PRECAUTIONARY STATEMENTS

Hazard to Humans and Domestic Animals

CAUTION: Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Keep away from children, domestic animals and pets. All handlers (including applicators) must wear long-sleeved shirt, long pants, shoes, socks, and waterproof gloves. Any person who retrieves carcasses or unused bait following application of this product must wear waterproof gloves.

User Safety Requirements: Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions are available, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product.

FIRST AID

Have this label with you when obtaining treatment advice. If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor.

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor immediately for treatment advice.

If on skin or clothing: Take off contaminated clothing. Rinse skin with plenty of cool water for 15-20 minutes. Call a poison control center or doctor immediately for treatment advice.

TREATMENT FOR PET POISONING: If animal eats bait, call veterinarian at once.

NOTE TO PHYSICIAN OR VETERINARIAN: Contains the nerve poison bromethalin. This is not an anticoagulant type rodenticide. For humans or animals ingesting bait and/ or showing obvious poisoning symptoms (muscle tremors, loss of hind limb use, or seizures) limit absorption by emesis or gastric lavage. Sublimate symptoms, if present, result from cerebral edema and should be treated accordingly with osmotic diuretic and corticosteroids.

ENVIRONMENTAL HAZARDS: This product is extremely toxic to mammals and birds. Dogs, cats and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water, or to areas where water surface is present, or to intertidal areas below the high water mark. Do not contaminate water when disposing of equipment wash water or rinsates.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store in original container in a cool, dry place inaccessible to children and pets.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of in trash/boat only if approved waste disposal facility.

Container Handling: Nonrefillable container. Do not reuse or refill this container. Completely empty container then offer for recycling or reconditioning; or puncture and dispose of in a sanitary landfill.

WARNING: To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than that indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. READ THIS LABEL and follow all use directions and precautions. Use only for the sites, pests, and application methods described on this label.

IMPORTANT: Do not expose children, pets or other nontarget animals to rodenticides. To help prevent exposure:

1. Store product not in use in a location out of reach of children and pets.

2. Apply bait in locations out of reach of children, pets, domestic animals, and nontarget wildlife, or in temper-resistant bait stations. These stations must be resistant to destruction by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are filled, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hooed livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.

3. Dispose of product container, unused, spoiled, and un consumed bait as specified on this label. Note: Bait stations are mandatory for outdoor, above-ground use. Tamper-resistant bait stations must be used if children, pets, nontarget mammals, or birds may access the bait.

USE RESTRICTIONS: This product can only be used to control Norway rats, roof rats and house mice in and within 100 feet of man-made structures constructed in a manner so as to be vulnerable to commercial rodent invasions and/or to harboring or attracting rodent infestations. Examples of such structures include homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, trash receptacles, agricultural and public buildings, transport vehicles (ships, trains, aircraft), docks and port terminals, and related structures around and associated with these sites. Fence and perimeter baiting beyond 100 feet from a structure, as defined above, is prohibited. Do not sell this product in individual containers holding less than 4 pounds of bait. Do not place near or treat vegetation or duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment. Do not apply directly to food or feed crops. Do not broadcast bait. Burrow baiting with this product is prohibited. Selection of Treatment Areas: Determine areas where rats and/or house mice will most likely find and consume bait. Generally, these are along walls, by gapped openings, in corners and concealed places, between floors or walls, beside burrows, or in locations where rats and/or house mice or their signs have been observed. Remove all non Attractive food as possible.

APPLICATION DIRECTIONS: The active ingredient in this product is an anticoagulant rodenticide. Individual rats and mice typically feed less or cease feeding altogether after consuming a toxic dose. House Mice: Use 1 bait block per placement, usually spaced 8 to 12 feet apart. Largely accessible to non-target animals. Use up to 2 blocks, may be needed at points of extremely high mouse activity. Rat: Use 2 to 12 blocks per placement, usually spaced 15 to 30 feet apart. Adjust the amount of bait applied to the level of rat feeding expected at each bait placement. For sewer applications, securely attach one end of a wire to bait block and provide a lethal dose, maintain for at least one week or more. Provide all rodents a chance to feed on the bait. Continue baiting until all signs of feeding have ceased. Follow-up: Replace contaminated or spoiled bait immediately. Wear waterproof gloves, collect and dispose of all visible dead animals and leftover bait, as well as any bait that has become accessible to non-target animals. To discourage reinfection, limit sources of rodent food, water and harborage as much as possible. If reinfection does occur, repeat treatment. For a continuous infestation, set up permanent bait stations and replenish bait as needed.

GUNSLINGER® Mini Blocks

ALL WEATHER BAIT FOR WET OR DRY AREAS FOR INDOOR AND OUTDOOR USE

KILLS NORWAY RATS, ROOF RATS, HOUSE MICE, AND ANTI COAGULANT-RESISTANT RATS AND HOUSE MICE

NORWAY RATS AND HOUSE MICE MAY CONSUME A LETHAL DOSE IN ONE NIGHT’S FEEDING BUT IT MAY TAKE TWO OR MORE DAYS FROM TIME OF BAIT CONSUMPTION FOR THEM TO DIE DUE TO STOP FEED ACTION, RODENTS TYPICALLY FEED LESS OR CEASE FEEDING ALTOGETHER AFTER CONSUMING A TOXIC DOSE.

ACTIVE INGREDIENTS: bromethalin 0.01% Irving Ingredients: 95.99%

Total 100.00%

KEEP OUT OF REACH OF CHILDREN
