treatment advice.

If signs of sensitivity occur, bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately.

FIRST AID

If in eyes • Call a poison control center or doctor for treatment advice.

• Hold eye open and rinse slowly with water for 15-20 minutes.

• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

If swallowed • Call a poison control center or doctor for treatment advice.

• Do not induce vomiting.

• Drink 1-2 cups of milk or water to thin product.

• Give 1/2 cup of milk or sugar water for every pound of body weight.

• Warm wet towels or sponge to cool stomach.

• Do not give anything by mouth unless advised to do so by a veterinarian.

If in hair • Do not comb out. Use a brush or comb to remove debris from the coat.

HAZARDS TO ANIMALS - CAUTION:

Puppies less than 10 weeks of age or kittens less than 12 weeks of age. Do not use on puppies less than 10 weeks of age or kittens less than 12 weeks of age.

Do not use on debilitated, aged, pregnant, nursing, or animals on medication. Sensitivities may occur after using 40% pyrethroid product for pets. If signs of sensitivity occur, bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately.

PRECAUTIONARY STATEMENTS

HAZARDS TO ANIMALS - CAUTION:

Use on animals 12 weeks of age or older. Read entire label before each use. Store only on dog and puppies 10 weeks of age or older and kittens 12 weeks of age or older.

WARRANTY AND CONDITIONS OF SALE:

Seller warrants that this product conforms to the chemical specifications expressed on the label. To the extent consistent with applicable law, Seller makes no other warranties, and disclaims all other warranties, express or implied, including but not limited to those of merchantability or fitness for the intended purpose. To the extent consistent with applicable law, Seller shall have no liability for consequential damages.

In case of emergency or for product use information, call 1-800-234-2269.

– It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Shake Well Before Using.

SAFETY AND TOXICOLOGY:

• kills adult fleas, flea eggs, flea larvae, and ticks

IMPORTANT! READ ENTIRE LABEL BEFORE EACH USE

• Treatment of pets with Adams™ Flea & Tick Spray kills fleas and may reduce the incidence of this condition.

• It provides effective flea control. Do not allow spray from application to come into contact with painted or finished surfaces, including wood floors/furniture, leather/velvet materials, or other surfaces of concern. For best results, walk the coat while spraying against the natural lay of the hair. Cover pet's eyes with hand. With a firm, flat stroke, spray head, ears, and chest. If you see a tick, spray it directly. With brush, rub on face around mouth, eyes, and ears. Then spray flearefix, middle and tail quarters, finishing with legs and tail last. Avoid spraying ruptured and genitals. For all pets, spray until damp, not saturated. Do not allow pets to become chilled. If your pet becomes restless with adult flea or ticks, Adams™ Flea & Tick Spray may be reapplied every two weeks after the initial application.

TREATMENT DISEASE:

TREATMENT DISEASE: Treatment disease is based on pet weight, so pet should be weighed before treatment. Note that the labeled dose is about 4 squirts of the trigger aerosol per pound of body weight. Short-haired pets may need less. In all cases, spray until the coat is damp, not saturated. Adams™ Flea & Tick Spray is most effective when used as part of a total flea and tick management program. Use other Adams™ products registered for residential premise control (carpets, upholstered furniture, pet bedding, and other surfaces of concern) in conjunction with this treatment. Monthly premise treatments are required for optimal control and prevention of fleas.

The successive feeding activity of fleas on pets may elicit a hypersensitivity skin disorder known as flea allergy dermatitis (FAD). Treatment of pets with Adams™ Flea & Tick Spray kills fleas and may reduce the incidence of this condition.

Storage and Disposal: Do not store near heat or open flame. Store away from children and animals.

STORAGE and DISPOSAL:

If partly filled: Place in trash or offer for recycling if available.

If empty: Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions.

Never place unused product down any indoor or outdoor drain.
ADAMS™ Flea & Tick Spray

* kills adult fleas, flea eggs, flea larvae, and ticks

IMPORTANT! READ ENTIRE LABEL BEFORE EACH USE

The product is a hazardous commodity with its labeling.

WARRANTY AND CONDITIONS OF SALE: Seller warrants that the product conforms to the chemical specifications expressed on the label. To the extent consistent with applicable law, Seller makes no other warranties, and disclaims all other warranties, express or implied, including but not limited to warranties of merchantability and fitness for the intended purpose. To the extent consistent with applicable law, Seller shall have no liability for any incidental, consequential or other damages.

SHARE WELL BEFORE USING.

• kills adult fleas, flea eggs, flea larvae, and ticks

DIRECTIONS FOR USE
– It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

FIRST AID

If in eyes • Call a poison control center or doctor for treatment advice.

• Hold eye-open and rinse slowly and gently with water for 15-20 minutes.

• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

• Hold eye open and rinse slowly and gently with large amounts of water. If signs continue, consult a veterinarian immediately.

PHYSICAL HAZARDS: Combustible. Do not use or store near heat or open flames.

For external use only. Consult veterinarian before using this product on debilitated, aged, pregnant, nursing, or animals on medication. Sensitivities may occur during or after treatment. Sensitivities may occur after using any pesticide product for pets. If signs of sensitivity occur, bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately.
