**NOTICE**

It is impossible to eliminate all risks inherently associated with the use of this product. Inefficiveness or other unintended consequences may occur, depending upon such factors as weather conditions, presence of other materials, or the manner of use or application. All of which are beyond the control of the manufacturer, Chem-Tech Ltd., the manufacturer or seller. To the extent consistent with applicable law, buyer’s or user’s exclusive remedy, and Chem-Tech Ltd., the manufacturer’s or seller’s total liability shall be limited to damages not exceeding the cost of the product.
FIRST AID

IN ANIMAL QUARTERS AND MILK ROOMS: For rapid control of House Fleas, Mosquitoes, Gnats, Wasps, Hornets, Flies and Small-Flying Moths. Remove animal's prior to treatment, close windows and doors and spray at the rate of 2 seconds per 1000 cubic feet of space. For best results, keep area closed for 10 minutes after spraying. Do not remain in treated area and ventilate after treatment is completed.

TO TREAT LIVESTOCK: To protect beef cattle, dairy cattle, goats, sheep, hogs and horses from attacks of Stable Flies, Horse Flies, Deer Flies, Face Flies, House Flies, Horn Flies, Mosquitoes, ticks and Gnats: Spray about 3 seconds on each side being careful to spray back, withers and forelegs thoroughly. To protect from Face Flies, spray the face and head, but do not spray into eyes. Repeat treatment when flies are troublesome. For ear ticks spray directly into ear.

WOUND SPRAY and to kill SCREW WORMS, flies and maggots infesting beef cattle, horses and sheep, hold can about 4 to 6 inches from the area to be treated with nozzle pointed at wound. Spray the area until it is completely wet (3 to 10 seconds are usually enough). The area surrounding the wound should also be sprayed. This product is not recommended for use in deep wounds. Note on Resistance: Some strains of screw worm may develop resistance to pyrethrins. This will be observed by lack of response to treatment. Where pyrethrin resistance is known or suspected, this product should not be used.

FOR SWINE: Do not ship animals for slaughter within 5 days of last treatment. TO CONTROL BLOOD SUCKING LICE: Apply to the infested areas of the animal, using a stiff brush to get the spray to the base of the hair. Repeat every 3 weeks if required.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. PESTICIDE STORAGE: Store in cool, dry place away from children, preferably a secure storage area. CONTAINER DISPOSAL: Do not puncture or incinerate. If empty: Place in trash or offer for recycling if available. If partly filled, call your local solid waste agency for disposal instructions.

NOTICE: It is impossible to eliminate all risks inherently associated with the use of this product. Inefficacy or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application. All of which are beyond the control of Chem-Tech, Ltd., the manufacturer or seller.
