GLB® Triple Tab
3-IN-1 ACTION
SANITIZER, PREVENT ALGAE AND CLARIFY WATER
STABILIZED FOR EXTENDED CHLORINE LIFE.

KEEP OUT OF REACH OF CHILDREN
DANGER

ACTIVE INGREDIENTS
Copper Sulfate Pentahydrate..............5.5%
Sodium Hypochlorite....................12.5%
Potassium Chloride......................2.5%
Calcium Chloride.......................36.8%
Available Chlorine.....................84%
Carbon Residues........................0.38%
Copper Residues........................1%

NET WEIGHT: 10 LBS (4.54 KG)

IN CASE OF EMERGENCY CALL: 1-800-654-6911

METHOD OF APPLICATION:

ROUTINE CHLORINATION:
Add one tablet per 10,000 gallons of water. Allow the chlorination process to continue for at least 24 hours before adding any other products. The tablet will disintegrate and release available chlorine into the water. Do not add water to this product. Add only into water.

SHOCK TREATMENT:
Follow "METHOD OF APPLICATION". This dosage may vary depending on the amount of algae or contamination present. The tablet will disintegrate and release available chlorine into the water. Do not add water to this product. Add only into water.

ALGAE CONTROL:
Shock treat to remedy problems which may occur when algal growth is an issue. Follow "METHOD OF APPLICATION". This dosage may vary depending on the amount of algae or contamination present. The tablet will disintegrate and release available chlorine into the water. Do not add water to this product. Add only into water.

FIRST AID:

IF IN EYES:
Hold eye open and rinse slowly and gently with water. Remove contact lenses, if present, after the first five minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING:
Take off contaminated clothing and wash skin with soap and water. If able to swallow: Do not induce vomiting unless told to do so by a doctor. Call a poison control center or doctor for treatment advice.

IF INHALED:
Get person into fresh air and call a poison control center or doctor for treatment advice.

IN CASE OF CONTAMINATION:
Have the product container or label with you when calling a poison control center or doctor. Do not attempt to stop or interfere with the flow of any remaining product in the container.

**Leave approximately 3/4" gap for print limit**
**WARNING**

Use in a floating dispenser, automatic chlorinator or feeder designed for this product, or metal objects.

**METHOD OF APPLICATION:**

Follow "METHOD OF APPLICATION." This dosage may vary with other water treatment products. Make sure previous contained only this product or any device which has previously contained only this trichloro-s-triazinetrione.

**PRECAUTIONARY STATEMENTS:**

- Do not allow this product to contact other water treatment products. If used with a product in the skimmer.
- Do not mix this product with a small amount of other products.
- Do not pre-mix this product. Only add this product directly to your pool.
- Do not mix with other chlorinating compounds.
- Do not allow product to contact any foreign matter, including other water treatment gases.
- Contamination or improper use may cause fire, explosion or the release of toxic gases.
- Do not use this product in a floater or feeder that has been used with other products or dissolve with other water treatment products. Make sure previous contained only this product or any device which has previously contained only this trichloro-s-triazinetrione.
- Use in any chlorinating device which has been used with other products to your pool.
- Do NOT
  - Pre-mix this product. Only add this product directly to your pool.
  - Mix with other products or dissolve with other chlorinating compounds.
  - Use in a floating dispenser, automatic chlorinator or feeder designed for this product, or metal objects.
  - Permit tablets to contact plastic pool linings or skimmer, floater, or feeder.
  - Throw tablets directly into pool. The container in use. Store in a cool, dry, well-ventilated area. Keep away from children.

**ENVIRONMENTAL HAZARDS:**

This pesticide is toxic to fish (like a lighted cigarette). To protect the environment, do not contaminate water when disposing of equipment or materials used to handle or store pesticides.

**STORAGE AND DISPOSAL:**

- Keep container and any remaining contaminated material in an approved landfill area.
- Offer for recycling if available. If not, discard in a safe and approved manner as directed in the container label. Do not contaminate water when disposing of equipment or materials used to handle or store pesticides.

**DIRECTIONS FOR USE:**

- Read the precautionary statements.
- Maintain the following water balance:
  - pH between 7.2 and 7.6
  - Available Chlorine above 200 ppm
  - Total 100.0%

**ALGAE CONTROL:**

- As a preventative treatment, you must shock treat to remedy problems which may occur when bathing loads are high, water appears hazy or dull, unpleasant odors or eye irritation occur, after heavy wind or rain storms, or if algae does develop with resulting green color and slimy feeling.
- After shock treatment, thoroughly clean pool by scrubbing surface of algae growth, vacuum and cycle through filter. If algae control is needed to maintain a chlorine residual at 1.0 to 4.0 ppm.
- Follow "METHOD OF APPLICATION." This dosage may vary with other water treatment products. Make sure previous contained only this product or any device which has previously contained only this trichloro-s-triazinetrione.

**FIRST AID**

**IF IN EYES:**

- Hold eye open and rinse slowly and gently with plenty of water for 15-20 minutes. Remove contact lenses, if present, before rinse with water.

**IF ON SKIN OR CLOTHING:**

- Remove and wash contaminated clothing before reuse. Rinse skin immediately with plenty of water for 15-20 minutes.

**IF INHALED:**

- Move person to fresh air. If person is not breathing call 911 or an ambulance, then give artificial respiration, preferably by mouth if possible. Call a poison control center or doctor, or go for treatment.

**IF SWALLOWED:**

- Do not induce vomiting unless told to do so by the poison control center or doctor. Never give anything by mouth to an unconscious person. Do not remove foreign matter from the mouth of an unconscious person. Do not give water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor.

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS:**

The use of this product on or near fish-bearing waters is prohibited. For aquatic invertebrates, use a minimum of 10 ppm of available chlorine. For aquatic invertebrates, use a minimum of 10 ppm of available chlorine. For aquatic invertebrates, use a minimum of 10 ppm of available chlorine. For aquatic invertebrates, use a minimum of 10 ppm of available chlorine.
**Active Ingredients:**
- Copper Sulfate pentahydrate* 0.38%
- Other Ingredients 5.0%

**3-IN-1 ACTION**
- Sanitizes, prevents algae and clarifies water
- Helps maintain the following water balance:
  - chlorine
  - calcium hardness
  - pH

**SANITIZES, PREVENTS ALGAE AND CLARIFIES WATER**
- Use bare hands when handling product. Do not allow product to contact any foreign matter, including other water treatment products. Make sure skimmer is completely clean and free of residue from other water treatment products. Use in a new chlorinating device or any device which has previously contained only this product in the skimmer. If placed in the skimmer, run the filter pump a minimum of 15-20 minutes. Call a poison control center or doctor for treatment advice.

**METHOD OF APPLICATION:**
- Do not mix with other products or dissolve. Do not remove floater or other dispensing device from water for more than five minutes if it contains a tablet or tablet residue. Do not mix this product with a small amount of water, it can react to cause explosions or the release of toxic gases. • Keep all foreign matter, including other water treatment products, away from this product.

**KEEP OUT OF REACH OF CHILDREN**
- Contamination or improper use can cause death, including the release of toxic gases. • Do not allow this product to contact other water treatment products. If used with a chlorinating device which has been used for any purpose other than this product, it will not give the same effective results. • Place in skimmer.

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**
- Possible mucosal damage may occur if inhaled. Harmful if swallowed.

**FIRST AID**
- If swallowed: Do not induce vomiting. Give 1-2 glasses of water to drink. Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not give anything by mouth to an unconscious person.
- If inhaled: Move person to fresh air. Call 911 or an ambulance then give artificial breathing if necessary. Call a poison control center or doctor for treatment advice.

- IF SKIN CONTACT:
  - Remove contaminated clothing before reuse.
  - Wash skin with plenty of water for 15-20 minutes. Remove contact lenses, if present, after the first five minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

- IF EYES CONTACT:
  - Do not rub eyes. Wash eyes with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

- IF IN EYES:
  - Wash eyes with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
