DBBC
Disinfectant Bathroom & Bowl Cleaner

DBBC Disinfectant Bathroom & Bowl Cleaner is a non-acid bowl and bathroom cleaner, which cleans, deodorizes and disinfects in one easy step. It cleans, deodorizes and disinfects surfaces by killing many disease-causing microorganisms and mold and mildew. Its non-abrasive formula is designed for use on hard, non-porous environmental restroom surfaces: glazed ceramic tile, glazed porcelain, chrome, stainless steel and plastic surfaces associated with floors, walls, fixtures, tables, urinals, sinks, shower rooms and locker rooms.

ACTIVE INGREDIENTS:
Cetyl Dimethyl Dimethyl Ammonium Chloride .......................... 0.050% 
Didecyldimethylammonium Chloride ..................................... 0.03% 
Alcohol (Glycol/Co. Grt. Oct. Tolu.) ......................................... 0.13%

INERT INGREDIENTS: 
Total .......................... 0.34%

EPA Reg. No. 10324-85-14994 E.P.A. Est. No. 3725-Ca-01

KEEP OUT OF REACH OF CHILDREN

CAUTION
See side panel for additional precautionary statements.

FIRST AID: Have the product container or label with you when calling a poison control center or doctor, or going for treatment. IF ON SKIN: CLOTHING—Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. IF SWALLOWED: Do not induce vomiting unless told to do by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

HEPATITIS C VIRUS WITH A 10-MINUTE CONTACT TIME. This product was found to be effective against Hepatitis C Virus (HCV) in a study sponsored by the National Institutes of Health (NIH). In the study, HCV was isolated from a research isolate and labeled with 35S extrinsic adenosine 5'-triphosphate (ATP) and used to contaminate intact human hepatocytes isolated from donor livers. The hepatocytes were then exposed to the DBBC product for 10 minutes. Following the product application, the infected cells were washed and used to infect naive liver cultures. The cultures were then incubated for 3 days and viral PCR was performed to detect the presence of HCV RNA. The results of the study indicate that DBBC product is effective against Hepatitis C Virus with a 10-minute contact time.

PRECAUTIONARY STATEMENTS
Hazard to Humans and Domestic Animals

CAUTION: Causes moderate eye irritation. Harmful if swallowed or absorbed through skin.

Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, using tobacco or using the toilet. PHYSICAL OR CHEMICAL HAZARDS: Do not mix with other cleaners, disinfectants or open flame. Do not mix with oxidizers, acidic soaps and detergents.
