**GENERAL INFORMATION**

YARDAGE™ is a multi-functional adjuvant designed to lower the pH of spray solutions, thus preventing alkaline hydrolysis of pesticides sensitive to high pH.

YARDAGE™ is a 3 in 1 additive that enhances the performance of herbicides, insecticides, fungicides and plant growth regulators. It provides more uniform coverage by improving distribution, penetration and uptake of active ingredients.

- Lowers surface tension of tank mix, allowing spray droplets to spread upon contact
- Increased contact area drives pesticide actives into the plant faster
- Allows water to penetrate hydrophobic surfaces ensuring delivery of actives
- Ensures consistent spray droplet size
- Uniform deposition of spray droplets on plant surfaces

**Ideal For:**
- Pesticides that are sensitive to high pH
- Water with high alkalinity
- Keeping sprays from drifting onto sensitive plants nearby
- Use around aquatic environments

**DIRECTIONS FOR USE**

ALWAYS FOLLOW THE DIRECTIONS ON THE LABEL OF ANY PEST CONTROL PRODUCT. YARDAGE™ may be used with any herbicide, insecticide, fungicide or other pest control product that allows the use of a spray additive.

This product may be used in accordance with the label instructions of pesticides that have been approved for aquatic use.
