DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

FOR USE IN HYDROCARBON PRESERVATION: To control the growth of problem microorganisms associated with the fuel.

In general use: Add TANK TONIC to storage tanks or fuel tanks for control of microbial growth in diesel oil, fuel oil, gasoline or kerosene. Treatment may be performed by slug dosing or by intermittent metering to maintain a concentration of 135–1000 ppm of TANK TONIC.

For packages less than one gallon, refer to chart below:

For storage in tanks without intentional water: Add 0.125 – 1 gallon of TANK TONIC directly to each 1000 gallons of hydrocarbon in the system to obtain a concentration of approximately 135–1000 ppm.

In a fuel-treatment pre-mix: TANK TONIC may be mixed with other fuel additives for addition to fuel. The end user must add sufficient TANK TONIC to the pre-mix to provide 135–1000 ppm of TANK TONIC in the treated fuel.

STORAGE AND DISPOSAL
PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinseate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable container: Do not reuse or refill this container. Triple rinse or pressure rinse container (or equivalent) promptly after emptying. Then offer for recycling, if available, or puncture and dispose of in a sanitary landfill, or by incineration, or, if allowed by state and local authorities by burning. If burned, stay out of smoke.
