MICRON® CF

PRODUCT DESCRIPTION: Micron CF is a copper free antifouling that provides excellent protection from shell and wire fouling. It uses Biolux® technology to block slime and encrustation off barnacles and zebra mussels. The fast dry formula of Micron CF allows the boat to be painted and launched quickly and its abrasive action reduces paint build up and helps to improve hull efficiency. Micron CF is available in bright colors and is suitable for use on all boats including fiberglass, aluminum, wood, ad steel and can be used in wall waters. Micron CF can be brush or roller applied.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

GENERAL APPLICATION PROCEDURES: For applications by residential (non-commercial) users. Do not apply by aerial spray. Do not apply more than one coat of this product within 24 hours. Apply only in outdoor, non-enclosed spaces. Apply at least 2-3 full coats of Micron CF by brush or resistant 3/8" nap roller. Do not apply thin coats. Micron CF is to be applied in a manner that the film thickness is directly related to the amount of paint applied. Certain areas of the hull, such as the leading edge of the keel and rudder, the waterline and the bow stern polish faster than other areas. On these areas we suggest an additional coat of paint to insure that the Micron CF does not polish away before other areas of the bottom.

Approximate time it will take to paint your boat.

ENVIRONMENTAL HAZARDS

This material is toxic to fish, aquatic invertebrates, oysters, and shrimp. Do not apply directly to water by cleaning of equipment or disposal of wastes. Do not allow chips and dust generated during paint removal to enter water. Dispose of paint debris in an approved landfill. Do not discharge effluent containing this product into lakes, streams, ponds, oceans, or other waters unless in accordance with the requirements of the National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent to sewer system without notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD

FLAMMABLE: Keep away from heat and open flame.

STORAGE AND DISPOSAL

Do not contaminate water, food, feed by storage or disposal. Open drumming is prohibited.

PESTICIDE STORAGE: Store in a cool, dry place.

PESTICIDE DISPOSAL: Pesticide wastes are usually hazardous. Improper disposal of excess pesticide, spray mixture or residue is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or your hazardous waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinse into application equipment or a mix tank or stone rinses for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

FOR CHEMICAL EMERGENCY, SPILL, LEAK, EXPOSURE OR ACCIDENT, "ALL TOLL FREE": CHEMTRACE 1-800-424-9500 (DAY OR NIGHT) MEDICAL ADVISORY: CONTACT YOUR LOCAL POISON CONTROL CENTER OR CALL 1-800-854-6613.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

KEEP OUT OF REACH OF CHILDREN

DANGER

Corrosive. Causes irreversible eye damage or skin burns. Harmful if absorbed through skin. Do not get in eyes or on clothing. Harmful if swallowed and inhaled. Do not breathe dust, vapour or spray mist. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.

Residential (non-commercial) users are advised to wear chemical resistant gloves, protective eyewear (goggles, safety glasses or face shield), long sleeved shirt and long pants, socks and shoes. In addition to these, the maximum PPE, commercial users must wear a disposable coverall with hood and chemical resistant footwear.

While removing existing paint by sanding or blasting, or applying new antifouling paint, commercial users must wear a respirator with an organic vapor removing cartridge with a prefilter approved for pesticides (MSHA/NIOSH approval number prefilter TC-230) or a canister approved for pesticides (MSHA/NIOSH approval number TC-140) or a NIOSH approved full face respirator with an organic vapor removing cartridge with a P100 prefilter. Residential (non-commercial) users are advised to wear the same respirators, cartridges, and prefilters as required by commercial users.

FIRST AID IN THE EYES: Hold eyes open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, and then continue rinsing. Call a Poison Control Centre or doctor for treatment advice.

IF SWALLOWED: immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED: Move a person to fresh air. If person is not breathing, call 011 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

Note: Have the product container or label with you when calling a poison control center or doctor or going for treatment.

Note to physician: Contains petroleum distillate—vomiting may cause aspiration pneumonia.

PREPARATION

BARE FIBREGLASS: It is very important that bare fibreglass be properly prepared to remove the mold release wax completely to prevent delaminating the antifouling paint. Begin by scrubbing the surface thoroughly with a stiff brush using soap and water to remove loose dirt and contamination. Flush with fresh water to remove the soap residues and allow to dry. Remove mold release was using one of the following interplex products: Fibreglass Surface Pre YMA661, Fibreglass Schvent Wash 202 or Low V.O.C. Fibreglass Schvent Wash 207 following the product label instructions. To be certain that all of the contamination Has been removed, run water over the surface. If the water breaks up or separates, clean again. When the water sheaths off, all contamination has been removed.

BARE FIBREGLASS — NO SAND SYSTEM: Clean the surface following the preparation procedure above. Repair any surface imperfections using Interplex Watertite filler. Sand and wipe clean. Apply one coat, using one of the following Interplex Products: InterProtect E0000 or No Sand Primer YMA200, following the label instructions for applying the primer and overcoating with antifouling paint. BARE FIBREGLASS — SANDING SYSTEM: Clean the following the preparation procedure above. Repair any surface imperfections using Interplex Watertite filler. Sand and wipe clean. After the surface has been cleaned sand with 80-grit sandpaper until a flat, matte finish has been obtained. Wipe off the sanding residue with Fiberglass Schvent Wash 202. BARE WOOD: Sand entire surface thoroughly to a smooth finish with 80-grit sandpaper. Clean the sanding residue. Prime with Interlux Thinner 10% with Special Thinner 216 or this exact coat of Micron CF 10% with Special Thinner 216. Apply two more coats of this product undiluted, allowing proper dry times.

ALUMINUM & UNDERWATER METALS: Please check datasheet for preparation to aluminum and underwater metals or contact Interlux Technical Service at 1-900-468-7889.

PREVIOUSLY PAINTED SURFACES: Is Good Condition. Remove all contamination. Sand the entire surface with 80 grit sandpaper; remove sanding residue. In Poor Condition: Remove all previous coatings using Interflex 2056 and proceed with the system for the lane substrates.

APPLICATION

After the surface has been properly prepared and cleaned as above, apply two coats of Micron CF (3 or bare wood) by brush or roller. (Residential users). Commercial (non-residential) users may apply Micron CF by airless spray while wearing the proper personal protective equipment. (Non-Residential users)

NOTE: Important: Do not apply Micron CF above the true waterline.

MICRON® CF

PRODUCT DESCRIPTION: Micron CF is a copper free antifouling that provides excellent protection from shell and weed fouling. It uses Biosil® technology to block slime and Econos to ward off barnacles and zebra mussels. The fast dry formula of Micron CF allows the boat to be painted and launched quickly and its additive action reduces paint build up and helps to improve efficiency. Micron CF is available in bright colors and is suitable for use on all boats including fiberglass, aluminum, wood ad steel and can be used in wall waters. Micron CF can be brush or roller applied.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. GENERAL APPLICATION PROCEDURES: For applications by residential (non-commercial) users: Do not apply by airbrush. Do not apply more than one coat of this product within 24 hours. Apply only in outdoor Non-enclosed spaces. Apply at least 2-3/4" coats of Micron CF by brush or resistant 3/8" nap roller. Do not apply thin coats. Keep in mind that the life of the paint is directly related to the amount of paint applied. Excellent areas of the hull such as the leading edge of the keel and rudder, the waterfront and the bow stem should not be thinner than 0.001" and the waterline and the bow stem poorer than 0.0012". On these areas we suggest an additional coat of paint to insure that the Micron CF does not polish away before other areas of the bottom. Approximate time it will take to paint your boat.

Best Size / Application Time:
- **Residential**: 1” x 40 Minutes per coat; 20’ 1 Hour 23 Minutes per coat; 30’ 2 Hour 40 Minutes per coat
- **V.O.C.**: Less than 330 grams/liter (7.5 Rs./gallon)

THEORETICAL COVERAGE: 520 ft²/l (2 ml dry film thickness).

Thinner: Special Thinner 216

Thinning: Do not exceed 10% by volume.

**Drying Time**

- If the air temperature falls below 41°F (5°C) during the 4 hour dry time extend the dry times to 24 hours minimum.
- Compatibility: Micron CF is compatible with most other antifouling paints and can be applied to bare metal, sanding the surface. Tin based olyophos should be removed or sealed with Primonic YPA48 or Teff Storer YPA67.

**PREPARATION**

BARE FIBREGLASS: It is very important that bare fibreglass be properly prepared to remove the mold release wax completely to prevent deteregradation of the antifouling paint. Begin by scrubbing the surface thoroughly with a stiff brush using soap and water to remove loose dirt and contamination. Wash with fresh water to remove the soap residue and allow to dry. Remove any residue wax using any of the following:

- Surface Pre YMA601, Fibreglass Solvent Wash 038 or Low VOC Fibreglass Solvent Wash 032 following the product label instructions. To be certain that all of the contamination has been removed, run water over the surface. If the water beads up or separates, clean again. When the water sheets off, all contamination has been removed.

**BARE FIBREGLASS—NO SAND SYSTEM:** Clean the surface following the preparation procedure above. Repair any surface imperfections using Interlux Ytelli filler. Sand and wipe clean. Apply one coat, using one of the following Interlux Products: InterProtect/900 or No Sand Primer YPA100 following the label instructions for applying the primer and overcoating with antifouling paint. **BARE FIBREGLASS—SANDING SYSTEM:** Clean the surface following the preparation procedure above. Repair any surface imperfections using Interlux Ytelli filler. Sand and wipe clean. After the surface has been cleaned with sand 80 grit paper until a flat, matte finish has been obtained. Wash off the sanding residue with Fiberglass Solvent Wash 032. BARE WOOD—Sand entire surface thoroughly off to a smooth finish with 80 grit sandpaper. Clean off the sanding residue. Prime with Primona Thinner 10% with Special Thinner 216 or thin first coat of Micron CF 40-50% with Special Thinner 216. Apply two more coats of this product unthinned, allowing appropriate dry times.

**ALUMINUM & UNDERWATER METALS:** Please check list. After the surface has been properly prepared and cleaned as above, apply two coats of Micron CF (3 or bare wood) by brush or roller (Residential users). Commercial (non-residential) users may apply Micron CF by airless spray while wearing the proper personal protective equipment.

**NOTE:** Important: Do not apply Micron CF in the above seawater.

**APPLYICATION**

After the surface has been properly prepared and cleaned as above, apply two coats of Micron CF (3 or bare wood) by brush or roller (Residential users). Commercial (non-residential) users may apply Micron CF by airless spray while wearing the proper personal protective equipment.

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS KEEP OUT OF REACH OF CHILDREN**

**DANGER**

Coralicide. Causes irreversible eye damage or skin burns. Harmful if absorbed through skin. Do not get in eyes, on skin or on clothing. Harmful if inhaled. Do not breathe dust, vapor or spray mist. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.

Residential (non-commercial) users are advised to wear chemical resistant gloves, protective eyewear (goggles, safety glasses or face shield), long sleeved shirt and long pants, socks and shoes. In addition to these protective measures, commercial users must wear a disposable overjacket, PPB and chemical resistant footwear. While removing existing paint by sanding or blasting, or applying new antifouling paint, commercial users must wear a respirator with an organic vapour removing cartridge with a filter approved for pesticides (MSHA/NOSH approval number prefix TC-23C) or a canister approved for pesticides (MSHA/NOSH approval number prefix TC-14) or a NOSH approved full face respirator with an organic vapour removing cartridge with a P100 filter. Residential (non-commercial) users are advised to wear the same respirators, cartridges, and prefilters as commercial users.

**FIRST AID**

**IN THE EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, and continue rinsing. Call a Poison Control Centre or doctor for treatment advice.

**IF SWALLOWED:** Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

**IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

**IF INHALED:** Remove person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

**IN OTHERS:** Have the product container or label with you when calling a poison control center or doctor or going for treatment.

**To note to physician:** Corrosive: petroleum distillate – vomiting may cause aspiration pneumonia.

**ENVIRONMENTAL HAZARDS**

This material is toxic to fish, aquatic invertebrates, birds, and algae. Do not apply directly to water by cleaning of equipment or disposal of wastes. Do not allow chips and dust generated during paint removal to enter water. Dispose of paint debris in an approved landfill. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent to sewer system without notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

**PHYSICAL OR CHEMICAL HAZARD**

**FLAMMABLE:** Keep away from heat and open flame.

**STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by disposal or disposal. Open dumping is prohibited.

**PESTICIDE STORAGE:** Store in a cool, dry place.

**PESTICIDE DISPOSAL:** Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixtures or residue is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, consult your State Pesticide or Environmental Control Agency, or Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**CONTAINER DISPOSAL:** Nonrefillable container. Do not reuse or refill this container. Rinse container. Empty all remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ¾ full with water and recaps. Shake for 10 seconds. Poor rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

For CHEMICAL EMERGENCY, SPILL, LEAK, EXPOSURE OR ACCIDENT, CALL TOLL FREE: CHEMTREC 1-800-424-9300 (DAY OR NIGHT) MEDICAL ADVISORY: CONTACT YOUR LOCAL POISON CONTROL CENTER OR CALL 1-800-854-6813.

*If the air temperature falls below 41°F (5°C) during the 4 hour dry time extend the dry times to 24 hours minimum.

COMPATIBILITY: Micron CF is compatible with most anti-fouling paints and can be applied over sanding the surface. Tin based copolymers should be removed or sealed with Primlcon YPA964 or TIB Sealer YPA987.

PREPARATION

BARE FIBREGLASS: It is very important that bare fibreglass be properly prepared to remove the mold release wax completely to prevent contamination of the antifouling paint. Begin by scrubbing the surface thoroughly with a stiff brush using soap and water to remove loose dirt and contamination. Flush with fresh water to remove the soap residue and allow to dry. Remove mold release wax using one of the following interlock products. Fibreglass Surface Pre YMA901, Fibreglass Solvent Wash 202 or Low VOC Fibreglass Solvent Wash 202V following the product label instructions. To be certain that all of the contamination has been removed, run water over the surface. If the water looks dirty or soapy, clean again. When the water sheets off, all contamination has been removed.

BARE FIBREGLASS - NO SAND SYSTEM: Clean the surface following the preparation procedure above. Repair any surface imperfections using Interlock Watertite filler. Sand and wipe clean. Apply one coat, using one of the following interlock products: Interlock Pre/Protect 200 or No Sand Primer YPA200, following the label instructions for applying the primer and overcoating with anti-fouling paint. BARE FIBREGLASS - SANDING SYSTEM: Clean the surface following the preparation procedure above. Repair any surface imperfections using Interlock Watertite filler. Sand and wipe clean. After the surface has been cleaned sand with 80-grit sandpaper until a flat, matte finish has been obtained. Wipe off the sanding residue with Fibreglass Solvent Wash 202. BARE WOOD: Sand surface thoroughly to a smooth finish with 80-grit sandpaper. Clean off the sanding residue. Prime with Primlcon thinned 10% with Special Thinner 216 and thin first coat of Micron CF 15% with Special Thinner 216. Apply two more coats of this product uninterrupted, allowing appropriate dry times.

ALUMINUM & UNDERWATER METAL: Please check datasheet for preparation to aluminum and underwater metal for your specific application at Technical Service at 1-800-400-7560.

PREVIOUSLY PAINTED SURFACES: Is Good Condition. Remove all contamination. Sand the entire surface with 80-grit sandpaper; remove sanding residue. In Poor Condition: Remove all previous coatings using Intership 258E and proceed with the system for the base substrate.

APPLICATION

After the surface has been properly prepared and cleaned as above, apply two coats of Micron CF (3 on bare wood) by brush or roller (residential users). Commercial (non-residential) users may apply Micron CF by airbrush spray while wearing the proper personal protective equipment.

NOTE: Important: Do not apply Micron CF above the true waterline.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

KEEP OUT OF REACH OF CHILDREN

DANGER

Corrosive. Causes irreversible eye damage or skin burns. Harmful if absorbed through skin. Do not get in eyes, on skin or on clothing. Harmful if swallowed and inhaled. Do not breathe dust, vapour or spray mist. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Residential (non-commercial) users are advised to wear chemical resistant gloves, protective eyewear (goggles or face shield), long sleeve shirt and long pants, socks and shoes. In addition to these, minimum PPE, commercial users must wear a disposable coverall with hood and chemical resistant footwear. While removing existing paint by sanding or blasting, or applying any antifouling paint, commercial users must wear a respirator with an organic vapour removing cartridge with a prefilter approved for pesticides (N95/KN95/ND展望 respirator prefix TC-293, or a canister approved for pesticides (N95/KN95/ND展望 respirator number TC-14) or a N95 approved full face respirator with an organic vapour removing cartridge with a P100 prefilter. Residential (non-commercial) users are advised to wear the same respirators, cartridges, and prefilter as required by commercial users.

FIRST AID

IN THE EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, and then continue rinsing. Call a Poison Control Centre or doctor for treatment advice.

IF SWALLOWED: Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED: Move a person to fresh air. If person is not breathing, call 011 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

OTHER: Have the product container or label with you when calling a poison control center or doctor or going for treatment.

Note to physician: Contains petroleum distillate — vomiting may cause aspiration pneumonia.

ENVIRONMENTAL HAZARDS

This material is toxic to fish, aquatic invertebrates, oysters, and shrimp. Do not apply directly to water by cleaning of equipment or disposal of wastes. Do not allow chips and dust generated during paint removal to enter water. Dispose of paint debris in an approved landfill. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent to sewer system without notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD

FLAMMABLE: Keep away from heat and open flame.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE STORAGE: Store in a cool, dry place.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinse is a violation of Federal Law. If these wastes cannot be disposed of properly according to label instructions, contact your State Pesticide or Environmental Control Agency, or Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refil this container. Triple rinse as follows: Empty the remaining contents into application equipment or a wax tank and drain for 10 seconds after the flow begins to drip. Fill the container ¾ full with water and recap. Shake for 10 seconds. Pour rinsate into equipment application or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

FOR CHEMICAL EMERGENCY, SPILL, LEAK, EXPOSURE OR ACCIDENT, CALL TOLL FREE: CHEMTREC 1-800-424-9300 (DAY OR NIGHT) MEDICAL ADVISORY: CONTACT YOUR LOCAL POISON CONTROL CENTER OR CALL 1-800-854-6813.

MICRON® CF

PRODUCT DESCRIPTION: Micron® CF is a copper-free anti-fouling paint that provides excellent protection from shell and weed fouling. It uses BioScale technology to block slime and EconoCoat to ward off barnacles and zebra mussel. The first dry film of Micron® CF allows the boat to be painted and launched quickly and its ability to reduce paint build up helps to improve boat efficiency. Micron® CF is available in bright colors and can be used on all boats including fiberglass, aluminum, wood, and steel and can be used in salt water. Micron® CF can be brush or roller applied.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

GENERAL APPLICATION PROCEDURES: For applications by residential (non-commercial) users: Do not apply by airbrush. Do not apply more than one coat of this product within 24 hours. Apply in well-ventilated spaces. Apply at least 2-3 full coats of Micron® CF by brush or solvent resistant 3/8" nap roller. Do not apply thin coats. Keep in mind that the life of the paint is directly related to the amount of paint applied. Certain areas of the hull, such as the leading edge of the keel and rudder, the waterline and the beam stern polish will be the first to fail. On these areas we suggest an additional coat of paint to insure that the Micron® CF does not peel away before other areas of the bottom. Approximate time it will take to paint your boat:

Boat Size / Application Time:
- 45 Minutes per coat;
- 20' 1 Hour 20 Minutes per coat;
- 30' 2 Hour 40 Minutes per coat

V.O.C.: Less than 333 grams/liter (2.2 lbs./gallon)

THEORETICAL COVERAGE: 528 sq.ft./gal (2 sq.ards dry film thickness)

THINNER: Special Thinner 216

THINNING: Do not exceed 10% by volume.

*If the air temperature falls below 41°F (5°C) during the 4 hour dry time extend the dry times to 24 hours minimum.

COATABILITY: Micron® CF is compatible with most other antifouling paints and can be used on copper alloys, and silvering. Tin-based cuprous compounds should be removed or sealed with Piranox YPA884 or TBT Sealer YPA987.

PREPARATION

BARE FIBREGLASS: It is very important that bare fibreglass be properly cleaned to remove the mold release wax completely to prevent delamination if the antifouling paint is applied. Begin by scrubbing the surface thoroughly with a stiff brush using soap and water to remove loose dirt and contamination. Flush with fresh water to remove the soap residue and allow to dry. Remove any mold release wax using one of the following instructions:

Surface Prep YMA601, Fiberglass Solvent Wash 252 or Low VOC Fiberglass Solvent Wash 252 following the product label instructions. Be certain that all of the contamination has been removed, run water over the surface. If the water beeds up or sprosses, check again. When the water subsides off, all contamination has been removed.

BARE FIBREGLASS - NO SAND SYSTEM: Clean the surface following the preparation procedure above. Repair any surface imperfections using Interlux Waterfill Filler. Sand and wipe clean. Apply one coat, using one of the following Interlux Products InterScale/Protect 2000 or No Sand Primer YPA200. Following the label instructions for applying the primer and overcoating with antifouling paint.

BARE FIBREGLASS - SANDING SYSTEM: Clean the surface following the preparation procedure above. Repair any surface imperfections using Interlux Waterfill Filler. Sand and wipe clean. After the surface has been cleaned sand with 80 grit sandpaper until a flat, matte finish has been obtained. Wipe off the sanding residue with Fiberglass Solvent Wash 202. BARE WOOD: Sand entire surface thoroughly to a smooth finish with 80 grit sandpaper. Clean off the sanding residue. Prime with PrimoClear thinned 10% with Special Thinner 216 and first coat of Micron® CF 10-15% with Special Thinner 216. Apply two more coats of this product unthinned, allowing recommended dry times.

ALUMINUM & UNDERWATER METALS: Please check datasheet for preparation to aluminum and underwater metals or contact Interlux Technical Service at 1-800-468-7589.

PREVIOUSLY PAINTED SURFACES: In Good Condition, Remove all contamination. Sand the entire surface with 80 grit sandpaper; remove sanding residue. In Poor Condition: Remove all previous coatings using InterSolvent 2000 and proceed with the system for the bare substrate.

APPLICATION

After the surface has been properly prepared and cleansed as above, apply two coats of Micron® CF (3 or bare wood) by brush or roller (residential users). Commercial (non-residential) users may apply Micron® CF by airless spray or using the proper pressure equipment.

NOTE: IMPORTANT: Do not apply Micron® CF above the true waterline.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS KEEP OUT OF REACH OF CHILDREN

DANGER
Corrosive. Causes irreversible eye damage or skin burns. Harmful if inhaled. Skin: In cases of skin contact, wash with soap and water. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.

Residential (non-commercial) users are advised to wear chemical resistant gloves, protective eyewear (goggles, safety glasses or face shield), long sleeved shirt and long pants, socks and shoes. In addition to these instructions, professional (PPE), commercial and industrial users must wear a disposable coverall with hood and chemical resistant footwear.

While removing existing paint by sanding or blasting, or applying new antifouling paint, commercial users must wear a respirator with an organic vapour removing cartridge with a P100 filter for pesticides (MSHA/NIOSH approval number prefix TC-25C), or a canister approved for pesticides (MSHA/NIOSH approval number prefix TC-14) or a NIOSH approved full face respirator with an organic vapour removing cartridge with a P100 filter. Residential (non-commercial) users are advised to wear the same respirators, cartridges, and prefilters as required by commercial users.

FIRST AID

IN THE EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, and then continue rinsing. Call a Poison Control Centre or doctor for treatment advice.

IF SWALLOWED: Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

Other: Have the product container or label with you when calling a poison control center or doctor or going for treatment.

Note to physician: Contains petroleum distillate – vomiting may cause aspiration pneumonia.

ENVIRONMENTAL HAZARDS

This material is toxic to fish, aquatic invertebrates, and shrimp. It does not apply directly to water by cleaning of equipment or disposal of wastes. Do not allow chips and dust (uncoated) during paint removal to enter water. Dispose of paint debris in an approved landfill. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent to sewer system without notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD

FLAMMABLE: Keep away from heat and open flame.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE STORAGE: Store in a cool, dry place.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or residue is a violation of Federal Law. These wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or Hazardous Waste representative at the nearest E.P.A. Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/2 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

CHEMICAL EMERGENCY: SPILL, LEAK, EXPOSURE OR ACCIDENT, CALL TOLL FREE: CEMTEC 1-800-242-9500 (DAY OR NIGHT) MEDICAL ADVISORY: CONTACT YOUR LOCAL POISON CONTROL CENTER OR CALL 1-800-845-6813.

MICRON® CF

PRODUCT DESCRIPTION: Micron CF is a copper free antifouling that provides excellent protection from shell and weed fouling. It uses Biolox® technology to block slime and Econox to ward off barnacles and zebra mussels. The fast dry formula of Micron CF allows the least to be painted quickly and launched quickly and its ablative action helps paint build up and helps to improve joint efficiency. Micron CF is available in bright colors and is suitable for use on all boats including fiberglass, aluminum, wood ad steel and can be used in salt water. Micron CF can be brush or roller applied.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

GENERAL APPLICATION PROCEDURES: For applications by residential (non-commercial) users: Do not apply by airless spray. Do not apply more than one coat of this product within 24 hours. Apply only in outdoor, non-enclosed spaces. Apply at least 2-3 ft coats of Micron CF by brush or roller after 6 months. Do not apply thin coats. Keep in mind that the rate of the paint is directly related to the amount of paint applied. Certain areas of the hull, such as the leading edge of the keel and rudder, the waterline and the bow stem polish faster than other areas. Do these areas a suggested additional coat of paint to ensure that the Micron CF does not polish away before other areas of the bottom is concluded. Approximate time it will take to paint your boat.

Best Size / Application Time:

4" - 50 minutes per coat; 20" – 1 Hour 20 Minutes per coat; 30" – 2 Hour 40 Minutes per coat

V.O.C.: Less than 330 grams/Hour (2.75 lbs/gallons)

TECHNICAL COVERAGE: 528 square feet per 2 Pints dry film thickness. THINNER: Special Thinner 216

THINNING: Do not exceed 10% by volume.

*If the air temperature falls below 41°F (5°C) during the 4 hour dry time extend the dry times to 24 hours minimum.

COMPATIBILITY: Micron CF is compatible with most other antifouling paints and can be applied after sanding the surface. Tin based copolymers should be removed or sealed with Primcote YPA864 or TBT Sealer YPA867.

PREPARATION

BARE FIBREGLASS: It is very important that bare fiberglass be properly prepared to remove the mold release wax completely to prevent delamination of the antifouling paint. Begin by scrubbing the surface thoroughly with a stiff brush using soap and water to remove loose dust and contamination. Flush with fresh water to remove the soap residue and allow to dry. Remove mold release wax using one of the following bleaches: Fibreglass Surface Pre YMA605, Fibreglass Silvent Wash 202 or Low VOC Fibreglass Silvent Wash 2012 following the product label instructions. To be certain that all of the contamination has been removed, run water over the surface. If the water beads up or separates, clean again. When the water sheet off, all contamination has been removed.

BARE FIBREGLASS – NO SAND SYSTEM: Clean the surface following the preparation procedure above. Repair any surface imperfections using Interlux Watertite filler. Sand and wipe clean. Apply one coat, using one of the following Interlux Products InterPhosphate 2000 or No Sand Primer YPA200, following the labeling instructions for applying the primer and overcoating with antifoul paint. BARE FIBREGLASS – SANDING SYSTEM: Clean the surface following the preparation procedure above. Repair any surface imperfections using Interlux Watertite filler. Sand and wipe clean. The surface has been cleaned sand with 60-grit sandpaper until a flat, matte finish has been obtained. Wipe off the sanding residue with Fiberglass Silvent Wash 202. BARE WOOD: Sand entire surface thoroughly to a smooth finish with 80-grit sandpaper. Clean off the sanding residue. Prime with Primcote thinned 10% with Special Thinner 216 or thicken first coat of Micron CF 10-15% with Special Thinner 216. Apply two more coats of this product untinted, allowing appropriate dry times.

ALUMINUM & UNDERWATER METALS: Please check dataseat for preparation to aluminum and underwater metals or contact Interlux Technical Service at 1-800-468-7569.

PREVIOUSLY PAINTED SURFACES: In Good Condition: Remove all contamination. Sand the entire surface with 80-grit sandpaper; remove sanding residue. In Poor Condition: Remove all previous coatings using Interlining 250E and proceed with the system for the best substrate.

APPLICATION

After the surface has been properly prepared and cleaned as above, apply two coats of Micron CF (3 on bare wood) by brush or roller (Residential users). Commercial (non-residential) users may apply Micron CF by airless spray while wearing the proper personal protective equipment.

NOTE: Important: Do not apply Micron CF above the true waterline.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

KEEP OUT OF REACH OF CHILDREN

DANGER

CORROSIVE: Causes irreversible eye damage or skin burns. Harmful if absorbed through skin. Do not get in eyes, on skin or on clothing. Harmful if swallowed and inhaled. Do not breathe dust, vapour or spray mist. Remove contaminated clothing and wash skin before reuse. Wash thoroughly with soap and water after handling. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.

Residential (non-commercial) users are advised to wear chemical resistant gloves, protective eyewear (goggles, safety glasses or face shield), long sleeved shirt and long pants, socks and shoes. In addition to these minimum PPE, commercial users must wear a disposable coverall with hood and chemical resistant footwear.

While removing existing paint by sanding or blasting, or applying new antisubstant paint, commercial users must wear a respirator with an organic vapour removing cartridge with a P100 filter. Residential (non-commercial) users are advised to wear the same respirators, cartridges, and prefilters as required by commercial users.

FIRST AID

IN THE EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, and continue rinsing. Call a Poison Control Centre or doctor for treatment advice.

IF SWALLOWED: Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED: Move a person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration and/or mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

Other: Have the product container or label with you when calling a poison control center or doctor or going for treatment.

Note to physician: Contains petroleum distillates – vomiting may cause aspiration pneumonía.

ENVIRONMENTAL HAZARDS

This material is toxic to fish, aquatic invertebrates, oysters, and shrimp. Do not apply directly to water by cleaning of equipment or disposal of wastes. Do not allow chips and dust generated during paint removal to enter water. Dispose of paint debris in an approved landfill. Do not discharge a contaminant containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent to sewer system without notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD

FLAMMABLE: Keep away from heat and open flame.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE STORAGE: Store in a cool, dry place.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixtures or rinsates is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Triple rinse as follows: Empty the remaining contents into appropriate equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

FOR CHEMICAL EMERGENCY; SPILL, LEAK, EXPLOSION OR ACCIDENT, CALL TOLL FREE: CHEMTRACER 1-800-422-9200 (DAY OR NIGHT) MEDICAL ADVICE: CONTACT YOUR LOCAL POISON CONTROL CENTER OR CALL 1-800-222-1222.
