within 30 days. Do not apply this product to areas that will be worked with seed or amendments within 30 days.

METHODS OF USE AND GENERAL APPLICATION INSTRUCTIONS
General Instructions:
AXXE Ready to Use Herbicide is a contact non-selective herbicide for spray application only to undesirable plant growth. Do not allow spray to contact any green plant parts of desirable plants. AXXE Ready to Use Herbicide passes control and broadleaf suppression of annual and perennial broadleaf and grass weeds. Grazing and/or plowing plants such as pines and shrubs may also be controlled. The amount of burndown and the duration of weed suppression may be reduced when weed growth conditions are unfavorable or when plants are mature.

AXXE Ready to Use Herbicide is a non-selective and water soluble herbicide for foliar application to weeds. Complete and uniform coverage of weeds by the spray solution is required for the best weed control. Plant foliage will change from a green color to bronzy-black necrotic tissue within one to two weeks after spray application. AXXE Ready to Use Herbicide is effective on plant tissue may be more rapid in warm weather than in cold conditions. However, weed control is normally unaffected by temperature.

AXXE Ready to Use Herbicide is a spray product which penetrates the cell walls of plants to disrupt the cellular organization of physiological functions which are compartmentalized by membranes within the cell walls. Plant growth ceases when cellular contents are attacked and necrotic tissue is formed.

AXXE Ready to Use Herbicide does not migrate through the soil and is not translocated in plants. To ensure satisfactory control, plant leaves must be thoroughly and uniformly covered with the spray solution. AXXE Ready to Use Herbicide does not provide any residual weed control in soil to affect germinating weed seeds.

Application Instructions:
AXXE Ready to Use Herbicide is completely soluble in water. It should be applied at the rate of 1 gal_solution per 1000 ft². During application, some fogging may occur; however, weed control is not reduced if the fan is directed on the plant surface and is not blown away by drift. Apply AXXE Ready to Use Herbicide when weed surfaces are dry.

Application Precautions:
- Do not apply to weeds that are too deep, tan or intercepted.
- Do not irrigate within 12 hours after application.
- Do not apply if wind is expected within 2 hours.

Difficult to control weeds may require several applications for complete control.

Hand-Held Spray Application
The amount of spray volume required for complete coverage of undesirable plants (weed) vegetation conditions that affect spray coverage are number of weeds present, leaf size, size and size and size of plants and size and size of plants. Through saturation of the foliage and stem is required for control. Apply sprays until run-off from leaves occurs. Use low spray pressure to reduce foaming and avoid contact with desirable plants.

Directed Spray Application
Use a shielded sprayer to prevent spray contact on desirable plants. Avoid spray contact of green plant stems or green foliage by trees and bushes.

Use a shielded sprayer to prevent spray contact on desirable plants. Avoid spray contact of green plant stems or green foliage by trees and bushes.

Use a shielded sprayer to prevent spray contact on desirable plants. Avoid spray contact of green plant stems or green foliage by trees and bushes.
