DIRECTIONS FOR USE

Read all directions and precautions before use.

IMPORTANT: Always apply other spa chemicals separately and never combine products prior to addition to the spa. Cense™ is not a sanitizer for routine disinfection, use an EPA-registered product such as Nature2® Spa, according to the label's directions. When properly used, Cense™ will help your sanitizer work more efficiently. Keep this product dry, line the only ones shown to dispense product. Never add water to the product bottle. For spa start-up refer to Nature2® Owners Manual. For regular use add 1 tablespoon (approx. 1-1/2 spoon 15-gram) per 250 gallons (1000 liters) of water before each spa use. Cast Cense™ into the spa while the spa is under continuous circulation with the cover off until the product is fully dissolved. Test for MPS with Nature2® Spa Test Strips (or equivalent) after allowing enough time for the product to be properly dissolved. If the Nature2® test strips (or equivalent) fail to indicate MPS levels in the 0.5-12 ppm range add another dose (1 tablespoon per 250 gallons) and re-test before entering the spa. After each spa use add 1 tablespoon of Cense™ in 250 gallons of water. Allow time for the product to dissolve before turning on the spa jets. Test for total alkalinity and total hardness using Nature2® Spa Test Strips once a week. Adjust accordingly.

Stash as needed when unpleasant odors or eye irritation occur, allow heavy wind or rainstorms (if your spa was not covered), or if 01 develops with 1.5 tablespoons of Chlorine per 250 gallons to remedy problems which may occur when bitter lox is high or when water appears hazy or cloudy.

PRECAUTIONARY STATEMENTS

DANGER: Corrosive, Strong Oxidizer. May cause irreversible eye damage if not immediately treated. Causes Skin Burns. Skin contact with the powder may cause allergic skin reactions in sensitive individuals. Do not get in eyes, on skin or clothing. Remove and wash contaminated clothing before re-use. Harmful if swallowed or inhaled. Avoid breathing dust. Wear goggles or face shield and rubber gloves when handling.

PHYSICAL AND CHEMICAL HAZARDS

Strong oxidizing agent. Mix only into water, using clean, dry utensils. Never add water to product. Always add product to large quantities of water. Do not mix with other chemicals or any other substance. Do not pre-dissolve or add water to this product. Always apply product directly into the spa. Contamination of this product with moisture or small amounts of water, other chemicals or other substances, can lead to product decomposition with generation of heat, release of hazardous gases, and potential fire and explosion. In case of contamination, do not re-use container. Instead isolate container outdoors in open air, or well ventilated area and flood with large amounts of water.

FIRST AID

If in eyes: Hold eyelids open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses if present, after the first 5 minutes, then continue rinsing eyes. Call a poison control center or doctor for treatment advice.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for treatment advice.

If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Drink anything by mouth in an unconscious person.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth to mouth if possible. Call a poison control center or doctor for further treatment advice.

STORAGE AND DISPOSAL

Store container in cool, well ventilated, dry area away from direct sunlight or heat producing products. Keep product in a tightly closed container when not in use. Spilled fluid area with large amounts of water. Product or residue that can be washed should be diluted with water before disposal in sanitary sewer. Place empty container in bulk collection, or encase in a concrete. To avoid corrosion do not store product near food or animal feed.
