IF SWALLOWED
- Call a poison control center or doctor immediately for treatment advice.
- Have product container with you when calling a poison control center or doctor.

IF INHALED
- Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.
- Call a poison control center or doctor for further treatment advice.

IF ON SKIN OR CLOTHING
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for further treatment advice.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with the labeling.

NOTE: Add CHECK-MARK 40224 to water and recirculating systems to reduce biofouling in various membrane system types (reverse osmosis, ultrafiltration, nanofiltration) and for use in industrial water processing. Acceptable applications include reverse osmosis for the production of boiler make-up water, electronic component rinsing, and industrial wastewater treatment.

NOTE: Reverse Osmosis (RO) concentrate streams must not be discharged to lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) Permit. Discharge of RO concentrate streams to sewers may require approval of the local sewer treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PRECAUTIONARY STATEMENTS
Hazard to Humans and Domestic Animals
DANGER
Crodone Causes irreversible eye damage. May be Fatal if swallowed. Causes skin irritation. Harmful if inhaled or absorbed through skin. Do not get in eyes, on skin or on clothing. Avoid breathing spray mist or vapors. When handling or using, wear protective eyewear (goggles or face shield). Wear long-sleeved shirt and long pants, socks, shoes and chemically resistant gloves. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using the toilet or using tobacco. Remove and wash contaminated clothing separately.

Personal Protective Equipment
Applicants and other handlers must wear:
- Coversalls, over long-sleeved shirt and long pants, shoes, socks and chemically resistant gloves
- Socks and chemical resistant footwear
- Goggles or face shields

Engineering Controls
When handlers use closed recirculating systems the handler requirements may be reduced or modified to long-sleeved shirt, long pants, shoes and socks.

User Safety Requirements
Follow manufacturers’ instructions for cleaning & maintaining PPE. If no such instructions exist for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. Users must wash hands before eating, drinking, chewing gum, using the toilet or using tobacco. Users must remove clothing immediately if a pesticide gets inside. Then wash thoroughly and put on clean clothing. Users must not smoke while handling this product. Wash the outside of gloves before removing. Avoid getting any possible, wash thoroughly and change into clean clothing.

Application Restrictions
Do not apply this product directly in a way that will contact workers or other persons (either by application equipment or drift). Only protected handlers may be in the area during application.

ENVIRONMENTAL HAZARDS
This product is hazardous to aquatic life. Discharge of this product to water bodies or storm drain systems is prohibited. Discharge of this product to surface waters is prohibited. Follow the label instructions for proper application and disposal. This product is hazardous to fish. Discharge of effluent containing this product to streams, ponds, lakes, estuaries, oceans or other waters requires in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Secondary biological treatment of DBP effluent is required for all uses except for use in secondary or recovery systems. Do not discharge effluent containing this product to sewers without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

Note: Seller’s warranties are void if the product is not used as directed, or if the product is not used in accordance with the label or regulations. Seller makes no other express or implied warranty of merchantability or fitness for any particular purpose or any other express or implied warranty.

See the Safety Data Sheet for more information.

MEMBRANE SYSTEMS FOR INDUSTRIAL WATER
CHECK-MARK 40224 is intended for use in reverse osmosis, ultrafiltration, nanofiltration, and for use in industrial water processing. Acceptable applications include reverse osmosis for the production of boiler make-up water, electronic component rinsing, and industrial wastewater treatment.

NOTE: Reverse Osmosis (RO) concentrate streams must not be discharged to lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) Permit. Discharge of RO concentrate streams to sewers may require approval of the local sewer treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

CHECK-MARK 40224 may be added to the RO feed water at a rate of 1 to 10 lbs. per million gallons (0.1 to 1.0 ppm) on a dry weight basis.

Add 0.1-0.5 lbs per million gallons on a dry weight basis to the feed and retentate streams in RO systems.

DO NOT MIX the product solution with other additives, in order to avoid decomposition of the active ingredient due to the high pH of many additive formulations.

DO NOT MIX the product solution with other additives, in order to avoid decomposition of the active ingredient due to the high pH of many additive formulations.

SUGGESTED USES
- Add product to pre-chlorinated water before releasing into surface waters. After discharge, treatment is advisable where a detectable level of chlorine remains in the water after a sufficient contact time.
- Add product to cooling or heating systems to inhibit growth of crops and algae.

ADDITIVE FORMULATIONS
- Add product to recirculating systems to reduce biofouling in various membrane system types (reverse osmosis, ultrafiltration, nanofiltration) and for use in industrial water processing.

ADDITIVE FORMULATIONS
- Add product to recirculating systems to reduce biofouling in various membrane system types (reverse osmosis, ultrafiltration, nanofiltration) and for use in industrial water processing.

ADDITIVE FORMULATIONS
- Add product to pre-chlorinated water before releasing into surface waters. After discharge, treatment is advisable where a detectable level of chlorine remains in the water after a sufficient contact time.
- Add product to cooling or heating systems to inhibit growth of crops and algae.

APPENDIX A
1.0 to 10.0 lbs./gallon of water as the product solution or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentrate (1:100) or as a concentration (1:100) or as a concentrate (1:100) or as a concentration (1:100) or as a concentrate (1:100) or as a concentration (1:100) or as a concentration (1:100) or as a concentration (1:100) or as a concentration (1:100) or as a concentration (1:100) or as a concentration (1:100) or as a concentration (1:100) or as a concentration (1:100) or as a concentration (1:100) or as a concentration (1:100) or as a concentration (1:100) or as a concentra
