PROeguard Ablative

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

PRODUCT DESCRIPTION: This product uses Ablative Copolymer Technology to enable it to wash away with ease, constantly exposing fresh and effective blisters. This Ablative Copolymer Technology also eliminates the build-up of old spent coatings and the heavy sanding needed to remove them. This product provides season long protection against algae, barnacles and other forms of marine fouling in water with moderate to heavy fouling. For use in fresh, salt and brackish waters.

COMPATIBILITY: This product can be applied over existing antifouling as long as the old coating is tightly adhered and is in sound condition. When applying over conventional antifouling paints, thoroughly sand with 80 grit wet-or-dry sandpaper. Soft sandblasted coatings should be removed prior to application of this product.

VOC: Less than 370 grams/liter

COATS REQUIRED: 3 coats, 3 coats on bare wood

THINNING: Thin only if necessary. Do not exceed 10% by volume

THINNER: Interlux® Brush Ease 433

DRY TIMES: Touch dry - 2 hours, 77°F (25°C) To Record - 16 hours

CLEAN UP: Interlux® Brush Ease 433

THEORETICAL COVERAGE: 450 sq. ft./gallon

APPLICATION TEMPERATURE: 60°F (16°C) and above

APPLICATION SYSTEMS

PREVIOUSLY PAINTED SURFACES - GOOD CONDITION: Remove all traces of loose paint and contamination by sanding the entire surface well with 80 grit sandpaper, wipe surface clean with Interlux® Special Thinner 216. Stir thoroughly. Touch up bare areas. Apply two full coats of this product by brush or 3/8 nap roller. Do not apply thin coats. After curing application, the brush or roller drama with Interlux® Brush Ease 433 to improve handling. See compatibility section for additional information.

PREVIOUSLY PAINTED SURFACES - POOR CONDITION: Completely remove all old antifouling paint with Interlux® Fiberglass Pintos® 299 or fiberglass and epoxy surfacings. Interlux® Pintos® 109 for woods and by sandblasting underwater metals to near white metal. Proceed with application system for bare wood as described below.

BARE FIBERGLASS - (POLYESTER OR VINYLSTER)

SURFACE PREPARATION: Wash entire surface thoroughly with Interlux® Fiberglass Solvent Wash 202 changing rags frequently. Before liquid dries, wipe with a clean dry cloth. The sure all dirt and other contaminate is removed. Failure to properly clean the surface will result in paint delamination. Sand any imperfections and repair with Interlux® Surfacings and Filling Compound 417A/418B sand and wipe down. Sanding does not remove surface contamination.

BARE FIBERGLASS - NO SAND SYSTEM: After the surface has been prepared as described above. Apply one thin continuous coat of Interlux® AL200 Fiberglass Primer® with brush or roller. Follow label directions for overcoating. Apply two coats of this product.

BARE FIBERGLASS - SANDING SYSTEM: After the surface has been prepared as described above. Sand entire surface well with 80 grit sandpaper. Wipe off sanding residue with Interlux® Fiberglass Solvent Wash 202™. Apply two coats of this product.

BARE WOOD: Remove any surface contamination by wiping with Interlux® Special Thinner 216. Sand entire surface with 80 grit sandpaper. Wipe off sanding residue with Interlux® Special Thinner 216. Repair any imperfections with Interlux® Surfacings and Filling Compound 417A/418B sand and wipe clean. Apply first coat of this product reduced with Interlux® Brush Ease 433 (10%) maximum. Apply two additional coats untreated. Allow a minimum of 16 hours between coats. Fill any craters or imperfections with Interlux® Seam Compound 30 between first and second coats of antifouling paint.

UNDERWATER METALS: Contact the Interlux® Technical Service Department at 1-800-468-7597 for full details on how to properly prime underwater metals. Do not use on aluminum.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

Causes eye irritation. Harmful if inhaled through skin. Avoid contact with skin, eyes or clothing. Wear protective clothing such as gloves, long-sleeved cotton shirt, long pants and boots. May be fatal if swallowed or inhaled. Do not breathe vapors or spray mist. While spraying paint or sanding or sandblasting boat surfaces wear a mask or a respirator approved by the Mine Ventilation and Safety Administration and the National Institute for Occupational Safety and Health. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling.

FIRST AID

If swallowed:
- Immediately call a poison control center or doctor.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give any liquid to the person.
- Do not give anything by mouth to an unconscious person.

If on skin or clothing:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

If inhaled:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible.
- Call a poison control center or doctor for further treatment advice.

If in eyes:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for further treatment advice.

Other: Have the product container or label with you when calling a poison control center or doctor or going for treatment.

Note to Physician: Contains petroleum distillate - vomiting may cause aspiration pneumonitis.

ENVIRONMENTAL HAZARDS

This material is toxic to fish. Do not apply directly to water by cleaning of equipment or disposal of waste. Do not allow chips and dust generated during point removal to enter water. Dispose of paint cans in an approved landfill. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans and other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your local State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD: Flammable. Keep away from heat, sparks or open flames.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed. Store in discrete containers. Pesticide disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticides, spray mixtures or inside is a violation of Federal Law. If these wastes cannot be disposed of by use agreed to by labeling instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative of the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Non-refillable container. Do not reuse or refill the container. Take it to a hazardous waste disposal facility or to a licensed hazardous waste facility. Do not pour into public waters. Do not flush into sewer systems. Do not place in trash bins.

To Launch: Minimum 16 hours. Maximum – 60 days

CLEAN UP: Interlux® Brush Ease 433

THEORETICAL COVERAGE: 455 sq. ft./gal/coat

APPLICATION TEMPERATURE: 50°F (10°C) and above

APPLICATION SYSTEMS

PREVIOUSLY PAINTED SURFACES – GOOD CONDITION: Remove all traces of loose paint and contamination by sanding the entire surface well with 80 grit sandpaper. Wipe surface clean with Interlux Special Thinner 216. Stir thoroughly. Touch up bare areas. Apply two full coats of this product by brush or 3/8 inch roller. Do not apply thin coats. If during application, the brush or roller begins to drip, thin with Interlux® Brush Ease 433 to improve handling. See compatibility section for additional information.

PREVIOUSLY PAINTED SURFACES – POOR CONDITION: Completely remove all old antifouling paint with Interlux® Fiberglass Primer/Stop 299 or fiberglass and epoxy surfaces, Interlux® Primer/Stop 199 for wood and by sandblasting underwater metal to near white metal. Proceed with application system for bare wood at described below.

BARE FIBERGLASS – (POLYESTER or VINYLSTER)

SURFACE PREPARATION: Wash entire surface thoroughly with Interlux® Fiberglass Solvent Wash 202 changing rags frequently. Before liquid dries, wipe with a clean dry cloth. Be sure all wax and other contamination is removed, failure to properly clean the surface will result in paint delamination. Sand any imperfections and repair with Interlux® Surface and Filling Compound 417A/418B. Sand and wipe clean. Sanding does not remove surface contamination.

BARE FIBERGLASS – NO SAND SYSTEM: After the surface has been prepared as described above – Apply one continuous coat of Interlux® All200 Fiberglass Primer/Stop with brush or roller. Follow label directions for recoating. Apply two coats of this product.

BARE FIBERGLASS – SANDING SYSTEM: After the surface has been prepared as described above – Sand entire surface well with 80 grit sandpaper. Wipe off sanding residue with Interlux® Fiberglass Solvent Wash 202. Apply two coats of this product.

BARE WOOD: Remove any surface contamination by wiping with Interlux® Special Thinner 216. Repair any imperfections with Interlux® Surface and Filling Compound 417A/418B, sand and wipe clean. Apply first coat of this product according to Interlux® Brush Ease 433 (10% maximum). Apply two additional coats unthinned. Allow a minimum of 16 hours between coats. Fill blisters if necessary with Interlux® Sewn Compound 30 between first and second coats of antifouling paint.

UNDERWATER METALS: Contact the Interlux® Technical Service Department at 1-800-848-7789 for full details on how to properly prime underwater metals. Do not use on aluminum.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

Causes eye irritation. Harmful if inhaled through skin. Avoid contact with skin, eyes or clothing. Wear protective clothing such as gloves, long-sleeved cotton shirt, long pants and hat. May be fatal if swallowed or inhaled. Do not breathe vapor or spray mist. While spraying, paint or sanding or sandblasting boat surfaces wear a mask or a respirator firmly approved by the Mining Enforcement and Safety Administration and the National Institute for Occupational Safety and Health. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling.

FIRST AID

If swallowed:

APPLICATION SYSTEMS

PREVIOUSLY PAINTED SURFACES - GOOD CONDITION: Remove all traces of loose paint and contamination by sanding the entire surface well with 80 grit sandpaper. Wipe surface clean with Interlux® Special Thinner 210. Stir thoroughly. Touch up bare areas. Apply two full coats of this product by brush or 3/8 nap roller. Do not apply thin coats. If during application, the brush or roller drags, thin with Interlux® Brush Ease 433 to improve handling. See compatibility section for additional information.

PREVIOUSLY PAINTED SURFACES - POOR CONDITION: Completely remove all old antifouling paint with Interlux® FiberglassPrint® 200 for fiberglass and epoxy surfaces, and Interlux® Print® 199 for wood and by sandblasting underwater marine to nearly white metal. Proceed with application system for bare wood as described below.

BARE FIBERGLASS - (POLYESTER or VINYLSTER)

SURFACE PREPARATION: Wash entire surface thoroughly with Interlux® Fiberglass Solvent Wash 202, changing rags frequently. Before liquid diets, wipe with a clean dry cloth. Be sure all wax and other contamination is removed, failure to properly clean the surface will result in paint detachment. Sand any imperfections and repair with Interlux® Surfacing and Filling Compound 417A/418B sand and wipe clean. Sanding does not remove surface contamination.

BARE FIBERGLASS - NO SAND SYSTEM: After the surface has been prepared as described above - Apply one thin, continuous coat of Interlux® A200 Fiberglass Primer with brush or roller. Follow label directions for overcoating. Apply two coats of this product.

BARE FIBERGLASS - SANDING SYSTEM: After the surface has been prepared as described above - Sand entire surface well with 80 grit sandpaper. Wipe off sanding residue with Interlux® Special Thinner 210. Repair any imperfections with Interlux® Surfacing and Filling Compound 417A/418B sand and wipe clean. Apply first coat of this product reduced with Interlux® Brush Ease 433 (30%, maximum). Apply two additional coats undiluted. Allow a minimum of 16 hours between coats. Fill seams (if necessary) with Interlux® Seam Compound 33 between first and second coats of antifouling paint.

UNDERWATER METALS: Contact the Interlux® Technical Service Department at 1-800-468-7569 for full details on how to properly prime underwater metal. Do not use on aluminum.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

Causes eye irritation. Harmful if inhaled through skin. Avoid contact with skin, eyes or clothing. Wear protective clothing such as gloves, long-sleeved cotton shirt, long pants and shoes. May be fatal if swallowed or inhaled. Do not breathe vapor or spray mist while spraying paint or sanding or sandblasting boat surfaces or a mask. Use a respirator. All personnel must be suitably trained. Federal and state laws require the use of respirators. The National Institute for Occupational Safety and Health (NIOSH) recommends the use of a respirator if operations are conducted in areas where the concentration of spray or dust is a health or respiratory hazard. The respirator must be properly fitted to the user. Be sure the breathing apparatus is kept clean and in working order. Provide medical supervision if necessary. Do not use on aluminum, fiberglass, or wood. Do not use on painted surfaces that are not thoroughly cleaned with Interlux® Special Thinner 210. Do not use on painted surfaces that are not thoroughly cleaned with Interlux® Special Thinner 210.

FIRST AID

If swallowed:

- Immediately call a poison control center or doctor.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give any liquid to the person.
- Do not give anything by mouth to an unconscious person.
- If on skin or clothing:
- Take contaminated clothing off.
- Wash skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

If inhaled:

- Remove person to fresh air.
- If person is not breathing, call 911 or an ambulance. Then give artificial respiration, preferably mouth to mouth if possible.
- Call a poison control center or doctor for further treatment advice.

If in eyes:

- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes. Then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

Other:

Have the product container or label with you when calling a poison control center or doctor or going for treatment.

Note to Physician: Contains petroleum distillate - vomiting may cause aspiration pneumonia.

ENVIRONMENTAL HAZARDS:

The material is toxic to fish. Do not apply directly to water by clearing of equipment or disposal of wastes. Do not allow chips and dust generated during paint removal to enter water. Dispose of paint sludges in an approved landfill. Do not discharge effluent containing the product into lakes, streams, ponds, estuaries, oceans and other water bodies in accordance with the requirements of the National Pollution Discharge Elimination System (NPDES) permit and the permitting authorities. Contact your State Pollution Control Authority for guidance. Contact your local State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD:

Flammable. Keep away from heat, sparks or open flames.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE DISPOSAL: Pesticide wastes are hazardous. Improper disposal of excess pesticide spray rinse water or runoff is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Non-hazardous container. Do not reuse or refill this container. Triple rinse as follows: Simply the remaining contents into application equipment or a clean tank, and drain for 10 seconds after the flow ceases to drip. Fill the container 1 full with water and record. Step by step until it cretes into application equipment or a mix tank or store in a protected area for use or disposal. Drain for 10 seconds after the flow ceases to drip. Repeat this procedure two more times.
