NEMATODE CONTROL
ORGANIC NEMATODE CONTROL
LIQUID CONCENTRATE

ACTIVE INGREDIENT:
Germiol (CAS# 106-24-1) .......................................................... 2.5%
OTHER INGREDIENTS:* ................................................................. 97.5%
TOTAL: ........................................................................................ 100.0%

*Water, Lecithin (CAS# 8002-43-5), Egg Solids (CAS# 9006-50-2)

KEEP OUT OF REACH OF CHILDREN
CAUTION
See Back Panel for Precautionary Statements

Manufactured by Vegalab LLC, 1201 North Orange Street, Suite 7233, Wilmington, DE 19801-1165

NET CONTENTS: 1 Gallon (3.79 L)

Non-Toxic
Environmentally Safe

Steps Nematode Infestations, Which Enhances Plant Growth
Nematode Control is a nematocidal agent from organic plant extracts that is used to control many species of plant parasitic nematodes, including those from the genus Meloidogyne. They exist in soil in areas with warm weather or short winters. About 2,000 plants are susceptible to infection by root-knot nematodes, which causes approximately 5% of the total global crop loss. Nematode Control controls nematodes by reducing the size of root knots formed and destroying nematode eggs. It is applied to soil, where it targets plant parasitic nematodes, thereby promoting crop and root growth.

Nematode Control uses naturally extracted germiol to destroy plant parasitic nematodes, while greatly reducing any environmental impacts. Germiol is highly recommended for the biological control of plant parasitic nematodes.

ORGANIC NEMATODE CONTROL

**FIRST AID**

- **IF SWALLOWED**: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
- **IF INHALED**: Move person to fresh air. If person is not breathing, call 911 or a doctor immediately. Do not give mouth-to-mouth resuscitation. If there is artificial respiration, make it possible to breathe without mouth-to-mouth contact. A person who stops breathing may require artificial respiration and hospitalization. Call a poison control center or doctor for further treatment advice. If IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes. Then continue rinsing eye.
- **IF ON SKIN OR CLOTHING**: Take off contaminated clothing. Wash skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for further treatment advice. If ON SKIN OR CLOTHING: Take off contaminated clothing. Wash skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for further treatment advice.

**NOTICE**: Have the product container or label with you when calling a poison control center or doctor or going to the hospital. For emergency information call the National Poison Information Center at 1-800-222-1222. For medical emergencies call 911 or your local emergency services.

**DIRECTIONS FOR USE**

Mix thoroughly and continue agitation during application. Nematec Control is only to be applied to the soil and not onto plants or leaves. If above-ground foraminiferous food commodities are present, spray must be directed to soil around and adjacent to plants. Nematec Control contains eggs for which the direct seed and ground application is above-ground foraminiferous food commodities is permitted. Do not apply prior to rain as this may reduce product effectiveness.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage and disposal. Pesticide Storage: Store in a cool, dry area under lock and key. Post as a pesticide storage area. Always store pesticides in the original container. Store away from food, pet food, feed, seeds, fertilizers, and veterinary supplies. Place liquid formulations on lower shelves and dry formulations above. Pesticide Disposal: To avoid wastage, use all materials in this container by application according to label directions. If wastes cannot be avoided, offer remaining product to waste disposal facility or pesticide disposal program (often such programs are run by state or local governments or by industry). Container Handling: Nonrefillable container. Do not reuse or refill container. Triple rinse container (or equivalently) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a container 1/4 full with water and soak. Shake for 10 seconds. Pour rinse water into equipment or a container 1/4 full with water and soak. Shake for 10 seconds. Repeat this procedure two more times. Then offer for recycling if available, or generate and dispose of in a sanitary landfill or by incineration. Do not burn unless allowed by state and local ordinances.

**ENVIRONMENTAL HAZARDS**

For terrestrial uses: Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate.

This product has not been registered by the United States Environmental Protection Agency. Vegahold, LLC represents that this product qualifies for exemption from registration under FIFRA 25(b).
