SUPER PRO GUARD

PRODUCT DESCRIPTION
This product provides multi-season antifouling protection against barnacles, algae and hydrilla in salt and fresh water on boat bottoms only. Its ablative caprolene base renders a hard, smooth finish with durability and abrasion resistance. It releases biocides in the constant exposure of new paint film to the water. It has universal application over all types of properly prepared bottom paints (except aluminum). For use on fast fiberglass boats, as well as wood and steel hulls. Extended protection is possible, since performance is directly proportional to the amount of paint applied.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labelling.

SURFACE PREPARATION
Surface must always be clean, dry and properly prepared prior to painting. Failure to do so will lead to eventual blistering and/or peeling. All sandasted surfaces must be wiped clean with Interlux Fiberglass Solvent Wash 202 to remove sanding residue.

GENERAL APPLICATION
For use on boats below the true waterline. Can be brushed or rolled on fiberglass, wood, steel and previously painted surfaces per application systems below. Do not use on aluminum. Apply at least 3 coats for best performance, as the life of the paint is proportional to the number of coats applied.

MIXING AND THINNING
Shake or mix thoroughly and stir continuously while using. Thin when necessary with Interlux Special Thinner 216; Brush Base 433.

THEORETICAL COVERAGE
Depending on surface and conditions, one gallon of bottom paint will usually cover over 300 square feet of surface when brushed or rolled.

CLEAN UP
Interlux Special Thinner 216 for cleaning equipment and paint brushes.

ESTIMATED DRY TIMES
Ready to recoat, designed for overcoating after an overnight dry. To be recoated allow a minimum dry of overnight and maximum of 60 days. If drying conditions are poor or if paint was applied too thickly, longer periods of drying will be required. Fresh coats of paint must be thoroughly dry before overcoating.

YEARLY REPAINTING
Scrub bottom clean at haul-out. Repaint only if old paint is sound and tight. If not, remove it by sanding or with paint remover. If old paint is rough, sand it with 100-150 grit sandpaper. Prepare seams, nick and chips as below. Spotcoat any seams with antifoultant. Apply 3 coats of antifoultant.

ON BARE WOOD: It seams are not flush, fill them with seam compound; dry several days until seam forms. Do not sand. Fill nicks with Interlux Interprotect Waterthite YAV135. Dry hard sand, apply Interlux Penetron 338R. Then apply 3 coats of antifoultant.

ON BARE FIBERGLASS: Dewax by washing with Interlux Fiberglass Solvent Wash 202. Remove dissolved wax and all remaining wax from the hull. Sandhard to a dull finish with 80-100 grit sandpaper. Fill any chips with Interlux Interprotect Waterthite YAV135. Dry hard sand, apply Interlux Interprotect 2000E. Then apply 3 coats of antifoultant.

ON BARE STEEL: Sandblast surface to a near white metal. Remove blast residue with a broom and air hose. Wipe off with Interlux Fiberglass Solvent Wash 202. Do not sand. Fill in any imperfections with filling compound; Sand smooth and wipe clean. Apply 3 coats of Interlux Interprotect 2000E followed by 3 coats of antifoultant.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Causes eye irritation. Harmful if absorbed through skin. Avoid contact with skin, eyes or clothing. Wear protective clothing such as gloves, long sleeve cotton shirt, long pants and shoes. Wear full face protective mask, approved by the NIOSH or CSA. Wear a tight fit respirator approved by the NIOSH or respirator certified to the OSHA standard 1910.134.

First Aid:
If inhaled:
• Remove person to fresh air.
• Give artificial respiration if necessary. If nausea occurs, give treatment for nausea.
• Give 100% oxygen if necessary. If breathing stops, give CPR immediately.
• Call a physician or poison control center.

If swallowed:
• If conscious, give large amounts of water. Do not induce vomiting unless instructed to do so by a physician.
• Place the person down on their side. Give 100% oxygen if necessary. If breathing stops, give CPR immediately.
• Call a physician or poison control center.

If skin or clothing:
• Remove and wash clothing with soap and water. Change and wash clothing.
• Remove contaminated clothing and wash with soap and water before reuse. Avoid contact with skin and eyes.

Inhalation:
• Remove person to fresh air.
• Give artificial respiration if necessary.

Sediment:
• Do not dispose of paints or solvents in drains. Do not dispose of paints or solvents in the body of water.

Environmental Protection
This product is toxic to fish. Do not apply directly to water by cleaning of equipment or disposal of wastes. Do not allow paints and solvents to enter water. Dispose of paint stable in an approved landfill. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans and other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent to sewer systems without prior notification of the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS
Do not use or store near water or open flame.

STORAGE AND DISPOSAL
Do not contaminate waste feed or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticides, spray mixtures, or residues is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, the Hazardous Waste representative of the nearest EPA Regional Office or the nearest State Water Board or Regional Office of the EPA.

CONTAINER DISPOSAL: Non-returnable containers. Do not re-use or refill this container. Dispose of used containers or discarded pesticides.

**SUPER PRO GUARD**

**PRODUCT DESCRIPTION**
This product provides multi-season antifouling protection against barnacles, algae and hydroids in salt and fresh water on boat bottoms only. Its ablative copolymer base renders a hard, smooth finish with durability and rust-inhibition. It releases biocide by the constant exposure of new paint film to the water. It has universal application over all types of properly prepared bottom paints (except aluminum). For use on fast fiberglass boats, as well as wood and steel hulls. Extended protection is possible, since performance is directly proportional to the amount of paint applied.

**DIRECTIONS FOR USE**
It is illegal to violate Federal Law to use this product in a manner inconsistent with its labeling.

**SURFACE PREPARATION**
Surfaces must always be clean, dry and properly prepared prior to painting. Failure to do so will lead to eventual blistering and/or peeling. All painted surfaces must be wiped clean with Interlux Fiberglass Solvent Wash 252 to remove sanding residue.

**GENERAL APPLICATION**
For use on boats below the true waterline. Can be brushed or rolled on fiberglass, wood, steel and previously painted surfaces per application systems below. Do not use on aluminum. Apply at least 3 coats for best performance, as the life of the paint is proportional to the number of coats applied.

**MIXING AND THINNING**
Shake or mix thoroughly and stir continuously while using. Thin when necessary with Interlux Special Thinner 216/Brush Base 433.

**THEORETICAL COVERAGE**
Depending on surface and conditions, one gallon of bottom paint will usually cover over 350 square feet of surface when brushed or rolled.

**CLEAN UP**
Interlux Special Thinner 216 for cleaning equipment and paint brushes.

**ESTIMATED DRY TIMES**
Bottom paints are designed for overcoating after an overnight dry. Prior to launching, allow a minimum dry of overnight and maximum of 60 days, if drying conditions are poor, or if paint was applied too thickly. Longer periods of drying will be required. Fresh coats of paint must be thoroughly dry before overcoating.

**YEARN REPAINTING**
Scrub bottom clean of hull-out. Repaint only if old paint is sound and tight. If not, remove it by sanding or with paint remover. If old paint is rough, sand it with 100-150 grit sandpaper. Prepare seams, nicks and chips as above. Spacecoat any outs with antifoulant. Apply 3 coats of antifoulant.

**ON BARE WOOD**
If seams are not flush, fill them with seam compound; dry several days until skin forms. Do not sand. Fill nicks with Interlux Interprotect Wafelrite YW135. Dry hard, sand, apply Interlux Pronocoat 390R. Then apply 3 coats of antifoulant.

**ON BARE FIBERGLASS**
Dewax by washing with Interlux Fiberglass Solvent Wash 202. Remove dissolved wax with one at a time with clean paper towels or rag; repeat. Sand hard to a dull finish with 80-100 grit sandpaper. Fill any chips with Interlux Interprotect Wafelrite YW135. Dry hard, sand, apply Interlux Interprotect 2000. Then apply 3 coats of antifoulant.

**ON BARE STEEL**

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

Causes eye irritation. Harmful if swallowed through skin. Avoid contact with skin, eyes or clothing. Wear protective clothing such as gloves, long sleeved cotton shirt, long pants and hat. May be fatal if swallowed or inhaled. Do not breathe dust, vapor or spray mist. Wear a mask or respirator jointly approved by the Mining Enforcement and Safety Administration and by the National Institute for Occupational Safety and Health while sanding boat surfaces. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling.

**FIRST AID**
If Swallowed:
- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

If on skin or clothing:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for further treatment advice.

If Inhaled:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
- Call a poison control center or doctor for further treatment advice.

**ENVIRONMENTAL HAZARDS**
This paint is toxic to fish. Do not apply directly to water by cleaning of equipment or disposal of wastes. Do not allow chips and dust generated during paint removal to enter water. Dispose of paint and all waste containing this product into lakes, streams, ponds, estuaries, oceans and other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing not to discharge. Do not discharge effluent to sewer system without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Quality Board, or Environmental Office of the EPA.

**PHYSICAL AND CHEMICAL HAZARDS**
Do not use or store near heat source or open flame.

**STORAGE AND DISPOSAL**
Do not contaminate waste food or feed by storage or disposal. Open dumping is prohibited.

**PESTICIDE DISPOSAL**
Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or waste is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**CONTAINER DISPOSAL**
Non-refillable container. Do not reuse or refill this container. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1 full with water and reinstall the spout. Shake for 10 seconds. Pour the mixture into application equipment or a mix tank or store in a means for later use or disposal. Pertain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

**THEORETICAL COVERAGE**
Depending on surface and conditions, 1 gallon of bottom paint will usually cover over 350 square feet of surface when brushed or rolled.

**CLEAN UP**
Interlux Special Thinner 216 for cleaning equipment and paint brushes.

**DRIED TIMES**
Bottom paints are designed for recoating after an overnight dry. Prior to launching, allow a minimum of 24 hours or maximum of 5 days, if drying conditions are poor, or if paint was applied too thinly, longer periods of drying will be required. Fresh coats of paint must be thoroughly dry before recoating.

**YEARELY REPAINTING**
Scrub bottom clean at haul-out. Repaint only if old paint is sound and light. If not, remove it by sanding or with paint remover. If old paint is rough, sand it with 100-150 grit sandpaper. Prepare seams, nicks and chips as below. Spotcoat any scuffs with antifoult. Apply 3 coats of antifoult.

**ON BARE WOOD**
- If seams are not flush, fill with seam compound; dry several days until skin forms. Do not sand. Fill nicks with Interlux Interprotect Waterline YAW 135. Dry hard, sand, apply Interlux Primocryl 636. Then apply 3 coats of antifoult.
- If seams are dry, fill with compound; dry several days until skin forms. Do not sand. Fill nicks with Interlux Interprotect Waterline YAW 135. Dry hard, sand, apply Interlux Interprotect 2000. Then apply 3 coats of antifoult.

  - Move person to fresh air.
  - If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
  - Call a poison control center or doctor for further treatment advice.

**ENVIRONMENTAL HAZARDS**
The paint is toxic to fish. Do not apply directly to water by cleaning of equipment or disposal of wastes. Do not allow chips and dust generated during paint removal to enter water. Do not handle or store in approved container. Do not discharge effluent into water. Dispose of paint debris in an approved location. Do not apply this product into lakes, streams, ponds, estuaries, oceans and other bodies of water in accordance with the requirements of the National Pollution Elimination System (NPDES) permit and the permitting authority has been notified prior to the discharge. Do not discharge effluent to sewer system without notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

**PHYSICAL AND CHEMICAL HAZARDS**
Do not use or store near heat or open flame.

**STORAGE AND DISPOSAL**
Do not contaminate waterways, food or feed by storage or disposal. Open dumping is prohibited.

**PESTICIDE DISPOSAL**
- Pesticide wastes are usually hazardous. Improper disposal of excess pesticides, spray mixtures, or rinsates is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Agricultural or Environmental Control Authority, of the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**CONTAINER DISPOSAL**
- Non-refillable container. Do not reuse or refill this container.
