**DIRECTIONS FOR USE**

Read all directions and precautions before use.

**IMPORTANT:** Always apply after bath chemicals separately and never combine products or store in addition to the spa. Canse™ is not a sanitizer. For routine disinfection, use an EPA registered product, such as Nature2. Spas, according to the label’s instructions. When properly used, Canse™ will help prevent your spa from growing efficiently. Keep this product dry. Use only in a clean, disinfected product. Never add water to the product bottle. For spa start up refer to Nature2 Owners Manual. For regular use add 1 tablespoon (15 mL) of water to your spa. Cent Canse™ was the spa while the spa is in continuous circulation with the water; the product is fully dispersed. Test for (SPN) with Nature2 Spa Test strips (reagent kit) after allowing enough time for the product to disperse. If measurable MPS levels in the 0-12 ppm range, add another dose of tablespoon per 250 gallons. Repeat test and re-test before entering the spa. After each use add 1 tablespoon of Canse™ to 250 gallons of water. Allow time for the product to disperse before using all the spa. Keep for total algalium and total hardness using tests. For full testing, see a week. Adjust accordingly.

**PRECAUTIONARY STATEMENTS**

- **DANGER:** Corrosive to Eyes, Irritating to Skin

**PHYSICAL AND CHEMICAL HAZARDS**

Strong oxidizing agent. May ignite if handled under high pressures or temperatures. Never add water to a product. Always add product to large quantities of water. Do not mix with other chemicals or any other substances. Do not give to children or add water to this product. Always apply product directly into the spa. Contamination of this product with moisture or small amounts of water, other chemicals, or other substances, can lead to product decomposition with generation of heat, release of hazardous gases, and potential fire and explosion. In case of contamination, do not re-seal container, instead wash container outside in open air or well ventilated area and then with large amounts of water.

**FIRST AID**

- **If in eyes:** Hold open upper and lower eyelids, gently pull conjunctiva for 15-20 minutes. Remove contact lenses if present. After the first 5 minutes, rinse with sterile eye wash. Call a poison control center for referral to an emergency center.
- **If on skin:** Remove contaminated clothing. Wash skin immediately with plenty of water for 15-20 minutes. Call a poison control center for referral to an emergency center.
- **If swallowed:** Call poison control center or doctor immediately for referral to an emergency center. Do not give anything by mouth to an unconscious person.
- **If inhaled:** Move person to fresh air. If person is not breathing, call 911 or an emergency center. Give artificial respiration, preferably mouth to mouth, until relieved. Call a poison control center or doctor for further treatment advice.

**STORAGE AND DISPOSAL**

Store container in a cool, well-ventilated, dry area away from direct sunlight or heat to prolong product life. Keep products in a tightly sealed container when not in use. If spilled, flood area with large amounts of water. Product is resistant to heating, but should be heated with a hose before disposal in a sanitary sewer. Place empty container in trash or recycle. Do not re-use to avoid contamination. Do not store product near food or animal feed.
