Tomcat® WITH BROMETHALIN

PLACE PACS

This Product May Only Be Used Inside and Within 100 Feet of Man-made Structures

KILLS NORWAY RATS, ROOF RATS & HOUSE MICE

ACTIVE INGREDIENT: Bromethalin (CAS #63333-35-7): 0.01%
OTHER INGREDIENTS*: 99.99%
TOTAL: 100.00%
*Contains Denatonium Benzoate

NET WT. 4.1 lbs (1.8 kg)
22 x 3 oz (85 g) Place Pacs

KEEP OUT OF REACH OF CHILDREN
CAUTION
See back panels for First Aid and additional precautionary statements.

EPA REG. NO. 12455-133-3240 EPA EST. NO. 12455-99-1

For Use In and Around Agricultural Buildings and Homes
Kills Anticoagulant Resistant Norway Rats, Roof Rats & House Mice
Norway Rats, Roof Rats, & House Mice Cease Feeding After Consuming a Toxic Dose
FIRST AID
HAVE LABEL WITH YOU WHEN OBTAINING TREATMENT ADVICE
IF SWALLOWED:
• Call a poison control center, doctor, or 1-877-664-3104 immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by the poison control center or doctor.

TREATMENT FOR PET POISONING
If an animal eats this bait, call a veterinarian at once.

NOTICE TO PHYSICIAN OR VETERINARIAN
Contains the nerve poison Bromethalin. This product is not an anticoagulant type rodenticide. For humans or animals ingesting bait and/or showing poisoning signs (such as muscle tremors, loss of hind limb use, or seizures for animals), first absorption by other organs or gastric lavage. Seizure symptoms, if present, would be the result of central stimuli and should be treated accordingly through administration of an anti-convulsive and supportive care.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL. Read this entire label and follow all use directions and use precautions. Use only for the sites, pests, and application methods described on this label.

IMPORTANT: Do not expose children, pests, or non-target animals to rodenticides. To help prevent exposure:
1. Store unused product out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching the bait compartments and obtaining bait. If bait can be shaken from bait stations when they are filled, units must be sealed or otherwise immobilized. Storage bait stations are needed in areas open to livestock, fowl, leas, and other non-target peroductive animals, or in areas prone to vandalism.
3. Dispose of product container and unused, spoiled, or unconsidered bait as specified on this label.

Note: Bait stations are mandatory for outdoor, above-ground use. Tamper-resistant bait stations must be used if children, pets, non-target mammals, or birds may access the bait.

USE RESTRICTIONS: This product can only be used to control Norway rats, roof rats and house mice in and within 100 feet of man-made structures constructed in a manner so as to be vulnerable to commercial rodent invasion and/or harboring of non-target infestations. Examples of such structures include homes and other permanent or temporary structures, basing enclosures, industrial and commercial buildings, trash receptacles, agricultural and public buildings, transport vehicles (ships, trains, aircraft), docks and part of terminal buildings and related structures around and associated with these sites. Fences and perimeter building, beyond 100 feet from a structure as defined above, is prohibited. This product must not be applied directly to food or feed crops.

Using baiting with TOMCAT® With Bromethalin PLACE PACS is prohibited.

DIRECTIONS FOR USE (Continued from other panel)
When used in USA-registered facilities, this product must be applied in tamper-resistant bait stations. Do not broadcast bait.

Do not sell this product in individual containers holding less than 4 pounds of bait.

SELECTION OF TREATMENT AREAS: Determine areas where rats or mice will most likely find and consume the bait. Generally, these areas are along walls, by grated openings, in cornrows and near rowcrossed places, between floors and walls, or in localities where rodents or their signs have been seen. Palatate bait from rims and snow. Remove as much alternative food as possible.

APPLICATION DIRECTIONS:
Rate: Apply 1 to 2 place pac per placement (usually at intervals of 15 to 20 feet), Adjust the amount of bait applied to the level of bait feeding observed at each bait placement.
Mice: Open place pac and apply ¼ to ½ ounce (1–2 level tablespoons) of bait per placement. Space placements at intervals of 6 to 12 feet in infested areas. Larger placements, up to 5 ounces, may be used at points of extremely high mouse activity. Building Strategy: Highest bait consumption is expected to occur on the first day or two after application begins. After several days, inspect the placement and replenish bait at sites where there is evidence of heavy feeding or where there is continued evidence of rodent activity. Normally, the volume of bait consumed will be significantly less with Bromethalin than with anticoagulant baits. Although one night feeding will usually provide a lethal dose, maintain bait for at least two weeks to provide rodents a chance to feed on the bait. Continue feeding until all signs of feeding have ceased.
FOLLOWUP: Replace contaminated or spoiled bait immediately. Using gloves, collect and properly dispose of all meat, exposed bait, and bait stations, to prevent reinfection. If required, use of rodent glue, water, and harmo are as much as possible. If reinfection does occur, repeat treatment. Where a continuous source of interaction is present, establish permanent bait stations and reapply as needed.

PRECAUTIONARY STATEMENTS
Hazard to Humans and Domestic Animals
CAUTION: Harmful if swallowed. Keep away from children, domestic animals and pets. All handlers (including applicators) must wear shoes plus socks and gloves. Any person who retrieves carcasses or unused bait following application of this product must wash given.

User Safety Requirements
Follow manufacturer’s instructions for cleaning/maintaining PPE. Use such instructions for washables, use solvent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after applying bait and before eating, smoking, chewing gum, using tobacco or using the toilet and changing into clean clothing.

ENVIROMENTAL HAZARDS
This product is extremely toxic to mammals and birds, fish and other small vertebrates and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Residues in the water may be toxic to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rinses.

Motomco FARM & HOME
WITH BROMETHALIN PLACE PACS
KILLS NORWAY RATS, ROOF RATS & HOUSE MICE
KILLS ANTICOAGULANT RESISTANT NORWAY RATS, ROOF RATS AND HOUSE MICE
Norway rats, Roof rats and House mice cease feeding after consuming a toxic dose.
ACUTE INGREDIENT: Bromethalin (CAS: 90933-3-7): 2.50%
OTHER INGREDIENTS: 25.00%
Color: 17.50%
Contains Sodium Bicarbonate
KEEP OUT OF REACH OF CHILDREN CAUTION
See side panels for first aid and additional precautionary statements.

STORAGE AND DISPOSAL
Do not contaminate water, food or healthy storage or disposal. DO NOT APPLY DIRECTLY TO FOOD OR FEED CROPS.
Pesticide Storage: Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.
Pesticide Disposal: Waste resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility.
CONTAINER HANDLING: Nonreturnable container. Do not reuse or refill this container. Offer for recycling, if available. Dispose of empty container by placing in trash, at an approved disposal facility or by incineration.
WARRANTY: To the extent consistent with applicable law, Remco makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and handling of this material when such use and handling is contrary to label instructions.

DIRECTIONS FOR USE

TREATMENT FOR PET POISONING

NOTE TO PHYSICIAN OR VETERINARIAN

Contains the new active ingredient Bromethalin. This product is not an anticoagulant type rodenticide. For human or veterinary use only. The following signs such as muscle tremors, convulsions, inability to walk, weakness or collapse, and loss of balance or ataxia may occur. Altered brain function may be indicated. If you suspect exposure to this product, it is recommended that you contact your veterinarian or physician. Do not use on cats or other pets. If you suspect exposure, contact your veterinarian immediately.

FIRST AID

IF swallowed:
Call poison control center, doctor or 1-877-864-2 at immediately for treatment advice.

If not using vomiting, please be sure to be treated by the poison center or doctor.
