Water Soluble Pouch

ACTIVE INGREDIENTS:

*Bacillus sphaericus* 2962, Serotype H5s56, strain AM614* .................................................. 3%
*Bacillus thuringiensis* subspecies *israelensis* Strain BMP 144 solids, spores and insecticidal toxins* .......................................................... 3%

OTHER INGREDIENTS: ........................................................................................................ 94%

TOTAL: .................................................................................................................................. 100%

*Equivalent to 30 Bt ITU/mg and 210 Bti ITU/mg respectively. Note: The percent active ingredient does not indicate product performance and potency measurements are not federally standardized.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS – CAUTION:

Causes moderate eye irritation. Harmful if absorbed through skin. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.

ENVIRONMENTAL HAZARDS:

Do not contaminate water when disposing of equipment washwaters or rinsate. Do not apply directly to treated, finished drinking water reservoirs or drinking water receptacles when the water is intended for human consumption.

FIRST AID

If in eyes: • Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes, and then continue rinsing eyes. • Call a poison control center or doctor for treatment advice.

If on skin: • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes. • Call a poison control center or doctor for treatment advice.

HOT LINE NUMBER

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-248-7763 for emergency medical treatment information.

DIRECTIONS FOR USE

It is a violation of Federal law to apply this product in a manner inconsistent with its labeling.

FourStar® Water Soluble Pouch (WSP): Once the foil bag containing Water Soluble Pouches is opened, minimize exposure of the WSP to humidity.

APPLICATION DIRECTIONS

FourStar® WSP is a highly selective multi-brood microbial insecticide effective against mosquito larvae in a variety of aquatic habitats for up to 8 weeks. FourStar® WSP releases effective levels of *Bacillus sphaericus* and *Bacillus thuringiensis* subspecies *israelensis* to the water surface and throughout the water column.

Apply uniformly according to rates listed below by hand. Reapply after 1 to 8 weeks under typical environmental conditions. More frequent applications may be made if monitoring indicates that larval populations have reestablished or weather conditions have rendered initial treatments ineffective.

APPLICATION SITES

FourStar® WSP can be applied to all field mosquito development sites that contain aquatic life, fish and plants as well as areas in contact with humans, animals, horses, livestock, pets, birds or wildlife.

Examples of application sites include:

Natural and man-made aquatic sites such as catch basins and storm drains, abandoned swimming pools, unused swimming pools or spas, fish and wildlife ponds, livestock watering troughs/ponds/tanks, irrigation ditches, water gardens, impounded wastewater associated with fruit and vegetable processing, retention, detention and seepage ponds, animal waste lagoons, flood water, standing water, storm water retention areas, bird baths, fountains, flowerpots and planters, snow melt pools, septic tanks, any location where water accumulates and remains standing for periods of time, except treated, finished drinking water for human consumption.

APPLICATION RATES

Apply on basis of surface area of potential mosquito breeding sites that contain aquatic life, fish and plants as well as areas in contact with humans, animals, horses, livestock, pets, birds or wildlife.

Examples of application sites include:

Natural and man-made aquatic sites such as catch basins and storm drains, abandoned swimming pools, unused swimming pools or spas, fish and wildlife ponds, livestock watering troughs/ponds/tanks, irrigation ditches, water gardens, impounded wastewater associated with fruit and vegetable processing, retention, detention and seepage ponds, animal waste lagoons, flood water, standing water, storm water retention areas, bird baths, fountains, flowerpots and planters, snow melt pools, septic tanks, any location where water accumulates and remains standing for periods of time, except treated, finished drinking water for human consumption.
