**Rice**

Bacterial (Brown spot) Acaracomas Negro, Monca Blanca (White Flies)

**Coffee**

Insects, Rust and Flies

**Applying EX-ICUTE to Raw Vegetables in Storage by Thermo-fogging to control insects, fungus, bacteria and spores.**

- **EX-ICUTE** at a rate of one gallon per 10,000 sq ft for thermal fogging from 80°F to 100°F for 8 to 10 hours supporting.

**HOW EX-ICUTE/RAPID-O/RID-BUGS WORKS:**

To rid plans of all stages of chewing and sucking insects, PLUS some fungal diseases. There are both good and bad cell wall proteins. The fundamental elements that allow the EX-ICUTE/Rapid-O/RID-BUGS to be effective is the molecular complex's ability to selectively discern the differences between the good and bad proteins. The main mode of action of this organic product is its ability to attach to, and dissolve, non salt-bonded, cell wall proteins that are characteristic of a broad range of pests, while leaving the salt bonded proteins unharmed for complete plant safety across a broad range of environments.

**CAUTION:**

- **Avoid Contact With Eyes, Skin, or Clothing.** In case of contact, immediately flush eyes or skin with water for ten minutes. Seek medical attention if irritation persists. If swallowed, immediately seek medical attention.
