- Thyme Oil: 3%
- Inert Ingredients: 83%

Total: 100%

WA # 99892-13001
FOR EPA REGISTRATION

NET CONTENTS:
- 5 GALLONS
- 55 GAL DRUM
- 250 GAL TOTE

HOW IT WORKS:
This product contains natural plant oils that may kill pests such as aphids and mealy bugs. This product may also suppress mites, thrips and powdery mildew. All life is made up of protein molecules. The key is to allow the wash to be effective on the cell walls of the protein molecules.

MODE OF ACTION:
This organic wash has the ability to attach to and de-solve NON SALT BONDED CELL WALL PROTEIN. These non salt based proteins are characteristic of insect pests. THE PLANT OILS ATTACK THESE PROTEIN CELLS. This product leave the salt bonded cell proteins alone and unharmed. This results in complete safety in a broad range of mammals and environments. This product can break down the “glue” that holds insects together and can quickly suppress them. This lower the chance of them producing a resistant strain to this cleaner/wash. This product should not act on the salt bonded cell wall proteins. This result in a safe wash and cleaner when used as directed.

AVOID CONTACT WITH EYES, SKIN, OR CLOTHING. In case of contact, immediately flush eyes or skin with water for ten minutes. Seek medical attention if irritation persists. If swallowed, immediately seek medical attention. Personal protective equipment: Applicators and other handlers of this product should wear long sleeve shirt and pants, shoes plus socks, gloves, and protective eyewear.

DO NOT REUSE EMPTY CONTAINERS. DISPOSE OF PER LOCAL, STATE AND FEDERAL REGULATION.
