RRSI Enhance

SURFACTANT/PENETRANT/DEPOSITION AID/DRIFT CONTROL AGENT

PRINCIPAL FUNCTIONING AGENTS:
Lecithin, methyl esters of fatty acids, alcohol ethoxylate .......................................................... 100%
TOTAL ........................................................................................................100%

All ingredients are exempt from tolerance requirements under 40 CFR 180. WA Reg Number -

CAUTION

KEEP OUT OF REACH OF CHILDREN

Causes moderate eye irritation. Harmful if swallowed, inhaled or absorbed through skin. Avoid contact with skin, eyes or clothing. Avoid breathing spray mist. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

Personal Protective Equipment: Wear chemical-resistant gloves, long-sleeved shirt and long pants, and shoes plus socks.

FIRST AID

Call a poison control center or doctor immediately for treatment advice.
Have the product container with you when calling a poison control center or doctor, or going for treatment.

If Swallowed: Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible.

If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses if present, after the first 5 minutes, then continue rinsing eye.

GENERAL INFORMATION

RSRI Enhance: is a multi-functional adjuvant package that is a 100% active, non-ionic surfactant that can be used with pesticides that suggest the use of a surfactant. This adjuvant system manages deposition, coverage, penetration and retards drift. RSRI Enhance does not actively modify the pH of the solutions and can be applied by ground or air.

RSRI Enhance: As a surfactant, it spreads the spray solution uniformly on the plant surface, increases retention of the spray droplet, and improves penetration through the leaf surface structures. It prevents crystallization and slows drying time.

RSRI Enhance: As a deposition/drift control agent, it launches more of the spray droplets into the ideal droplet size. It optimizes the spray pattern by providing the proper overlap. Spray lines are minimized and the number of large droplets, that have a tendency to bounce off the target, are reduced. Good judgment and sound application technology must always be followed when spraying pesticides.

DIRECTIONS FOR USE

Not For Aquatic Use

RSRI Enhance may be used forestry (site preparation and release), industrial (storage areas, plant sites, and other similar areas including governmental and private lands), grasslands (including pastures, rangeland and fence rows), right-of-ways (utility, railroad and roadways), turf (golf courses, parks and sod farms), ornamentals (container, field or greenhouse) and other turf, ornamental and landscaping sites. Refer to pesticide manufacturer’s label regarding definite adjuvant use recommendations and usage rates.

RSRI Enhance improves deposition and retards drift by producing a uniform spray pattern of commonly used water soluble and dispersible pesticides. The degree of drift hazard varies with the type of pesticide and application conditions. This product will retard drift but not eliminate drift. When managing the spray pattern to reduce drift, 1 pint per 100 gallons of solution or 1 ounce per 5 gallons.

ALWAYS FOLLOW THE LABEL DIRECTIONS PROVIDED BY THE PESTICIDE MANUFACTURER.

STORAGE AND DISPOSAL

Storage- Store in original container. Do not reuse container. Keep container tightly closed when not in use. Product will become thick at cooler temperatures but remains stable.

Disposal- Do not contaminate water, food, or feed by storage or disposal. Do not reuse empty container. Three rinse (or equivalent) during mixing and loading and add rinse water to spray tank. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrcycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.

WARRANTY: Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label, when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to the seller, and buyer assumes the risk of any such use.
