**Manufactured for:**

Farnam Companies, Inc.
P.O. Box 34820
Phoenix, AZ 85067-4820

**Product Code:** 100511006

**RM#: 300512610**

**12-0339 All trademarks are property of their respective owners.**

**FOR FLEAS:**

- A light, even coverage of the hair coat will provide effective flea control. Do not allow spray from application or damp cat to come into contact with painted or finished surfaces, including wood floors, leather, vinyl materials, or other surfaces of concern. For best results, spray the coat while spraying against the natural lay of the hair. Cover cat’s/kitten’s eyes with hand. With a firm, fast stroke, spray head, neck, and chest. If you see a tick, spray & directly. With cloth, rub on fur around mouth, nose, and eyes. Then spray the neck, muzzle, and front quarters, finishing with legs and tail last. Avoid spraying paws and genitalia. For all applications, apply until roaring, not saturated. Do not allow cat’s/kitten’s coat to become打架. If your calculator becomes wetted with adult flea or tule, Adams™ Flea & Tick Spray for Cats may be reapplied every two weeks after the initial application. Continue treatments for prevention of flea infestation.

**TREATMENT DOSAGE:**

- Treatment dosage is based on pet weight, so pet should be weighed before treatment. Note that the labeled dose is about 4 squirts of the trigger sprayer per pound of body weight. In all cases, open until the cat is damp, not saturated. Adams™ Flea & Tick Spray for Cats is most effective when used as part of a total flea and tick management program. Use other Adams™ products registered for residential pest control ( outdoors, upholstery, and pet bedding) of these pets in conjunction with this treatment. Monthly premise treatments are required for optimal control and prevention of fleas.

- The success rates depend on fleas on pets may elicit a hypersensitivity skin disorder known as flea allergy dermatitis (FAD). Treatment of cats with Adams™ Flea & Tick Spray for Cats kills fleas and may reduce the incidence of this condition.

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS – CAUTION:**

- Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Repeated exposure to etofenprox can cause skin irritation.

**HAZARDS TO ANIMALS - CAUTION:**

- Do not use on kittens less than 12 weeks of age. For external use only. Consult a veterinarian before using this product on debilitated, aged, pregnant, nursing, or animals on medication.

**FIRST AID**

- If in eyes:
  - Call a poison control center or doctor for treatment advice.
  - Hold eye open and rinse slowly and gently with water for 15-20 minutes.
  - Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

**PHYSICAL HAZARDS:**

- Combustible. Do not use or store near heat or open flame.

**STORAGE and DISPOSAL:**

- Store away from children and animals. Disposal: Nonrefillable container. Do not reuse or refill this container. If empty, place in trash or offer for recycling if available. Do not flush down a toilet. Never place unused product down any indoor or outdoor drain.

• kills adult fleas, flea eggs, flea larvae, and ticks

FOR FLEAS:
A light, even coverage of the hair coat will provide effective flea control. Do not allow spray from application or damp cat to come into contact with painted or finished surfaces, including wood, vinyl, furniture, leather/vinyl materials, or other surfaces of concern. For best results, start the coat while spraying against the natural lay of the hair. Cover cat's/kitten's eyes with hand. With a firm, fast, direct, spray head, neck, and chest. If you see a tick, spray it directly. With cloth, rub on fur around mouth, nose, and eyes. Then spray the neck, muzzle and front quarters, finishing with legs and tail last. Avoid spraying reticulated genitalia. For all applications, spot until drying, not saturated. Do not allow cats' and kittens' to become chilled. If your cat/kitten becomes irritated with adult fleas or ticks, Adams™ Flea & Tick Spray for Cats may be reapplied every two weeks after the initial application. Continued treatments for prevention of flea infestation.

TREATMENT DOSAGE: Treatment dosage is based on pet weight, so pet should be weighed before treatment. Note that the labeled dose is about 4 squirts of the trigger sprayer per pound of body weight, so pets up to 6 pounds, the coating is damp, not saturated. Adams™ Flea & Tick Spray for Cats is most effective when used as part of a total flea and tick management program. Use other Adams™ products registered for residential perimeter control (perimeters, upholstery, and pet bedding) of these pets in conjunction with this treatment. Monthly premise treatments are required for optimal control and prevention of fleas.

The successive feeding activity of fleas on pets may elicit a hypersensitivity skin disorder known as flea allergy dermatitis (FAD). Treatment of cats with Adams™ Flea & Tick Spray for Cats kills fleas and may reduce the incidence of this condition.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS – CAUTION:
Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Repeated exposure to etofenprox can cause skin irritation.

HAZARDS TO ANIMALS - CAUTION:
Do not use on kittens less than 12 weeks of age.

For external use only. Consult a veterinarian before using this product on debilitated, aged, pregnant, nursing, or animals on medication. Sensitivities may occur after using any pesticide product for pets. If signs of sensitivity occur, bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately. In some cases, excessive salivation and paw licking may occur; however, these effects are temporary and not harmful.
