resulting from the affected algae, use CLOROX® Pool&Spa™ filtering. In order to aid in the removal of the very fine particles of debris from the water by vacuuming or sweeping and of CLOROX® Pool&Spa™ Shock Plus) to a chlorine level of 5 ppm. Remove of CLOROX® Pool&Spa™ Algaecide + Clarifier per 10,000 gallons of pool water. Add 24 to 48 oz (per 10,000 gallons) weekly as a maintenance dose to prevent the growth of chlorine-resistant algae (such as mustard and “black” algae). It also acts as an added defense against algae due to low chlorination periods. Once started, algae greatly increases chlorine demand and the associated increased cost.

FRESHLY FILLED AND/OR ALGAE-FREE SWIMMING POOLS: Add 10 4 oz of CLOROX® Pool&Spa™ Algaecide + Clarifier per 10,000 gallons of pool water. Add 24 to 48 oz (per 10,000 gallons) weekly as a maintenance dose to prevent the growth of algae. Once started, algae greatly increases chlorine demand and the associated increased cost.

POOL MAINTENANCE TIPS: In order to ensure maximum effectiveness of CLOROX® Pool&Spa™ Algaecide + Clarifier, use a reliable test kit. Ideally chlorinate with a hypochlorite (such as CLOROX® Pool&Spa™ Shock Xtra Blue ® or CLOROX® Pool&Spa™ Shock Plus) to a chlorine residual of 1 to 2 ppm using a reliable test kit.

STOREAGE AND DISPOSAL: STORABLE: Non-porous, non-reactive surface where solution is to be stored. Store in a cool, dry, well-ventilated area away from food or pet food.

CONTAINER HANDLING: IF EMPTY: Non-hazardous container. Do not reuse or offer for recycling if available. IF FULLY FILLED: Call your local solid waste agency for disposal instructions. Never place unused product on the ground or in a drain.

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS.

HAZARDS TO HUMANS

1. Harmful if swallowed. If swallowed, call a poison control center or doctor immediately. Drink at least 2 cups of water. DO NOT induce vomiting unless told to do so by a poison control center or doctor.

2. Harmful if splashed in the eyes. If splashed in the eyes, rinse with plenty of water for 15-20 minutes. Have the person sip a glass of water if able to swallow. DO NOT give anything by mouth to an unconscious person.

3. Harmful if inhaled. If exposed, get the person to fresh air. If the person is not breathing, call 911 or an ambulance, then give artificial respiration preferably mouth-to-mouth, if possible.

4. Harmful if absorbed through the skin. Wash the exposed skin with soap and water, then rinse with plenty of water for 15 minutes. If contact occurs, remove contaminated clothing. Wash skin immediately with soap and water. Induce vomiting unless told to do so by a poison control center or doctor.

5. Harmful if inhaled. Have the person sip a glass of water if able to swallow. DO NOT give anything by mouth to an unconscious person.

6. Harmful if inhaled. Move to fresh air. If breathing is difficult, induce artificial respiration. If unconscious, call 911 or an ambulance, then give artificial respiration preferably mouth-to-mouth, if possible.

HAZARDS TO DOMESTIC ANIMALS

If even a small amount of product gets on your pet, wash your pet immediately, rinse with plenty of water and talk to a veterinarian. If swallowed, induce vomiting only if told to do so by a veterinarian.

7. Harmful if swallowed. If swallowed, consult a veterinarian immediately.

8. Harmful if splashed in the eyes. In case of contact, flush with plenty of water for 15 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

PHYSICAL OR CHEMICAL HAZARDS

1. Harmful if splashed in the eyes. In case of contact, flush with plenty of water for 15-20 minutes. Have the person sip a glass of water if able to swallow. DO NOT give anything by mouth to an unconscious person.

2. Harmful if inhaled. Have the person sip a glass of water if able to swallow. DO NOT give anything by mouth to an unconscious person.

3. Harmful if inhaled. Have the person sip a glass of water if able to swallow. DO NOT give anything by mouth to an unconscious person.

4. Harmful if inhaled. Have the person sip a glass of water if able to swallow. DO NOT give anything by mouth to an unconscious person.

5. Harmful if inhaled. Have the person sip a glass of water if able to swallow. DO NOT give anything by mouth to an unconscious person.

6. Harmful if inhaled. Have the person sip a glass of water if able to swallow. DO NOT give anything by mouth to an unconscious person.

7. Harmful if inhaled. Have the person sip a glass of water if able to swallow. DO NOT give anything by mouth to an unconscious person.

8. Harmful if inhaled. Have the person sip a glass of water if able to swallow. DO NOT give anything by mouth to an unconscious person.

9. Harmful if inhaled. Have the person sip a glass of water if able to swallow. DO NOT give anything by mouth to an unconscious person.

10. Harmful if inhaled. Have the person sip a glass of water if able to swallow. DO NOT give anything by mouth to an unconscious person.

FIRST AID: Call a poison control center (1-877-800-5553) or doctor for treatment advice. Have the product container or label with you when seeking poison control center or doctor or giving treatment. IF BURNED: Do not rub area. Douse with plenty of water for 15-20 minutes. Have the person sip a glass of water if able to swallow. DO NOT give anything by mouth to an unconscious person.

FIRST AID: Call a poison control center (1-877-800-5553) or doctor for treatment advice. Have the product container or label with you when seeking poison control center or doctor or giving treatment. IF SWALLOWED: Have the person sip a glass of water if able to swallow. DO NOT give anything by mouth to an unconscious person. Do not induce vomiting except on the advice of a poison control center or doctor.

FIRST AID: Call a poison control center (1-877-800-5553) or doctor for treatment advice. Have the product container or label with you when seeking poison control center or doctor or giving treatment. IF INHALED: Have the person sip a glass of water if able to swallow. DO NOT give anything by mouth to an unconscious person. Call a poison control center or doctor immediately. Do not induce vomiting unless told to do so by a poison control center or doctor.
