3-IN-1 ACTION
SANITIZE, PREVENTS ALGAE AND CLARIFIES WATER
STABILIZED FOR EXTENDED CHLORINE LIFE

ACTIVE INGREDIENTS:
Trichloro-s-Triazine-trione..................93.5%
Copper Sulfate pentahydrate*..............1.5%
OTHER INGREDIENTS.........................5.0%
TOTAL..................................100.0%
Available Chlorine.........................84%
*Metallic copper equivalent 0.38%

KEEP OUT OF REACH OF CHILDREN
DANGER
Contamination or improper use may cause fire, explosion or the release of toxic gases. Do not allow product to contact any foreign matter, including other water treatment products. If product is exposed to small amounts of water, it can react violently to produce heat and toxic gases and spatter. Do not add water to this product. Add only into water. Do not remove floater or other dispensing device from water for an extended period of time if it contains a tablet or tablet residue. Do not mix this product with a small amount of water. Only add directly to your pool. Corrosive. Causes irreversible eye damage and skin burns. May be fatal if inhaled or absorbed through skin. Harmful if swallowed. See back panel for Precautionary and First Aid Statements.

NET WEIGHT: 22 LB - 9.97 KG
DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. READ THE PRECAUTIONARY STATEMENTS BEFORE USE.
This product is designed to dissolve slowly, providing a steady source of available chlorine and copper in swimming pools to control the growth of algae, kill bacteria and destroy organic contaminants.

METHOD OF APPLICATION: Use in a floating dispenser, automatic chlorinator or feeder designed for this product, or place in skimmer. Do not allow this product to get damp or wet before use. Do not allow this product to contact other water treatment products. Use in a new chlorinating device or any device which has previously contained only this product or trichloro-s-triazinetrione.

DO NOT Use in floater or feeder that has been used with other water treatment products. Make sure skimmer is completely clean and free of residue from other water treatment products before putting this product in the skimmer.
DO NOT Throw tablets directly into pool. Do NOT Permit tablets to contact plastic pool linings or metal objects.
DO NOT Use with any other tablets or sticks in the same skimmer, floater, or feeder.
DO NOT Use in any chlorinating device which has been used with other chlorinating compounds.
DO NOT Use bare hands while handling product.
DO NOT Mix with other products or dissolve before use.
DO NOT Pre-mix this product. Only add this product directly to your pool.

WATER BALANCE: For best product performance, swimmer comfort and crystal clear water, use GLB* products to maintain the following water balance:

<table>
<thead>
<tr>
<th>Parameter</th>
<th>Acceptable Range of Balance</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total Alkalinity</td>
<td>80 - 120 ppm</td>
</tr>
<tr>
<td>Calcium Hardness</td>
<td>Above 200 ppm</td>
</tr>
<tr>
<td>Available Chlorine</td>
<td>2 - 4 ppm</td>
</tr>
</tbody>
</table>

Follow labeling directions for each product and allow each product to dissolve and disperse before adding additional products to the pool. Use a GLB* test kit that measures all these ranges.

Re-entry into treated pools is prohibited with chlorine levels above 4 ppm for risk of bodily injury.

RINSE CLOTHING: Add one tablet per 10,000 gallons of pool water every week or as often as needed to maintain a chlorine residual at 1.0 to 4.0 ppm. Follow "METHOD OF APPLICATION." This dosage may vary depending upon bather load, water temperature and other conditions. Pool must not be entered until the chlorine residual is 1-4 ppm as measured with a reliable test kit.

SHOCK TREATMENT: As a preventative treatment, you must shock treat your pool once per week to prevent pool problems. In addition to weekly shock treatment, you must shock treat to remedy problems which may occur when bather loads are high, water clarity has deteriorated, or algae begin to develop with reducing green color and slimy feeling.

ALGAE CONTROL: If pool surface develops algae or feels slippery, follow shock treatment directions immediately after shock treatment. Thoroughly clean pool by scrubbing surface of algae growth, vacuum and pyle through filter. If necessary, repeat the procedure. Pool must not be entered until the chlorine residual is 1-4 ppm.

PRECAUTIONARY STATEMENTS:
HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER: Cancers. Causes reversible eye burns and skin irritation. May be fatal if inhaled. Harmful if swallowed.
- Do not get in eyes, on skin or on clothing. Wear safety goggles or face shield, and rubber gloves when handling this product. For additional skin protection, wear long sleeves and long pants.
- Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Open in a well-ventilated area. Do not breathe dust or vapor. Do not inhale and wash clothing containing chlorine before reuse.

FIRST AID:
IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first few minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing call 911 or an ambulance. If breathing is difficult, administer respirator, preferably by mouth to mouth if possible. Call a poison control center or doctor for further treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

IN CASE OF EMERGENCY CALL: 1-800-654-9611

PHYSICAL AND CHEMICAL HAZARDS: DANGER: This product is exposed to small amounts of water, it can react to cause explosion or the release of toxic gases. Do not add water to this product. Add only into water.
- Do not allow to become wet or damp before use.
- Do not remove feeder or other dispensing device from water for more than five minutes if it contains a tablet or tablet residue. Can react with other materials, including other water treatment products, to cause fire, explosion, and the release of toxic gases. Keep all foreign matter, including other water treatment products, away from this product.
- Do not use this product in a feeder or other feeder equipment that has been used with any other product.
- Do not allow this product to contact other water treatment products. If used with a skimmer, make sure skimmer is completely clean and free of residue from other water treatment products before pulling this product in the skimmer. Strong oxidizing agent. This product can increase fire intensity. Keep away from heat and from flame and burning material like a lighted cigarette.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

STORAGE AND DISPOSAL: Keep this product dry in its tightly closed container when not in use. Store in a cool, dry, well-ventilated area. Keep away from heat or open flames. Do not contaminate food or feed by storage or disposal of equipment. FOR DISPOSAL OF A CONTAMINATED DECAYING PRODUCT SEE EMERGENCY HANDLING. Refillable container. Refill this container with Trichloro-s-triazinetrione and copper sulphate Pentahydrate only. Do not use this container for any other purpose. Please empty container thoroughly with water to dissolve all material prior to disposal. Offer for recycling if available. If not, discard in trunk.

EMERGENCY HANDLING: In case of contamination or decomposition—Do not reseal container; immediately remove container to an open and well-ventilated outdoor area by itself. Flood with large amounts of water. Dispose of the container and any remaining contaminated material in an approved landfill area.
